Patrick Morrisey
Governor of West Virginia

To the Honorable Members of the West Virginia Legislature and the
Citizens of West Virginia:

I am pleased to provide you with the State of West Virginia's Annual Comprehensive Financial Report (ACFR) for the year ended June 30, 2025. An independent certified public accounting firm has audited the basic financial statements contained in this report.

The ACFR demonstrates West Virginia's commitment to financial accountability and national standards. This document provides the Legislature and citizens of West Virginia with the state's financial data. It can be accessed on the Internet at www.finance.wv.gov.

This report was compiled with the help of individuals throughout state government. Each state agency provided clear, concise information to ensure the highest level of financial accountability.

Sincerely,

A handwritten signature in blue ink that reads "PATRICK MORRISEY".

Patrick Morrisey
Governor

ACKNOWLEDGMENTS

STATE OF WEST VIRGINIA
DEPARTMENT OF ADMINISTRATION

Eric L. Householder
CABINET SECRETARY

December 19, 2025

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia

Dear Governor, Senators, Delegates and Citizens:

I am pleased to present the 2025 Annual Comprehensive Financial Report (2025 ACFR) of the State of West Virginia for the fiscal year ending June 30, 2025. This report was prepared by the Financial Accounting and Reporting Section (FARS) within the Finance Division of the Department of Administration (Management).

The 2025 ACFR was prepared in conformity with the reporting model outlined by the Governmental Accounting Standards Board (GASB) Statements No. 34 and No. 35, and other related statements. This reporting model's objective is to provide a clear picture of the government as a single, unified entity as well as to provide traditional fund-based financial statements. The State of West Virginia's financial statements for the fiscal year ended June 30, 2025, are fairly presented in conformity with generally accepted accounting principles in the United States (GAAP).

This independent audit of the financial statements of the State of West Virginia is part of a broader, federally mandated "Single Audit" designed to meet the requirements of federal grantor agencies. The standards governing Single Audit engagements require the independent auditors to report not only on the fair presentation of the basic financial statements, but also on West Virginia's internal controls and compliance with requirements applicable to major programs.

GAAP requires that Management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The State's MD&A can be found immediately following the Report of the Independent Auditors.

The 2025 ACFR consists of Management's representations concerning the financial information of the State of West Virginia. Consequently, Management assumes full responsibility for the completeness and reliability of all the information presented in this report. To provide a reasonable basis for making these representations, Management of the State has established a comprehensive internal control framework that is designed to protect the government's assets from loss, theft, or misuse and to compile sufficiently reliable information for the preparation of the State's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the State's comprehensive framework of internal

1900 KANAWHA BOULEVARD, EAST • BUILDING 1, ROOM E-119 • CHARLESTON, WEST VIRGINIA 25305-0120
• (304) 558-4331 • FAX: (304) 558-2999

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

controls is designed to provide reasonable, rather than absolute, assurance that these financial statements are free from material misstatements. As Management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

The State of West Virginia's financial statements were audited by Clifton Larson Allen. The independent auditors concluded, based upon their audit and the reports of other auditors, that there was a reasonable basis for rendering an unmodified opinion.

Profile of the Government

The State of West Virginia provides a full range of services including education, social and health services, transportation, public safety, conservation of natural resources, and economic development. In addition to general government activities, this report includes financial information regarding various discretely presented component units which are financially accountable to the State, or for which the nature and significance of their relationship with the State are such that their exclusion would cause this report to be misleading or incomplete. The criteria used to determine financial accountability of a particular entity are the appointment by a state official of a voting majority of the entity's governing body and (1) the ability of the State to impose its will on that entity or (2) the potential for the entity to provide specific financial benefits to or impose specific financial burdens on the State. See Note 1 (Summary of Significant Accounting Policies) for a comprehensive discussion of the criteria used in determining the State's financial reporting entity.

Budgetary control is maintained through legislative appropriations and the Executive Branch quarterly allotment process. Agencies submit budgetary requests to the State Budget Office. The State Budget Office compiles the Executive Budget on behalf of the Governor, who submits it to the Legislature for final approval. After the approval of the budget, the State Budget Office maintains control over the spending units of the State at the fund and activity level and by use of the quarterly allotments of General Revenue appropriations. Total allotments cannot exceed total budget bill appropriations. The State Auditor exercises control overspending at the annual line-item appropriation level. All appropriations, except funds which are re-appropriated, expire 31 days after the fiscal year-end. All governmental funds, including special revenue funds, are controlled by this process and annually appropriated and allotted, accordingly. The State Budget Office is responsible during the year for evaluating all proposed payroll changes, encumbering all planned expenditures, and preventing expenditures from exceeding appropriations for each agency. Meanwhile, the State Auditor and State Treasurer are prohibited by law from issuing a state check that exceeds the amount appropriated.

All appropriation requests that are above the current fiscal year level amounts are submitted as a separate "improvement package" stating the amount, purpose, benefits, and needs of the additional funding. Appropriation requests are reviewed by the Secretary of Revenue, the State Budget Office, and the Governor's Office but only after budget meetings held with the spending units to discuss their requests. A discussion of the State's annual budget process is included as Required Supplementary Information immediately following the Notes to the Financial Statements.

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

Economic Review

West Virginia stands at the forefront of energy research and boasts a multifaceted energy portfolio encompassing coal, natural gas, wind, hydroelectric, geothermal, biomass and solar resources. West Virginia plays a pivotal role as a net contributor of electricity to the regional grid and consistently ranks within the top five states for interstate electricity sales. West Virginia continues to uphold its reputation for providing cost-effective energy solutions.

West Virginia has the 3rd lowest workers' compensation rates, according to Oregon Consumer Business Services, 2024. West Virginia was also ranked 3rd in best cost of doing business by CNBC's America's Top States for business, 2024. Additionally, Bureau of Economic Analysis 2024 ranks West Virginia 11th in best gross domestic product growth and Tax Foundation Index, 2024, ranked West Virginia 23rd in the state business climate tax ranking.

West Virginia is committed to expanding its economic diversity, embracing a range of industries encompassing technology, chemicals and polymers, automotive, advanced manufacturing, natural gas, aerospace, metals, fulfillment distribution and building products.

Prominent global enterprises and institutions have chosen West Virginia as their destination for expansion, drawn by the favorable business environment and the highly productive workforce. The following instances highlight the State's economic growth throughout fiscal year 2024 - 2025:

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

These investments reflect the increasingly diversified nature of the economy that West Virginia is building. West Virginia is well positioned as the ideal location for new and expanding companies that want to create good jobs in the State. West Virginia provides access to:

- Skilled and flexible workforce that has earned a reputation for dedication, loyalty and low turnover rate
- Business taxes that are among the lowest in the country
- West Virginia is approximately 5.1% below the national average for industrial electricity and approximately 17% below the national average for residential electricity rates;
- A strategic location within an eight-hour drive to half the U.S. population and a third of the Canadian market
- A community and technical college system that is highly responsive to business and workforce needs
- High quality of life, low cost of living and unparalleled outdoor recreational activities.

Major Initiatives

Pro-Growth Tax Reforms

West Virginia enacted significant business tax reductions between 2006 and 2011 to help boost future investment in the State's economy. The corporation net income tax was reduced from 9% to 6.5%. In addition, West Virginia eliminated the business franchise tax, the corporate charter tax, the telecommunications tax and a business registration fee renewal requirement. The latest estimates project a net reduction of more than 70% in corporation net income tax for businesses over a 10-year period. Beginning in 2022, the general multi-state business apportionment formula for income tax purposes changes from a three-factor formula involving the share of payroll, property, and sales in West Virginia to a single sales factor formula. As a result of this change, multi-state businesses with property and/or payroll in West Virginia face no direct marginal increase in tax liability associated with a decision to expand their physical presence in the State. An increase in either property investment or payroll in West Virginia has no direct impact on future multi-state business net income tax liability in the State.

West Virginia enacted a significant personal income tax reduction beginning in 2023. Income tax rates were reduced by 21.25% with the top marginal rate falling from 6.5% to 5.12%. Small business corporations, partnerships, limited liability companies and sole proprietors all benefit from these lower tax rates along with employees earning a paycheck. Beginning in 2024, the State offered refundable income tax credits equal to 100% of local West Virginia property taxes paid on qualified motor vehicles and 50% of local West Virginia property taxes paid on qualified tangible personal property for small businesses with total appraised tangible personal property valued at \$1 million or less.

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

West Virginia law provides for additional income tax rate cuts beginning in 2025 depend on a trigger mechanism that potentially activate once a year based on a comparison between total general revenue fund collections less severance tax collections for the prior year with inflation adjusted non-severance tax revenues from the fiscal year 2019 base year. Measured annual collections above inflation adjusted base-year collections become the amount available for additional income tax cuts beginning in the following tax year.

Fiscal year 2024 General Revenue fund collections less severance tax collections totaled more than \$5.341 billion in comparison with inflation adjusted base year revenues of more than \$5.248 billion. The excess amount above inflation of nearly \$93.3 million equaled more than 4% of total fiscal year 2024 personal income tax collections triggering a 4 % tax cut beginning in 2025. The Legislature subsequently enacted Senate Bill 2033, a measure that codified a 2025 tax reduction of nearly 6% from the 2024 tax rates with a top tax rate of 4.82%. This bill also provided for a one-year delay in the start of future tax cuts per the trigger. Fiscal year 2025 collection levels were not sufficiently high enough to trigger a tax cut beginning in 2027.

In addition to lower taxes, West Virginia offers a variety of tax credits, exemptions, and special valuations for new and existing companies. Credits for manufacturers and certain other types of businesses that create new jobs can offset up to 100% of the State's business taxes. There are special valuations on aircraft, high technology, pollution abatement equipment and property tied to specified customer supplier relations, which can dramatically reduce property taxes; and exemptions for manufacturers can eliminate sales tax for goods used in manufacturing. There are new tax credit programs that are now available for customer fulfillment and distribution centers as well as ethane cracker facilities.

Roads and Highways

During fiscal year 2025, the West Virginia Division of Highways (WVDOH) continued work on several of its major initiatives around the state, including Parsons to Davis and Wardensville to the Virginia line on Corridor H. It is also worth noting that the I-64 widening project from Nitro to Saint Albans has now been completed. During 2025, the WVDOH authorized a total of 1,758 highway and bridge construction projects statewide. Rugged mountainous terrain and numerous streams and rivers characterize the topography of the state and consequently, West Virginia's road system includes 7275 vehicular bridges, of which the WVDOH is responsible for 7163. The WVDOH's bridge program for this year, enhanced by an ongoing infusion of general obligation and turnpike bond sales proceeds, in conjunction with the traditional state-funded and federal-aid programs, allowed for 166 construction starts on bridge initiatives ranging from full replacement to deck overlays. WVDOH's resurfacing program consisted of 1103 projects, which addressed approximately 1606 miles of roadway.

State Park Enhancements

The West Virginia State Park system is a recognized leader in park systems in the United States and features a multitude of facilities and areas that include recreation services such as full-service restaurants, campgrounds, lodges, spas, golf courses, cabins, and conference centers. The park system is in 35 of West Virginia's 55 counties and is incredibly diverse in facilities and features. With 36 state parks, 9 state forests and 3 rail trails, our state park system of over 164,000 acres boasts iconic natural features such as Blackwater

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

Falls and The Bluestone gorge, as well as historic structures like the Blennerhassett Mansion and the Glade Creek Grist Mill.

Overall, facility inventory managed by the state park system includes 837 lodge rooms, 358 cabins, 1,546 campsites, 152 picnic shelters, 559 playground units, and over 700 miles of hiking trails. State Park facilities also include upwards of over 2,500,000 square feet of indoor space, in nearly 1,500 buildings.

Based upon the most recent economic impact study from FY2023, the park system is a strong foundation for the growing tourism industry as destination locations. According to the Outdoor Industry Association research, the outdoor recreation economy in West Virginia contributes 82,000 direct state jobs, resulting in \$2 billion in wages and salaries. Consumers spend \$7.6 billion annually on outdoor recreation.

Typically seeing about 10 million visitors per year, traffic counts for 2025, although down slightly from recent years, are continuing to trend similarly as in previous years. Visitation volume at West Virginia's state parks continues to be the busiest during the summer months. Year-to-date numbers, through the end of June 2025, are already nearing the 4 million visitor mark, with June 2025 alone seeing almost one-million visitors, system-wide.

Workers' Compensation Reforms

The Workers' Compensation program was privatized in 2006 from a monopolistic system to an open, competitive market. The transition has been hugely successful with 356 carriers filing to offer workers' compensation insurance to West Virginia policyholders. Since privatization, the workers' compensation market has experienced approximately \$501 million in premium savings after 21 consecutive loss cost decreases. The most recent decrease of 13.5% results in a cumulative 84.9% loss cost reduction from pre-reform workers' compensation levels. In addition to the voluntary market loss cost decreases, the assigned risk market is one of the lowest in the nation by policy count and has also had rate decreases over the last several years. This is a tremendous accomplishment for the State and is a testament to the hard work, cooperation, and partnerships of the Offices of the Insurance Commissioner, the National Council on Compensation Insurance, Inc. (NCCI), private carriers, and the employers of the State of West Virginia.

Prior to privatization, the unfunded liability for the former Workers' Compensation Fund exceeded \$3 billion. As of June 30, 2025, the Workers' Compensation Old Fund has a positive net balance of \$77 million. The significant reduction in the unfunded liability demonstrates West Virginia's focus on financial responsibility.

Environmental Protection Initiatives

In fiscal year 2025, the West Virginia Department of Environmental Protection's (WVDEP) Rehabilitation Environmental Action Plan (REAP) awarded 24 recycling assistance grants totaling \$1,857,502 to local governments and private and nonprofit organizations. The purpose of these grants is planning, initiating, expanding and upgrading recycling programs, providing related public education programs, and assisting in recycling market procurement efforts. Additional grants awarded by REAP include 8 covered electronic devices recycling grants totaling \$43,000 to conduct electronic collections events and programs; and 14 litter control grants totaling \$62,085.00 to initiate, continue or expand local litter control programs.

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

The Office of Abandoned Mine Lands and Reclamation (AMLR) completed 3 reclamation projects totaling \$2.97 million and 22 emergency projects totaling \$4.98 million. AMLR solicited bids for 3 waterline construction projects at a cost of \$3.6 million and 6 Abandoned Mine Land Economic Revitalization (AMLER) projects at a total cost of \$18.5 million. The waterline projects brought drinking water to citizens whose drinking water was affected by mining activity that occurred before enactment of the Federal Mining Act in 1977, which requires companies to reclaim the land when mining ceases. The AMLER program is intended to help fund projects in AMLR impacted areas that will promote economic revitalization of those areas.

Through the Drinking Water Treatment Revolving Fund, WVDEP disbursed more than \$40.6 million to communities for municipal sewer projects under construction. They also closed 27 new loans and amendments to drinking water projects that were worth \$171.1 million. There are currently 9 binding commitment letters and/or loan agreements that have been issued for additional projects worth \$26.2 million.

Through the Clean Water State Revolving Fund, WVDEP disbursed more than \$60.0 million to communities for municipal sewer projects under construction. They also disbursed \$100,000 to the onsite system loan program and closed 49 new loans and amendments to municipal construction projects that were worth \$146.7 million. There are currently 14 binding commitment letters and/or loan agreements that have been issued for additional projects worth \$303.2 million.

Long Term Financial Planning and Relevant Financial Policies

To continue disciplined financial management, the State adheres to certain financial policies and prepares a long-term financial plan.

Long-Term Financial Planning

The State's Six Year Financial Plan includes information on anticipated general and lottery funds revenues and expenditures over a six-year horizon with the goal of providing policymakers and citizens with a clear understanding of not only the current budget, but also the larger, long-term implications of budget decisions on the State's future fiscal outlook.

Financial Policies

Under current law, the State is required to deposit the first 50% of all surplus funds from the General Fund accrued during the fiscal year just ended into the Revenue Shortfall Reserve Fund A (Rainy Day Fund) until the aggregate amount of balance in the combined Revenue Shortfall Reserve Funds A and B equal at least 20% of the prior three-year average of total General Fund appropriations as stated in Title II, Section 1 of the approved budget bills for such years. For the fiscal year ending June 30, 2025, the 20% funding requirement was \$1,012,006,322, a smaller amount than the actual Rainy Day Fund balance total of \$1,347,437,136. Therefore, no additional funding contribution was required.

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

Strong Financial Performance

In 2025, the continued implementation of multi-year personal income tax rate reductions was the major factor in a General Revenue Fund decline of more than \$191 million or 3.3% from collections in the prior year. However, final collections were still nearly \$255 million ahead of official estimates.

Fiscal year 2025 surplus General Revenue appropriations included: a fiscal year 2025 General Revenue Budget Bill Surplus Section total of over \$114 million, 2024 1st Extraordinary Session surplus General Revenue supplemental appropriation reduction of -\$45 million, 2024 2nd Extraordinary Session surplus General Revenue supplemental appropriations of \$498 million, and \$55 million in surplus General Revenue supplemental appropriations passed during the 2025 Regular Session. These surplus General Revenue supplemental appropriations totaled \$622.3 million for FY2025.

After the Governor's veto, the Legislature's FY 2026 final approved budget includes FY2026 regular General Revenue appropriations of \$5.3 billion and an additional \$100 million in fiscal year 2026 General Revenue Surplus Section appropriations (based on FY 2025 Surplus General Revenue).

Conclusion

West Virginia continues to aggressively address the fiscal challenges associated with a changing economy. During fiscal year 2025, the State was able to manage its budgetary demands in a challenging economic environment. Governor Patrick Morrisey and the members of the State Legislature worked collaboratively to ensure that financial and strategic decisions were made for the betterment of the State's citizens so that programs and services continue to operate efficiently. Meanwhile, our State's leadership also maintains a competitive atmosphere for current and future businesses to ignite job growth.

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of West Virginia for its ACFR for the fiscal years ended June 30, 1997, through 2024. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to conform to Certificate of Achievement Program requirements. We are again submitting it to the GFOA for consideration.

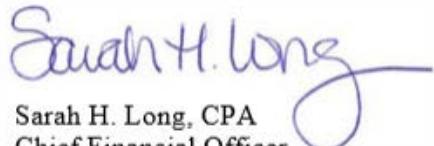

The Honorable Patrick Morrisey, Governor
The Honorable Members of the West Virginia Legislature
Citizens of the State of West Virginia
December 19, 2025

Acknowledgments

The annual budget document, prepared by the State Budget Office, provides additional information related to budget priorities and goals, including acknowledgement of significant accomplishments of various agency programs. The budget document has received the GFOA's Award for Distinguished Budget Presentation Program for the fiscal years 1997 through 2025 budgets.

The 2025 ACFR is an example of Governor Morrisey's unwavering belief in, and commitment to, the State's fiscal responsibility and accountability. Acknowledgment is given to the State Legislature and its leadership for their shared commitment to sound budgeting and to meeting the financial obligations of the State. This report would not be possible without the support of all West Virginia State agencies. The State's continued success directly depends on their cooperation and support.

Sincerely,

Sarah H. Long, CPA

INDEPENDENT AUDITORS' REPORT

The Honorable Patrick Morrisey, Governor
of the State of West Virginia

Report on the Audit of the Financial Statements

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of West Virginia (the State), as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents (collectively referred to as the "basic financial statements").

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State, as of June 30, 2025, and the respective changes in financial position, and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

We did not audit the financial statements of certain entities or funds of the State, which represent the indicated percent of total assets and deferred outflows of resources and total revenues are presented in the table below. Those financial statements were audited by other auditors, whose reports thereon have been furnished to us, and our opinions, insofar as it relates to the amounts included for those agencies and component units, is based solely on the reports of the other auditors.

Opinion Unit	Fund, Agency, Department, or Component Unit	Percentage Audited by Other Auditors	
		Assets and Deferred Outflows	Revenues
Governmental Activities	Government-Wide	90%	27%

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the State and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the State's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

The Honorable Patrick Morrisey, Governor
of the State of West Virginia

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the State's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of require that the management's discussion and analysis and required supplementary information as listed in the accompanying table of contents (collectively referred to as RSI) be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context.

We have applied certain limited procedures to the required supplementary information in accordance with GAAS, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

The Honorable Patrick Morrisey, Governor
of the State of West Virginia

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The combining and individual nonmajor fund financial statements, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with GAAS by us and other auditors. In our opinion, the combining financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the introductory and statistical sections but does not include the basic financial statements and our auditors' report thereon. Our opinions on the basic financial statements do not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the basic financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the basic financial statements, or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

MANAGEMENT'S DISCUSSION AND ANALYSIS

This section of the State of West Virginia's (the State) Annual Comprehensive Financial Report presents management's discussion and analysis of the State's financial performance during the fiscal year ended June 30, 2025. Please read it in conjunction with the transmittal letter in the Introductory Section of this report and the State's financial statements, which follow this section.

FINANCIAL HIGHLIGHTS

Government-wide

The assets and deferred outflows of resources of the primary government exceeded its liabilities and deferred inflows of resources at the close of the fiscal year by \$16.9 billion, reported as net position. Governmental activities reported \$13.8 billion in net position, a \$436 million increase, up 3% from last year, while the business-type activities reported net position of \$3 billion, an \$413 million increase.

Fund Level

At year-end, the governmental funds reported combined fund balances of \$6 billion, a decrease of \$925 million, or 13.4% lower than the prior year. The unrestricted fund balance, including the committed, assigned, and unassigned balances, was \$4.3 billion. The nonspendable balance was \$148 million, and \$1.5 billion was restricted to capital projects, debt service, general government operations, development, tourism and recreation, education, health and social services, public protection, and transportation.

Long-Term Obligations

There was a net increase in the State's long-term obligations of \$670 million. The Governmental Activities increased by \$792 million and the Business-type Activities decreased by \$121 million. The net increase of \$669 million primarily consisted of an increase in accrued and other liabilities in the amount of \$1.4 billion, a decrease in net pension liability of \$434 million, and a decrease in payments on bonds, other financing debt, and notes payable in the amount of \$232 million. The increase in accrued and other liabilities is related to a net increase in Medicaid of \$1.2 billion and an increase of \$160 million in tax refunds.

The insurance and compensation benefits liability decreased \$107 million. The decrease consisted of an \$36 million decrease at the Public Employee Insurance Agency (PEIA) due to the reduction in Incurred But Not Reported (IBNR) claims expense and a \$64 million decrease at the Offices of the Insurance Commissioner due to a decrease in the claims liability See Note 15 for a more detailed explanation about risk management. See Notes 10, 11 and 12 for more information relating to bonds, other financing debt, notes payable, right-to-use leases, and subscription based arrangements.

OVERVIEW OF THE FINANCIAL STATEMENTS

This discussion and analysis is intended to serve as an introduction to the State of West Virginia's basic financial statements. The basic financial statements include the government-wide financial statements, fund financial statements, and notes to the financial statements.

The basic financial statements include two kinds of statements that present different views of the State. The statement of net position and the related statement of activities are *government-wide financial statements* that provide both long-term and short-term information about the State's overall financial status. The remaining statements are *fund financial statements* that focus on individual parts of the State's government, reporting the State's operations in more detail than the government-wide statements. The financial statements also include *notes* that explain some of the information in the financial statements and provide more detailed data. The statements are followed by a section of *required supplementary information* that presents budgetary comparisons, pension plans, and Other Postemployment Benefits (OPEB) plan information as required by the Governmental Accounting Standards Board (GASB). In addition to these required elements, we have included a *combining financial statements and schedules* section that provides more details about our nonmajor governmental funds, nonmajor proprietary funds, fiduciary funds, and nonmajor discretely presented component units.

Government-wide Statements (Reporting the State as a Whole)

The statement of net position and the statement of activities together comprise the government-wide statements, which report information about the State as a whole using the full accrual basis of accounting, similar to those used by private-sector companies. This means all revenues and expenses are recognized regardless of whether cash has been received or paid, and all assets, deferred outflows of resources, liabilities, and deferred inflows of resources, including capital assets and long-term debt, are reported at the entity level.

The government-wide statements report the State's net position, the difference between total assets and deferred outflows of resources and total liabilities and deferred inflows of resources, and how they have changed from the prior year. In evaluating the State's overall condition, additional nonfinancial factors should be considered, such as the State's economic outlook, changes in its demographics, and the condition of its capital assets, including infrastructure.

The activities on the government-wide financial statements are divided into three categories:

- *Governmental activities* – Most of the State's basic services are included under these activities, such as education, health, health facilities, and human services, military affairs and public safety, judicial, and administration. Personal income taxes and consumer sales taxes finance most of these activities.
- *Business-type activities* – The State charges fees to customers to help it cover all or a significant portion of the costs of certain services it provides. The West

Virginia Public Employees Insurance Agency and BRIM, among other funds, are examples of these activities.

- *Component units* – The State includes several other entities in its report for which it is financially accountable, such as the West Virginia Housing Development Authority, Lottery, Parkways Authority, and Higher Education. Separately issued financial statements are also available for these component units.

Fund Financial Statements

The fund financial statements provide more detailed information about the State's *major funds*, not the State as a whole. Funds are accounting devices that the State uses to track specific sources of funding and spending for particular purposes. Certain funds are required by the West Virginia Constitution, and others are required by bond covenants. The State Legislature establishes other funds to control and manage money for particular purposes or to show that certain taxes and grants are used properly.

The State has three kinds of funds:

- *Governmental funds* – Most of the State's basic services are included in governmental funds, which focus on (1) *cash and other financial assets* that may readily be converted to cash flow in and out and (2) the balances left at year-end available for spending. Consequently, the governmental funds statements provide a detailed *short-term* view to help determine whether there are more or fewer financial resources that may be spent in the near future to finance the State's programs. Because this information does not encompass the additional long-term focus of the government-wide statements, we provide additional information on the pages immediately following each statement, explaining the relationship (or differences) between them and the government-wide statements.
- *Proprietary funds* – Proprietary funds include enterprise funds and internal service funds. They account for state activities that are operated in a manner similar to private-sector businesses. Like the government-wide statements, proprietary fund statements are presented using the accrual basis of accounting and provide both long- and short-term financial information. Services for which the State charges external customers a fee are generally reported in enterprise funds. Activities where customers are mostly other state agencies are accounted for in internal service funds. The internal service funds are consolidated with the governmental activities on the government-wide statements because they predominantly benefit the governmental rather than business-type activities.
- *Fiduciary funds* – Fiduciary funds account for assets held for the benefit of parties outside of state government. The State is the trustee, or *fiduciary*, for its employees' pension plans and other assets that, because of a trust arrangement, can be used only for the trust beneficiaries. Fiduciary funds are comprised of pension (and other employee benefit) trust funds, investment trust funds, private-purpose trust funds, and custodial funds. The State is responsible for

ensuring that the assets reported in these funds are used for their intended purposes. All of the State's fiduciary activities are reported in a separate statement of fiduciary net position and a statement of changes in fiduciary net position, where applicable. These funds are excluded from the State's government-wide financial statements because the State cannot use these assets to finance its operations.

Reconciliation Between Government-wide and Fund Statements

The financial statements contain schedules that reconcile the differences between the government-wide financial statements (long-term focus, accrual accounting) and the fund financial statements (short-term focus, modified accrual accounting). The following summarizes the primary differences between modified accrual to accrual accounting:

- Capital assets and long-term debt are included on the government-wide statements but are not reported on the governmental fund statements.
- Capital outlay spending results in expenditures on the governmental fund statements; however, on the statement of activities, the cost of capital assets is allocated over their useful lives as depreciation expense. The excess of capital outlay over depreciation expense is included on the government-wide statement of activities.
- Repayment of long-term debt is reported as an expenditure in the governmental funds, but the repayment reduces the long-term liabilities on the government-wide statement of net position.
- Internal service funds are used by management to charge the costs of certain activities to individual funds. The assets, deferred outflow of resources, liabilities, deferred inflows of resources, and net revenue of the internal service funds are reported with governmental activities on the government-wide statements.
- Certain tax revenues that are earned, but not available, are reported as revenue on the government-wide statements but are deferred inflows of resources on the governmental fund statements.
- Some revenues and expenses reported in the statement of activities do not provide or require the use of current financial resources and, therefore, are not reported as revenues and expenditures in the funds.
- Net pension and OPEB liabilities or assets, along with related deferrals, are reported on the government-wide statements but not reported in the funds.

Notes to the Financial Statements

The notes provide additional schedules and information that are essential to a complete understanding of the financial statements. The notes apply to both the government-wide financial statements and the fund financial statements.

Required Supplementary Information

Following the basic financial statements is the required supplementary information related to budgetary comparison schedules for the governmental funds, with legally adopted annual budgets, pension plans, and OPEB plan information, along with notes with explanatory information.

Combining Financial Statements and Schedules

The combining financial statements and schedules include combining statements for the State's nonmajor governmental funds, nonmajor proprietary funds, fiduciary funds, and nonmajor discretely presented component units.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

The chart below represents financial information derived from the government-wide statement of activities and reflects the State's net position as of June 30, 2025 and 2024 (expressed in thousands):

**Net Position as of June 30
(Expressed in Thousands)**

	Governmental Activities		Business-type Activities		Total Primary Government	
	2025	2024	2025	2024	2025	2024
Current and Other Assets	\$ 10,468,556	\$ 10,137,434	\$ 4,605,156	\$ 4,367,871	\$ 15,073,712	\$ 14,505,305
Capital Assets	12,019,277	11,570,275	2,230	2,527	12,021,507	11,572,802
Total Assets	22,487,833	21,707,709	4,607,386	4,370,398	27,095,219	26,078,107
Deferred Outflows of Resources	1,227,083	1,043,528	2,592	2,901	1,229,675	1,046,429
Current and Other Liabilities	3,798,011	2,801,934	393,536	493,223	4,191,547	3,295,157
Long-term Liabilities	5,479,613	5,836,608	1,166,538	1,247,619	6,646,151	7,084,227
Total Liabilities	9,277,624	8,638,542	1,560,074	1,740,842	10,837,698	10,379,384
Deferred Inflows of Resources	592,519	264,932	5,788	987	598,307	265,919
Net Position						
Net Investment in Capital Assets	10,492,654	10,027,422	2,231	2,527	10,494,885	10,029,949
Restricted	1,323,294	1,416,217	2,741,286	2,403,762	4,064,580	3,819,979
Unrestricted	2,028,825	2,404,124	300,599	225,181	2,329,424	2,629,305
Total Net Position	\$ 13,844,773	\$ 13,847,763	\$ 3,044,116	\$ 2,631,470	\$ 16,888,889	\$ 16,479,233

Comparing June 30, 2025 to June 30, 2024, government-wide balances, current and other assets increased \$414 million due to a \$98 million increase in agency funds in the Consolidated Investment Pool and an \$80 million increase in the Wildlife Endowment Fund. Current and other liabilities increased \$1.2 billion due to a significant increase in the Medicaid liability.

Long-term liabilities decreased \$891 million due to the change from a liability to an asset in FY 24 for both pension and OPEB and a decrease in bond payments of \$219 million. Significant changes in capital assets and long-term liabilities are discussed later in this Management's Discussion and Analysis.

Deferred Inflows increased by \$183 million primarily due to changes in actuarial assumptions and methodology for pension and OPEB.

The State's combined net position, governmental and business-type, increased \$849 million over the course of this fiscal year's operations. The net position of the governmental activities increased \$436 million, and the net position of the business-type activities increased \$413 million. The increase in net position is due to the changes in net position described on the following pages.

Net Position

The largest component of the State's net position is the amount invested in capital assets (e.g., land, buildings, equipment, infrastructure, and others), less any related debt outstanding needed to acquire or construct the assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt also should be included in this component of net position. Capital assets are used to provide services to citizens; therefore, they are not available for future spending or to pay off their related liabilities.

Restricted net position composes 25% of total net position and is subject to constitutional, legal, or external constraints on how it can be used. Net position that is restricted include funds for construction projects, debt service, lending activities, insurance activities, transportation, public protection, and economic development and tourism programs of the State.

Changes in Net Position

The chart below represents financial information derived from the government-wide statement of activities and reflects the State's total revenues, expenses, and changes in net position for the years ended June 30, 2025 and 2024 (expressed in thousands):

Governmental Activities

For the year ended June 30, 2025, the State's change in net position before transfers decreased by \$359 million for governmental activities. Revenues increased by \$908 million, and expenses were also higher by \$1.3 billion comparing the years ended June 30, 2025 and 2024.

The revenue increase is primarily due to the increase in operating grants and contributions of \$921 million related to grants and activities in the Department of Health and Human Resources.

Overall, tax revenue across all tax types increased \$23 million. Personal income tax revenue decreased by \$114 million due a series of tax cuts including a small portion of the 21.25% rate cut enacted in 2023, additional rate cuts equaling 5.9% enacted to begin in 2025 and new tax credits for personal property taxes. The Business tax increase of \$79 million was led by a rebound in severance tax due to higher natural gas prices and strong growth in insurance premium taxes due to above normal inflationary growth in premiums on homes and cars. Consumer sales tax revenue increased by \$47 million growth of less than 2.4% which was slightly below inflation growth with inflation accounting for the increase in yield.

Other revenue decreased \$321 million. This was attributed primarily to a decrease in investment earnings of \$23 million due to declining short-term interest rates. Also, intergovernmental revenue for the Department of Transportation decreased by \$150 million related to receiving a transfer in the prior fiscal year.

Program expenses increased approximately \$1.3 billion in total.

- Department of Health, Health Facilities and Human Services expenses increased by \$1.3 billion due to increases in professional services, food products, medical supplies, medical service payments and expenses related to grants.
- Education expenses were down \$500 million primarily due to a decrease in rent for buildings, advertising and promotional expense, and software licenses.
- Executive expenses increased by \$215 million primarily due to an increase in contractual and professional services, computer services and fire/auto/bond and other insurance.
- Regulatory Boards and Commissions expenses also increased by \$115 million due to decreases in program expenditures.
- Several other agencies had across the board increased costs related to personnel services and health insurance related to increases in the Public Employees Insurance Agency premiums for state employees.

The charts on the next pages depict revenues and expenses, respectively, of the governmental activities for the fiscal year. Approximately 34% of the total revenues came from personal income, consumer sales, business taxes, transportation, and other taxes, while 51% was in the form of grants and contributions (see Chart A). The State's governmental activities expenses include 52% for health and human resources and 19% for education (see Chart B).

Chart A

2025 Source of Revenue - Governmental Activities

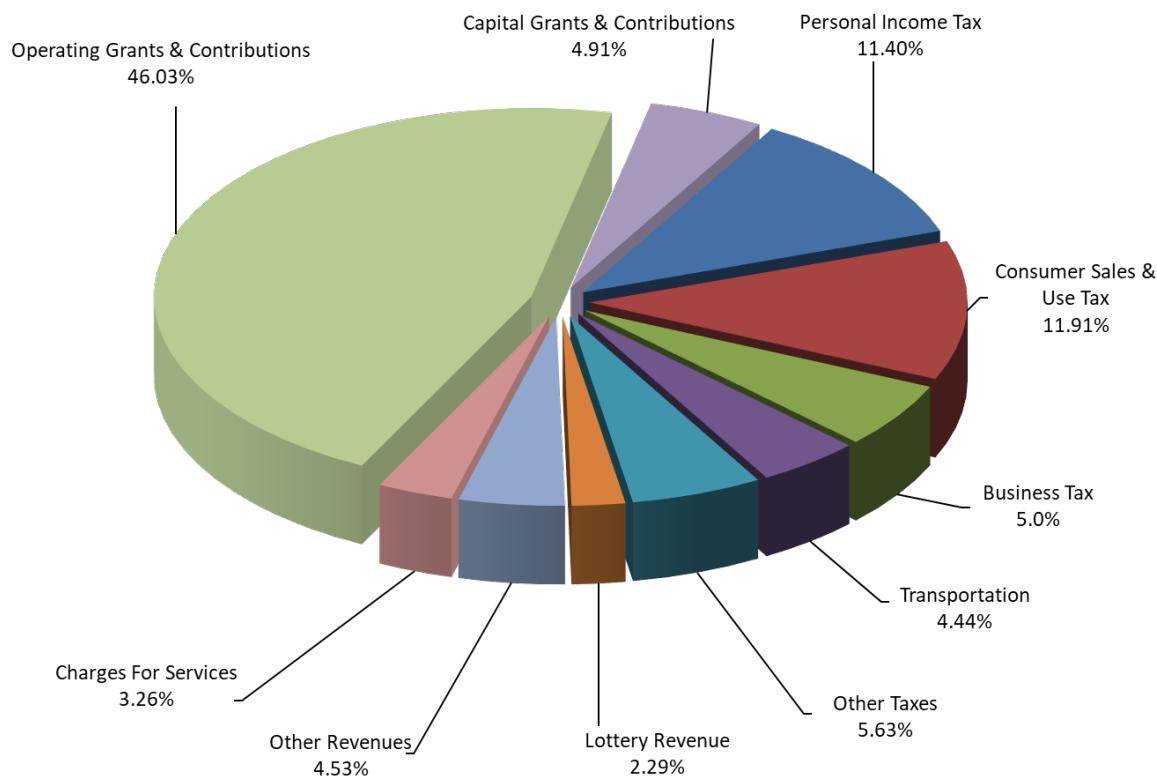

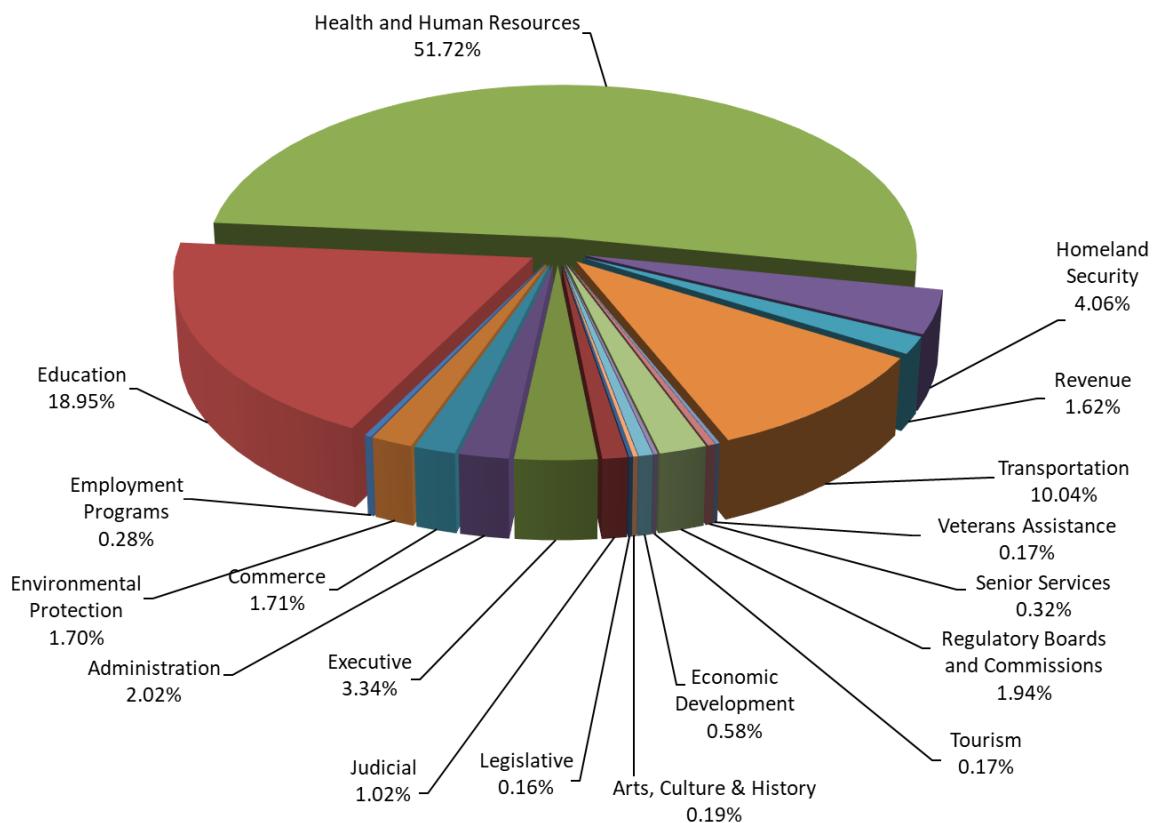

Chart B

2025 Functional Expenses - Governmental Activities

Business-type Activities

For the year ended June 30, 2025, business-type change in net position after transfers increased by \$234 million. Revenues increased by \$172 million and expenses decreased by \$48 million with transfers increasing by \$15 million comparing the years ended June 30, 2025 and 2024. Significant contributors to these changes were:

- Premium revenue increased \$152 million due the implementation of the 10-14% premium increase to employees participating in the Public Employees Insurance Agency (PEIA). BRIM also saw their premium revenue increase \$7.9 million due to BRIM increasing their premium rates to help cover increases in projected claims losses.
- Other revenue increased by \$20 million due to investment earnings increasing due to overall market performance.
- Overall expenses decreased by \$47 million. This is primarily due to a decrease in medical claims expense for PEIA. Also, the Workers' Compensation Fund attributable to the decrease in outstanding claims liabilities totaling \$32 million.
- Transfers increased by \$15 million primarily due to additional grants and matching funds for the Water Pollution Control Revolving Fund.

FINANCIAL ANALYSIS OF THE STATE'S FUNDS

Governmental Funds

The focus of the State's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the State's financing requirements.

At the end of the current fiscal year, the State's governmental funds reported a fund balance of \$6 billion, a decrease of \$860 million in comparison to that of the prior year.

There was a net increase in revenue of \$686 million. This was a result of a number of factors. General fund revenue increased by \$970 million. This is primarily due to intergovernmental revenue increasing \$851 million. Total tax revenues increased by \$84 million in Consumer sales and Severance taxes. Expenses were up by \$924 million related to increases in the Department of Health and Human Resource spending.

Governmental Fund Balances at June 30, 2025
(Expressed in Thousands)

	General Fund	Transportation	Tobacco Settlement Finance Authority	State Road	Other Governmental Funds	Total
Nonspendable	\$ 56,863	\$ 90,099	\$ —	\$ —	\$ 1,003	\$ 147,965
Restricted	18,053	317,971	443,853	512,450	224,588	1,516,915
Unrestricted						
Committed	77,495	—	—	—	400,463	477,958
Assigned	14,264	240,931	—	—	8,130	263,325
Unassigned	3,565,742	—	—	—	—	3,565,742
Total	<u>\$ 3,732,417</u>	<u>\$ 649,001</u>	<u>\$ 443,853</u>	<u>\$ 512,450</u>	<u>\$ 634,184</u>	<u>\$ 5,971,905</u>

The General Fund is the chief operating fund of the State. As a measure of the General Fund's liquidity, it may be useful to compare both unassigned fund balance and total fund balance to total fund expenditures. Unassigned fund balance represents 24% of total General Fund expenditures, while total fund balance represents 25% of the same amount.

Cash and cash equivalents in the General Fund were down \$629 million, primarily due to decreased federal funding. General fund revenues increased in fiscal year 2025 from 2024 by \$970 million. This increase is due primarily to a decrease in investment earnings of \$23 million and intergovernmental revenue increasing by \$851 million. Tax revenue increased by \$74 million. Revenues were \$425 million less than expenditures. Expenses for the General Fund also increased by \$924 million, with the majority of the increase relating to activities in the Department of Health and Human Resources.

At June 30, 2025, Transportation's total fund balance decreased by approximately \$254 million from 2024 as there were more road projects in 2024.

The Tobacco Settlement Finance Authority's fund balance decreased by \$19 million, primarily due to the amortization of deferred tobacco revenue.

State Road fund balance decreased by \$168 million due to construction expenses related to the Roads to Prosperity initiative which are funded by General Obligation bonds.

At year-end, nonmajor governmental funds had a net decrease in fund balance of approximately \$8 million. Restricted fund balance is \$224 million, of which \$12 million was available for debt service; \$15 million to fund capital projects; \$79 million for development, tourism and recreation; \$353 thousand for education; and \$117 million for

public protection. Committed fund balance is \$400 million, \$8 million for general government operations, and \$393 million for public protection.

Proprietary Funds

The State's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail. Proprietary funds are composed of enterprise and internal service funds. Enterprise funds are used when services the State provides are charged to external customers. Internal service funds are used when services are provided to other state agencies. The six major enterprise funds include the Water Pollution Control Revolving Fund, Workers' Compensation Fund, Unemployment Compensation, West Virginia Infrastructure and Jobs Development Council, Public Employees Insurance Agency, and the Board of Risk and Insurance Management.

Other factors concerning the finances of the major enterprise funds have already been addressed in the discussion of business-type activities.

GENERAL REVENUE FUND BUDGETARY HIGHLIGHTS

The final amended budget revenues were higher than the amount originally anticipated. The general revenue fund budget to actual overall revenue variance was \$255 million due to changes in revenue collection in several tax categories and other revenues. Personal income taxes increased \$103 million, corporate income/business franchise taxes increased by \$58 million, and severance tax increased \$33 million.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

At the end of 2025, the State had invested \$12 billion, net of accumulated depreciation, in a broad range of capital assets shown below. Depreciation and amortization expense for the year totaled \$436 million.

Capital Assets at June 30, 2025
(Expressed in Thousands)

	Governmental Activities		Business-type Activities		Total Primary Government	
	2025	2024	2025	2024	2025	2024

Construction in Progress	2,774,266	2,573,919	—	—	2,774,266	2,573,919
Infrastructure	6,220,712	6,005,961	—	—	6,220,712	6,005,961
Totals, Net of Accumulated Depreciation	<u>\$ 12,019,277</u>	<u>\$ 11,570,275</u>	<u>\$ 2,230</u>	<u>\$ 2,363</u>	<u>\$ 12,021,507</u>	<u>\$ 11,572,638</u>

The total increase, net of disposals, accumulated depreciation, and accumulated amortization, in the State's net investment in capital assets for the current fiscal year, approximated \$449 million. The most significant changes in capital assets during the year were in the Transportation and Commerce functions. Transportation continues to expand the state road system, focusing primarily on upgrading existing roadways and completing the Appalachian Highway Corridor.

The \$200 million increase in construction in progress is due to increased projects in Transportation. Transportation saw an increase of \$730 million related to the acquisition of right of way and construction of roads and bridges. There were \$522 million completed infrastructure projects for road and bridges that were taken out of the construction in progress account and placed into service during the fiscal year.

Long-Term Debt

At year-end, the State had \$9.5 billion in bonds, other financing debt, notes payable, claims and judgments, compensated absences, right-to-use lease liability, subscription liability, net pension and OPEB liability, and other long-term obligations outstanding, as shown in the following table. The State's general obligation bonds are rated AA by Fitch

West Virginia

Investors Service, Moody's Investors Service rating is Aa2, and Standard & Poor's Corporation have an AA- rating.

The State's general obligation debt must be authorized by constitutional amendment. A proposed amendment must be approved by two-thirds of both the Senate and the House of Delegates before it can be ratified or rejected by the voters. Once the amendment has voter approval, the Legislature must pass specific legislation authorizing the issuance of the general obligation debt. Revenue bonds are issued pursuant to specific statutory provisions enacted by the Legislature primarily for the purpose of financing capital construction. Neither the West Virginia Constitution nor its statutes establish a general limit on any type of debt, although certain agencies have debt limits in their specific Code sections.

Outstanding Debt at June 30 (Expressed in Thousands)

	Governmental Activities		Business-type Activities		Total Primary Government	
	2025	2024	2025	2024	2025	2024

Subscription Liability-SBITA	15,680	20,677	—	—	15,680	20,677
Net Pension Liability	1,758,458	2,192,322	—	—	1,758,458	2,192,322
Net OPEB Liability	—	—	—	—	—	—
Totals	\$ 8,003,073	\$ 7,210,082	\$ 1,493,675	\$ 1,615,119	\$ 9,496,748	\$ 8,825,201

In FY 25, no new debt was issued. The decrease in general obligation and revenue bonds was due to debt service payments. Net Pension Liability decreased by \$434 million primarily due to difference between expected and actual experience for the plans. The retirement system investment assumption that the State would receive a 7.5% return on invested assets was in line with the overall market return in the current fiscal year.

ECONOMIC FACTORS AND NEXT YEAR'S BUDGET

The general revenue estimate for FY 2026 is projected to be \$5.32 billion. Our current FY 2025 General Revenue actual collections are projected to be more than the official revenue estimate by as much as \$254 million. The Lottery Funds' actual revenue

collections for FY 2025 were more than their original estimates. Lottery revenues are projected to remain flat in FY 2026 and remain that way through FY 2030.

The budget for FY 2026 includes significant expenditure decreases for executive, commerce, education and veterans assistance. The decrease in expenditures is consistent with the commitment to provide a balanced budget and long-term fiscal stability.

CONTACTING THE STATES FINANCIAL MANAGEMENT

This financial report is designed to provide our citizens, taxpayers, customers, investors, and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. If you have any questions about this report or need additional financial information, contact the Financial Accounting and Reporting Section, 2101 Washington St. East, Building 17, 3rd Floor, Charleston, WV 25305.

GOVERNMENTAL FUNDS

FINANCIAL STATEMENTS

Major Funds

General: This Fund is used as the State's operating fund. It accounts for the financial resources and transactions that are not accounted for in other funds. The revenues are from taxes and other general revenues.

Transportation: The governmental fund types of the Department of Transportation (Transportation) are included in this Fund. The Division of Highways has statutory responsibility for the construction, maintenance, and improvement of all state roads. Transportation expenditures funded by registration fees, license fees, and automobile privilege taxes (fees and taxes) are recorded in the State Road Fund within the Division of Highways. These fees and taxes, among other revenue sources, are collected by the Division of Motor Vehicles, which is also in Transportation.

The Tobacco Settlement Finance Authority: The Authority was created to issue revenue bonds related to the State's portion of the tobacco receipts from the Master Settlement Agreement between tobacco manufacturers and the covered states. The revenue bonds were sold June 26, 2007. See Note 10 for more information.

State Road: This constitutionally established Fund is operated within the Department of Transportation. Certain taxes, fees, and other revenue sources are expended for the construction and maintenance of roads.

Nonmajor governmental funds are presented, by fund type, beginning on page 241.

Reconciliation of the Governmental Funds
Balance Sheet to the Statement of Net Position
June 30, 2025
(Expressed in Thousands)

Total Fund Balances - Governmental Funds	\$ 5,971,905
Amounts reported for governmental activities in the statement of net position are different because:	
Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds. These assets (excluding Internal Service Funds) consist of:	
Land	\$ 1,562,844
Construction-in-Progress	2,727,761
Infrastructure Assets	15,236,422
Buildings, Equipment, and Other Depreciable Assets	2,246,289
Right-to-Use Assets - Buildings	151,312
Subscription Asset, SBITA	22,870
Intangibles	52,858
Accumulated Depreciation	<u>(10,340,103)</u>
Total Capital Assets	11,660,253
The Net Pension Asset is not recognized at the fund level.	271,640
The Net OPEB Asset is not recognized at the fund level.	33,799
Certain tax and other revenues are earned but not available and therefore are deferred inflows of resources in the funds.	210,896
Deferred inflows of resources for pensions and OPEB (excluding Internal Service Funds) are reported in the statement of net position but not reported in the funds.	(589,851)
Internal Service Funds are used by management to charge the costs of certain activities, such as building rental and information services, to individual funds. The assets and liabilities of the Internal Service Funds are included in governmental activities in the statement of net position.	379,581
Bonds issued by the State have associated costs that are paid from current available financial resources in the funds. However, these costs are amortized over the life of the bonds in the statement of net position.	71
Deferred outflows of resources for pensions, OPEB, and loss on bond refundings (excluding Internal Service Funds) are reported in the statement of net position but not reported in the funds.	1,221,959
Some liabilities are not due and payable in the current period and therefore are not reported in the funds. These liabilities (excluding Internal Service Funds) consist of:	
General Obligation Bonds	(1,685,225)
Revenue Bonds	(1,060,527)
Other Financing Debt	(77,649)
Right-to-Use Lease Liability	(103,360)
Subscription Liability, SBITA	(10,468)
Compensated Absences	(178,398)
Net Pension Liability	(1,758,458)
Accrued Interest Payable and Other Liabilities	<u>(441,395)</u>
Total Long-Term Liabilities	<u>(5,315,480)</u>
Net Position of Governmental Activities	<u>\$ 13,844,773</u>

The accompanying notes are an integral part of the financial statements.

The accompanying notes are an integral part of the financial statements.

**Reconciliation of the Statement of Revenues,
Expenditures, and Changes in Fund Balances –
Governmental Funds to the Statement of Activities
For the Fiscal Year Ended June 30, 2025
(Expressed in Thousands)**

Net Change in Fund Balances - Total Governmental Funds	\$	(924,940)
Amounts reported for governmental activities in the statement of activities are different because:		
Capital outlays are reported as expenditures in governmental funds. However, in the statement of activities, the cost of capital assets is allocated over their estimated useful lives as depreciation expense. In the current period, these amounts are:		
Capital Outlay	\$	825,577
Depreciation Expense		(399,564)
Excess of Capital Outlay Over Depreciation Expense		426,013
Accretion of interest related to capital appreciation bonds is an expense of the governmental activities.		
Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net position. For the current year, these amounts consist of:		
Bond Principal Retirement		15,605
Other Financing Debt Payments		195,290
Total Long-Term Debt Repayment		210,895
Internal Service Funds are used by management to charge the costs of certain activities, such as building and vehicle maintenance and leasing, data processing, and investment and management of state monies, to individual funds. The change in net position of the Internal Service Funds is reported with governmental activities.		
		44,676
Revenues in the statement of activities that do provide current financial resources are not reported as revenues in the funds.		67,730
Loss on issuance of new refunding bonds in the current fiscal year but was deferred on the statement of activities.		
Retirement contributions (excluding Internal Service Funds) to defined benefit pension plans in the current fiscal year are not included on the statement of activities.		525,818
OPEB contributions (excluding Internal Service Funds) to defined benefit OPEB plan in the current fiscal year are not included on the statement of activities.		
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds. These activities consist of:		
Decrease of Accrued Interest (Asset)		(9)
Decrease of Compensated Absences		(76,523)
Increase in Right-to-Use Lease Liability		(3,093)
Increase in SBITA Liability		1,960
Decrease of Accrued and Other Liabilities		(79,976)
Decrease of Net Pension Liability (Asset), net of deferrals		(358,228)
Increase of Net OPEB Liability (Asset), net of deferrals		289,106
Amortization of Bond Premiums/Discounts		24,523
Change in Accounting Principle		(67,575)
Total Change in Expenditures		(269,815)
Change in Net Position of Governmental Activities	\$	64,585

The accompanying notes are an integral part of the financial statements.

PROPRIETARY FUNDS

FINANCIAL STATEMENTS

Major Funds

Water Pollution Control Revolving Fund (Water Pollution): This fund was established to provide low-interest loans to communities that need to upgrade an existing waste water system, establish a new utility, or clean up the State's water supply. Water Pollution is to remain in perpetuity by recirculating the principal and interest earned from the loans.

Workers' Compensation Fund: On December 31, 2005, the Workers' Compensation Commission (WCC) ceased to exist as a separate state entity. The WCC's regulatory powers transferred to the Offices of the Insurance Commissioner, along with the residual assets and liabilities of the former WCC. Disbursements from the State's Workers' Compensation Fund are related to the liabilities and appropriate administrative expenses necessary for the administration of all claims, actual and incurred but not reported, for any claim with a date of injury on or before June 30, 2005.

Unemployment Compensation: The Fund is administered by the Bureau of Employment Programs doing business as WORKFORCE West Virginia. The Fund receives contributions from employers and provides for the payment of benefits to eligible unemployed workers under provisions of the Federal Unemployment Tax Act.

West Virginia Infrastructure and Jobs Development Council: The Council coordinates the review and funding of water, wastewater, and economic development projects in the State. The proceeds from the Council's bond programs provide financial assistance to infrastructure and economic development projects throughout the State. The primary source of repayment for the revenue and refunding bonds is the receipt of payments of principal and interest on a set of loans, known as defined loans, previously made to projects from general obligation and revenue bond proceeds.

Public Employees Insurance Agency: The Agency, a public entity risk pool, is responsible for providing health and life insurance to current and retired state and county employees. The Agency, empowered to set the premium rates charged to its participants, utilizes a third-party administrator to process claims and make payments to medical providers on a cost reimbursement basis.

Board of Risk and Insurance Management: The Board, a public entity risk pool, is responsible for the self-insurance of all state buildings, automobiles, and legal and civil actions, as well as insuring various county and local governments and charitable organizations. The Board is funded from the premiums assessed to the insured organizations.

Nonmajor proprietary funds are presented beginning on page 257.

FIDUCIARY FUNDS

FINANCIAL STATEMENTS

Private Purpose Trust Fund: This fund type is used to report a trust arrangement under which principal and income benefit individuals.

SMART 529: The West Virginia College Savings Program (the Program) operates under the West Virginia State Code Chapter 18, Article 30, and is administered by the Board of Trustees of the West Virginia College and Jumpstart Savings Programs. All funds paid into or invested through the Program will be available for use at any two-year or four-year college or university in the country, with refund and transfer options available. Since the Program is an Internal Revenue Service Section 529 Qualified State Tuition Program, earnings on the funds are federally tax deferred until used for college.

The individual Pension and Other Employee Benefit Trust Funds, Investment Trust Funds, and Custodial Funds descriptions and financial statements begin on page 264.

DISCRETELY PRESENTED COMPONENT UNITS FINANCIAL STATEMENTS

Major Component Units

West Virginia Lottery: The West Virginia Lottery's responsibilities include the distribution and sale of lottery tickets and the awarding of prizes. The West Virginia Lottery has a duty to establish rules for conducting games, to select the type and number of gaming systems or games, and to enter into contracts and agreements to operate in a highly efficient manner. The Lottery derives its revenues from instant, online, video-type games, and table games. To the extent available, remaining net profits are to be distributed to the State and local governments as required by law.

Economic Development Authority: The Authority, responsible for developing and advancing the business prosperity and economic welfare of the State, is authorized to make loans and enter into direct financing and right-to-use leases with industrial development agencies for the promotion and retention of new and existing commercial and industrial development. The Authority is empowered to borrow money and issue bonds, notes, commercial paper, and other debt instruments to furnish money for the enhancement of business development projects, and additionally maintains the discretionary ability to set loan terms and interest rates.

Housing Development Fund: The Fund is responsible for providing residential housing programs for low- and moderate income families, elderly persons, and other eligible persons and families, as well as financing certain nonresidential projects. The Fund is empowered to issue bonds payable from mortgage payments and to issue general obligation bonds payable from other assets. The bonds of the Housing Development Fund do not constitute the debt of the State.

Parkways Authority: The Authority is responsible for the operation and maintenance of the State's turnpike and economic development and tourism projects approved by the Department of Transportation. The Authority is empowered to issue Parkway revenue refunding bonds and set rates for crossing the turnpike. The State has discretionary authority to reappropriate any surplus from the Authority.

Water Development Authority: The Authority is responsible for assisting in the preservation, protection, improvement, and management of the State's water resources. The Authority oversees a loan pool program which provides low-interest financing to local governments for water and wastewater projects. The Authority issues bonds to fund the loan pool and uses the proceeds to purchase local government revenue bonds. The revenue bonds are payable solely from the revenues of the projects.

West Virginia Higher Education Fund: The Fund is responsible for providing the delivery of postsecondary education, which is competitive, affordable, and has the capacity to deliver the programs and services necessary to meet the regional and statewide needs of young people and working-age adults. The focus and collaboration of the institutions within the Fund are to create a system of higher education that is equipped to increase the competitiveness and to diversify and to expand the State's workforce by increasing the number of postsecondary degrees. The Fund obtains revenues from state and federal student aid programs; tuition and fees; state and federal appropriations; sales and services of educational activities and auxiliary enterprises; federal, state, local, and nongovernmental grants and contracts; and gifts and contributions.

West Virginia Division of Corrections and Rehabilitation: The Division has statutory responsibility for the establishment and operation of correctional facilities, juvenile services, and regional jails in the State and the acquisition, construction, and renovation of those facilities for prisoner confinement. The Division has program revenues that consist of charges for incarceration of inmates.

School Building Authority: The Authority's responsibilities include providing state funds for the acquisition and construction of elementary and secondary public school facilities in order to satisfy the educational needs of the State's citizens in an efficient and economical manner. The Authority's programs are designed to provide modern, efficient public school facilities throughout the State by promoting the consolidation of elementary and secondary public schools, enabling the State to more efficiently utilize its educational resources.

Nonmajor component units are presented beginning on page 278.

**STATE OF WEST VIRGINIA
NOTES TO THE FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2025**

NOTE 1

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The State of West Virginia (the State) is governed by elected officials. These financial statements present the State (the primary government) and its component units. The component units discussed below are included in the State's reporting entity because of the significance of their operational or financial relationships with the State.

Individual Component Unit Disclosures

United States generally accepted accounting principles (GAAP) define component units as those entities which are legally separate organizations for which the State's elected officials are financially accountable, or other organizations for which the nature and significance of their relationship with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete. GAAP specifies two methods of presentation: blending the financial data of the component units' balances and transactions in a manner similar to the presentation of the State's balances and transactions, or discrete presentation of the component units' financial data in columns separate from the State's financial data.

Blended Component Units

The entities below are legally separate from the State and meet the GAAP criteria for component units. These entities are blended with the primary government because they provide services entirely or almost entirely to the State or there is a financial benefit or burden relationship with the primary government.

Transportation

The Division of Highways within the Department of Transportation (Transportation), is governed by a commissioner appointed by the Governor; it does not have a governing board separate from the State Legislature. It is a legally separate entity defined by the State Constitution. Since its operations are to improve the State's roads, Transportation is blended in the major special revenue funds of the State.

West Virginia Investment Management Board

The West Virginia Investment Management Board (IMB) is governed by a 13-member Board of Trustees. The IMB was created as a public corporation by West Virginia Code §12-6-1 to serve as the administrator, investor, and manager of the State's pension, Workers' Compensation, Pneumoconiosis, and other state funds. The Governor, the State Auditor, and the State Treasurer are members of the Board, and the other members are appointed by the Governor. Because there is a financial benefit-burden relationship between the State and the

West Virginia

IMB, and assets of the State and its component units comprise over 90% of the assets managed by the IMB, it is blended in the internal service funds of the State.

West Virginia Board of Treasury Investments

The West Virginia Board of Treasury Investments (BTI) is governed by a five-member board. The Governor, the State Auditor, and the State Treasurer are members of the Board and the other two members are appointed by the Governor. The BTI was created as a public corporation by West Virginia Code §12-6C-4 to provide prudent fiscal administration, investment, and management for the Consolidated Fund and is blended in the internal service funds of the State.

Tobacco Settlement Finance Authority

The Tobacco Settlement Finance Authority (TSFA) is governed by a five-member board, including the Secretary of Administration, the State Treasurer, and three persons appointed by the Governor. The TSFA was created to issue bonds related to the State's portion of the tobacco receipts from the Master Settlement Agreement between tobacco manufacturers and the covered states. The revenue bonds, secured by the tobacco revenues, are not a general obligation of the State. The TSFA is a blended debt service fund of the State since its activities only benefit the State.

Blended Component Unit Financial Statements

Audited financial statements for these blended component units can be obtained directly from their respective administrative offices.

Administrative Offices:

Transportation 1900 Kanawha Blvd., East Building 5, Room A-109 Charleston, WV 25305	West Virginia Investment Management Board 500 Virginia St. East, Suite 200 Charleston, WV 25301
Board of Treasury Investments 1900 Kanawha Blvd., East Building 1, Room E-122 Charleston, WV 25305	Tobacco Settlement Finance Authority 1900 Kanawha Blvd., East Building 1, Room E-119 Charleston, WV 25305

Discretely Presented Component Units

Discretely presented component units are entities which are legally separate from the State but are financially accountable to the State, or whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading or incomplete. Because of the nature of the services they provide and the State's ability to impose its will on them, the following component units are discretely presented. The State has both governmental (providing services to the government) and proprietary (providing services to external parties) component units. The component units are presented in a single column on the government-wide statements.

The major discretely presented component units are composed of the following entities:

West Virginia Lottery

The West Virginia Lottery (Lottery) is governed by a seven-member board appointed by the Governor. It was formed to assist the State in funding education, debt service, the promotion of tourism, and other basic governmental activities. Even though the Lottery was created primarily to generate revenue for the State, the service provided by the Lottery – the opportunity for financial gain – is provided to anyone who chooses to participate. When prizes are awarded to winners and financial gain is achieved, the lottery operation does not exclusively, or almost exclusively, benefit the primary government as an institution, not meeting the criteria for blending and thus requiring discrete component unit presentation.

Economic Development Authority

The Economic Development Authority (EDA) is administered by a nine-member board composed of the Governor, Secretary of Revenue, and seven other members appointed by the Governor. EDA is responsible for developing and advancing the business prosperity and economic welfare of the State. EDA is authorized to make loans, including direct financing and right-to-use leases to industrial development agencies for the promotion and retention of new and existing commercial and industrial development. EDA is empowered to borrow money and issue bonds (with approval of the State), notes, commercial paper, and other debt instruments to furnish money for the enhancement of business development projects and has the ability to establish loan terms, including interest rates, at its discretion. EDA promotes economic development among private industries, and though its services benefit the State by increasing the tax base, its primary function is to provide jobs.

Housing Development Fund

The Housing Development Fund (HDF) is governed by an 11-member board consisting of the Governor, the Attorney General, the Commissioner of Agriculture, the State Treasurer, and seven other members appointed by the Governor. The Governor or his designee is the chair of the board of directors. HDF is responsible for providing residential housing programs for low-income and moderate-income families, elderly persons, and other eligible persons and families, as well as financing certain nonresidential projects. It is empowered to issue bonds which are payable from the mortgage payments. The assets and revenues of the bond programs of the HDF are restricted by resolution to repay the outstanding debt. As the State is able to impose its will over the HDF, it is included as a discretely presented component unit.

Parkways Authority

The Parkways Authority (Parkways) is composed of seven members. The Governor or his designee serves as its chairperson, the Secretary of the Department of Transportation is on the board, and five members are appointed by the Governor. Its responsibilities include the operation and maintenance of the West Virginia Turnpike (the Turnpike) as well as economic development and tourism projects approved by Transportation. Parkways sets the rates for using the Turnpike and may issue Parkways' revenue refunding bonds payable solely from revenues of the Turnpike. Transportation, as well as the State, is able to impose its will on Parkways.

Water Development Authority

The Water Development Authority (Water Development) is governed by a seven-member board. The Governor, who serves as the chair, the Secretary of the Department of Environmental Protection, and the Commissioner of the Bureau for Public Health are members ex-officio of the board. Four members are appointed by the Governor. Water Development is responsible for assisting in the preservation, protection, improvement, and management of the State's water resources. Water Development oversees a loan pool program which provides low-interest financing to local governments for water and wastewater projects. Water Development issues bonds to fund the loan pool and uses the proceeds to purchase local government revenue bonds. The revenue bonds are payable solely from the revenues of the projects. Water Development also serves as the financial administrator of the West Virginia Infrastructure and Jobs Development Council and the Drinking Water Treatment Revolving Fund, which are enterprise funds.

Higher Education Fund

Each college and university in the Higher Education Fund (the Fund) is governed by a Governing Board, which is responsible for the general determination, control, supervision, and management of the financial business and educational policies and affairs of the institution(s). The West Virginia Higher Education Policy Commission (the Policy Commission), in accordance with Senate Bill No. 653, is the single accountability point responsible for developing, gaining consensus around, and overseeing the implementation and development of a higher education public policy agenda. It is comprised of ten persons appointed by the Governor with the advice and consent of the Senate. The Policy Commission is responsible for preparing and submitting a consolidated budget and allocating state appropriations to supplement institutional operating revenues.

Senate Bill 448 created the West Virginia Council for Community and Technical College Education (the Council), which has responsibility for developing, overseeing, and advancing the State's public policy agenda as it relates to community and technical college education. The Council is comprised of 12 persons appointed by the Governor with the advice and consent of the Senate.

The Fund is comprised of the following: Bluefield State College, BridgeValley Community and Technical College, New River Community and Technical College, Concord University, Eastern West Virginia Community and Technical College, Fairmont State University, Glenville State College, Marshall University (including Marshall University Graduate College), Mountwest Community and Technical College, Pierpont Community and Technical College, Shepherd University, Blue Ridge Community and Technical College, Southern West Virginia Community and Technical College, West Liberty University, West Virginia Higher Education Policy Commission (including West Virginia Network for Educational Telecomputing), West Virginia Council for Community and Technical College Education, West Virginia Northern Community College, West Virginia State University, West Virginia School of Osteopathic Medicine, West Virginia University (including Potomac State College and West Virginia University Institute of Technology), and West Virginia University at Parkersburg Community and Technical College. These entities are included in the Fund financial statements as blended component units: Concord University Research and Development Corporation, Glenville State College Research Corporation, Glenville State

College Housing Corporation, Marshall University Research Corporation, Shepherd University Research and Development Corporation, West Liberty University Research Corporation, West Virginia State University Research and Development Corporation, West Virginia University Research and Development Corporation, and West Virginia Regional Technology Park.

The Fund's component units' financial statements are included in the Fund's component unit column in the Discretely Presented Major Component Units Financial Statements of the ACFR. The component units are the separate private nonprofit organizations of each applicable institution. Those organizations report under Financial Accounting Standards Board (FASB) standards. As such, certain revenue recognition criteria and presentation features are different from GASB revenue recognition criteria and presentation features.

Various foundations have been established as separate nonprofit organizations incorporated in the State of West Virginia having as their purpose "... to aid, strengthen and further in every proper and useful way, the work and services of the (individual institutions within the Fund), and their affiliated nonprofit organizations. "Oversight of the foundations is the responsibility of separate and independently elected Boards of Directors, not otherwise affiliated with the Fund. In carrying out its responsibilities, the Boards of Directors of the foundations employ management, form policy, and maintain fiscal accountability over funds administered by the foundations. Although the individual institutions within the Fund do not control the timing or amount of receipts from the foundations, the majority of resources, or income thereon, which the foundations hold and invest are restricted to the activities of the individual institutions within the Fund by donors. Because these restricted resources held by the foundations as detailed in the basic financial statements can only be used by, or for the benefit of, the individual institutions within the Fund, the foundations are considered component units of the individual institutions and are therefore included with the Fund's financial statements.

The West Virginia University Foundation Inc. is appropriately not reported because the economic resources held do not entirely or almost entirely benefit West Virginia University. The Kanawha Valley Community and Technical College Foundation, Inc.; the Bridgemont Community and Technical College Foundation; the Eastern West Virginia Community and Technical College Foundation Inc.; the Mountwest Foundation, Inc.; and Tech Foundation, Inc. are not included because they were not significant to their institutions. The Higher Education Foundation is not included because it was not significant to the Fund.

Complete financial statements for any college, university, or foundation can be obtained by contacting the Business Office of the West Virginia Higher Education Policy Commission, 1018 Kanawha Boulevard, E., Suite 700, Charleston, WV 25301.

West Virginia Division of Corrections and Rehabilitation

The West Virginia Division of Corrections and Rehabilitation (the Division) oversees the State's adult and juvenile offender populations. It combined the West Virginia Division of Corrections, the West Virginia Regional Jail and Correctional Facility, and the West Virginia Division of Juvenile Services into one agency. The Division is governed by a nine-member board consisting of the Commissioner of the Division of Corrections, the Assistant Commissioner of the Bureau of Juvenile Service, the Secretary of the Department of

West Virginia

Homeland Security, the Secretary of the Department of Administration, and five members appointed by the Governor.

School Building Authority

The School Building Authority (SBA) is governed by a ten-member board appointed by the Governor. The State Superintendent of Schools serves as president of the Authority. The remaining nine members consist of three members of the State Board of Education and six citizens, one of whom must be a representative of the construction trades. The SBA is to “facilitate and provide State funds for the acquisition, construction, and maintenance of elementary and secondary public school facilities so as to meet the educational needs of the people of the State in an efficient and economical manner.” The SBA’s program is designed to provide modern, efficient public-school facilities throughout the State by promoting the consolidation of elementary and secondary public schools, enabling the State to more efficiently utilize its educational resources.

The nonmajor discretely presented component units are composed of the following entities:

Educational Broadcasting Commission

The Educational Broadcasting Commission (EBC) consists of 9 members. Five members are appointed by the Governor. The other four members include the State Superintendent of Schools, one member from the West Virginia Board of Education, and one member from the Policy Commission. EBC is responsible for extending educational, cultural, and informational experiences to all state citizens. This is accomplished through the construction and operation of noncommercial educational television and radio stations and related facilities statewide. EBC provides statewide telecommunication services for other state and public service agencies for nonbroadcasted activities such as teleconferencing, in-service training, and data delivery. EBC’s revenues are derived primarily through donations, with a portion of operational costs supplemented by state and federal grants.

West Virginia Division of Multimodal Transportation Facilities

The West Virginia Division of Multimodal Transportation Facilities (Multimodal Division) is the agency of the State responsible for the administration of all federal and state programs related to public ports, railroads, airports, air navigational facilities and public transit providers. The Multimodal Division is empowered to issue bonds with the approval of the Secretary of Transportation.

Solid Waste Management Board

The Solid Waste Management Board (Solid Waste) is composed of seven members. Five members are appointed by the Governor and the remaining members are the Secretary of the Department of Health and Human Services and the Director of the Division of Environmental Protection. Solid Waste is responsible for improving collection and disposal of solid wastes and encouraging recycling, reuse, and recovery of resources from wastes. Solid Waste is the financing mechanism for solid waste projects and is empowered to issue bonds (with approval of the Water Development Authority) and set a rate structure.

Racing Commission

The Racing Commission consists of three members appointed by the Governor, by and with the consent of the Senate. The State Legislature has the ability to approve and modify the Racing Commission's budget. The Racing Commission has full jurisdiction over and shall supervise all horse race meetings, all dog race meetings, and all persons involved in the holding and conducting of race meetings. It has the power to set fees and grant licenses and permits pertaining to horse and dog race meetings, as well as to regulate the horse and dog race wagering.

Public Defender Corporation

The Public Defender Corporation represents the combined nonprofit corporations, created under authority of West Virginia Code §29-21, for the purpose of fulfilling the State's obligation to provide legal representation to eligible clients. Funding of the individual public defender corporations is by appropriation disbursed in periodic allotments determined by the Executive Director of the Public Defender Services, who is appointed by the Governor. The governing body of each public defender corporation is a Board of Directors appointed by the county commissions and the Governor.

Municipal Pension Oversight Board

The Municipal Pension Oversight Board is responsible for monitoring and improving the performance of the municipal policemen's and firemen's pension and relief funds. The board, which is the governing body, ensures legal compliance of the funds and distribution of tax revenues to the relief funds as well as any reasonable actions necessary to provide for the security and fiscal integrity of pension funds. The board consists of nine members, including the executive directors of the State's IMB and Consolidated Public Retirement Board, an active or retired member from both the Municipal Policeman's Pension and Relief Fund, and the Municipal Fireman's Pension and Retirement Fund, an attorney experienced in finance and investment matters related to pensions management, two persons experienced in pension management, a certified public accountant experienced in auditing, and one person chosen from a list of three persons submitted to the Governor. It would be misleading to exclude the Municipal Pension Oversight Board, so it is presented as a discretely presented component unit.

Discretely Presented Component Unit Financial Statements

Complete audited financial statements of the individual discretely presented component units can be obtained directly from their respective administrative offices.

Basis of Presentation

The accompanying basic financial statements of the State of West Virginia conform to United States GAAP for governments. The GASB is the accepted standard-setting body for governmental accounting and financial reporting. In addition, GAAP requires that the State's proprietary activities apply GAAP in a similar manner as applied for business activities in the private sector. As a result, the financial statements of certain component units follow the specialized reporting practices of the insurance, housing finance agency, and other not-for-profit industries, as prescribed by the GASB. Certain net position and fund balance amounts presented for the preceding year have been restated. See Note 2 for further explanation.

The basic financial statements have been prepared primarily by the Financial Accounting and Reporting Section (FARS) of the Department of Administration from accounts maintained by the State Auditor's Office, the State Treasurer's Office, the Board of Treasury Investments, and the Investment Management Board. Additional data has been derived from the audited financial statements of certain entities and from reports and data prepared by various state agencies and departments, based on independent or subsidiary accounting records maintained by them.

Government-wide and Fund Financial Statements

Government-wide Financial Statements

The government-wide financial statements, which are the statement of net position and the statement of activities, report information on all the nonfiduciary activities of the primary government and its component units. These activities are reported as governmental activities, business-type activities, or component units. The governmental activities are normally supported by taxes, intergovernmental revenues, and other nonexchange revenues, and are reported separately from the business-type activities. The business-type activities rely significantly on fees and charges to external parties. The primary government is reported separately from certain legally separate component units for which the primary government is financially accountable.

The statement of net position presents the State's nonfiduciary assets, deferred outflows of resources, liabilities, and deferred inflows of resources, with the difference reported as net position. Net position is reported in three categories:

- Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any bonds, notes, and other debt of resources that are attributed to the acquisition, construction, or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt also should be included in this component of net position.
- Restricted net position results when constraints are placed on net position used by external creditors, grantors, contributors, etc. or imposed by law through constitutional provisions or enabling legislation and reduced by liabilities and deferred inflows of resources related to those assets.

- Unrestricted net position consists of net position which does not meet the definition of the two preceding categories. Unrestricted net position is often designated, which indicates that management does not consider it available for general operations. They also often have constraints on resources imposed by management but can be removed or modified.

The statement of activities demonstrates the degree to which the direct expenses of a given function or program are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or program. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or program and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or program. Taxes and other items not properly included in program revenues are reported as general revenue.

Fund Financial Statements

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide statements. Major individual governmental funds and major individual proprietary funds are reported as separate columns in the fund financial statements, with nonmajor funds being combined into a single column.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary and fiduciary fund financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they become both measurable and available. “Available” means expected to be collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period. For this purpose, revenues are primarily considered available if received in the first 60 days of the new fiscal year. Significant revenues susceptible to accrual include income, sales and use, corporation, and other taxes; federal awards; federal reimbursements; and other reimbursements for use of materials and services. Revenues from federal awards are considered available when the related expenditures have been incurred and if received in 12 months. Receipts and disbursements of U.S. Government food stamps are accounted for in the General Fund. The electronic benefits transfer (EBT) process for food stamp revenue equal to expenditures is recognized when the underlying transaction (food purchase) occurs. Revenues from other sources are recognized when received.

Expenditures generally are recorded when the related liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to retirement

costs, compensated absences, environmental obligations, and claims and judgments, are recorded only when payments are due.

Governmental Fund Types

Special Revenue Funds are used to account for and report the proceeds of specific revenue sources that are restricted, committed, or assigned to expenditures for specified purposes (other than debt service and capital projects).

Debt Service Funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest.

Capital Projects Funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets (other than those financed by proprietary funds).

Permanent Funds are used to account for and report resources that are restricted to the extent that only earnings, and not principal, may be used for purposes that benefit the State or its citizenry. The Irreducible School Fund was constitutionally established for educational purposes.

The State reports the following major governmental funds:

The General Fund is the primary operating fund of the State. It is used to account for all financial resources obtained and spent for those services normally provided by the State (e.g., health, social assistance, public safety, primary and secondary education), which are not required to be accounted for within other funds.

Transportation, a special revenue fund, has responsibility for the construction, maintenance, and improvement of all state roads; development of public transportation facilities, services, equipment, and methods; and supervision and control of commercial, state, and municipal airports and ports. Financial resources for these responsibilities are federal grants, registration fees, license fees, and taxes.

The TSFA, a debt service fund, was established to sell bonds that are being funded by projected future cash flows from the Master Settlement Agreement between the manufacturers and the states. The TSFA acquired the State's rights to the revenue under the Master Settlement Agreement. The TSFA receives the cash flows and transfers the monies to the trustee upon receipt.

State Road is a constitutionally established fund that is operated within the Department of Transportation. Certain taxes, fees, and other revenue sources are expended for the construction and maintenance of roads.

Proprietary Fund Types

Enterprise Funds are used to account for operations of those state agencies providing goods or services to the general public on a user-charge basis, or where the State has decided that periodic determination of revenues earned, expenses incurred, and/or net income is

appropriate for capital maintenance, public policy, management control, accountability, or other purposes. This fund type is also used when the activity is financed with debt that is secured by a pledge of the net revenues from the fees and charges of the activity. These funds include the State's risk management and insurance funds as well as the Alcohol Beverage Control Administration, two water treatment loan programs, the West Virginia College and Jumpstart Savings Program Administration, and the West Virginia Infrastructure and Jobs Development Council.

Internal Service Funds account for the operations of those state agencies that provide goods and services to other state agencies and governmental units on a cost-reimbursement basis. These services include government building and vehicle maintenance and leasing, data processing functions, and the investment and management of state funds. In the government-wide statements, internal service funds are included with governmental activities.

The State reports the following major enterprise funds:

The Water Pollution Control Revolving Fund provides low-interest loans to communities to upgrade or establish sewer service, to clean up the State's water supply, and to assist local governmental entities in complying with the Clean Water Act.

The Workers' Compensation Fund provides compensation for injury or illness sustained during the course of employment with a date of injury on or before June 30, 2005 (see Note 15).

Unemployment Compensation operates local offices throughout the State to provide temporary assistance to eligible unemployed workers.

The West Virginia Infrastructure and Jobs Development Council coordinates the review and funding of water, wastewater, and economic development projects within the State through proceeds of its bond program, certain mineral severance taxes, repayments of principal and interest, and statutorily dedicated legislative appropriations from the excess lottery revenue fund.

The Public Employees' Insurance Agency and the Board of Risk and Insurance Management are the State's health insurance and risk management funds and are shown with the proprietary major funds due to their importance to management.

Types of Fiduciary Funds

Additionally, the State reports the following types of fiduciary funds:

Pension and Other Employee Benefit Trust Funds report resources that are required to be held in trust for the members and beneficiaries of the State's defined benefit retirement plans, the defined contribution retirement plan, and the multi-employer, cost-sharing other postemployment benefit plan, in which the State is a participating employer.

Investment Trust Funds report resources in external investment pools that belong to local governments and municipalities.

Private Purpose Trust Funds report resources of all other trust arrangements in which principal and income benefit individuals, private organizations, or other governments. The

West Virginia College and Jumpstart Savings Programs allow citizens to invest monies for college tuition and defer taxes on earnings from those investments, and a savings program to cover costs of pursuing a career in skilled trades and vocations.

Custodial Funds report fiduciary activities that are not required to be reported in pension (and other employee benefit) trust funds, investment trust funds, or private-purpose trust funds. These funds are taxes that will be remitted to respective local governments, hospital patient and inmate funds, performance bonds, and interest earnings.

Interfund Activity and Balances

As a general rule, the effect of interfund activity has been eliminated from the government-wide statements. Exceptions to this rule are activities between funds reported as governmental activities and funds reported as business-type activities, and activities between funds that are reported in different functional categories in either the governmental or business-type activities column. Elimination of these activities would distort the direct costs and program revenues for the functions concerned.

In the fund financial statements, transfers represent flows of assets without equivalent flows of assets in return or a requirement for repayment. In addition, transfers are recorded when a fund receiving revenue provides it to the fund expending the resources.

Interfund receivables and payables have been eliminated from the statement of net position, except for the residual amounts due between governmental and business-type activities.

Major Reserve/Stabilization Funds

The Revenue Shortfall Reserve Fund (Rainy Day Fund) was established in the State Code, which requires that the first 50% of all surplus General Revenue funds accrued during the fiscal year just ended must be deposited into the fund up to an aggregate amount not to exceed 13% of the total appropriations from the General Revenue Fund for the fiscal year just ended.

The Legislature is permitted to make appropriations from the fund for emergency revenue needs caused by acts of God or natural disasters or for other fiscal needs as determined by the Legislature. The Rainy Day Fund can also be invested and can retain those earnings. The first \$100 million is invested by the BTI, and any amounts over \$100 million are invested by the IMB. As of June 30, 2025, the fund contained \$754 million, which amounted to almost 14.5% of FY 2025 total appropriations. The Rainy Day Fund is reported in the General Fund as part of the unassigned fund balance.

The Legislature also authorized the Governor, by executive order, to borrow funds from the Rainy Day Fund when revenues are inadequate to make timely payments of the State's obligations. The amount borrowed may not exceed 1.5% of the General Revenue Fund estimate for the fiscal year in which the funds are borrowed and shall be repaid to the fund within 90 days of its withdrawal. Because of an expected cash flow shortfall experienced each year in the first quarter of the fiscal year, the Governor has borrowed from the fund each year since August 1996 in order to pay obligations in a timely manner. The loans were repaid before September 30 of each year, all within the 90-day limit allowed by law.

The Revenue Shortfall Reserve Fund – Part B (Rainy Day Fund – Part B) was established with the cash balance of the West Virginia Tobacco Settlement Medical Trust Fund on June 9, 2006, the effective date of the bill, West Virginia Code §11B-2-20. The funds are invested by the IMB, and interest and other returns on the invested funds are credited to the fund.

Expenditures may not be made from the Rainy Day Fund—Part B unless all monies in the Revenue Shortfall Reserve Fund have been first expended. After June 30, 2025, interest and other amounts earned on monies held in the Rainy Day Fund—Part B may be appropriated by the Legislature for continued support of the programs offered by the Public Employees’ Insurance Agency; funding for expansion of the federal-state Medicaid program; funding for public health programs, services, and agencies; funding for any State owned or operated health facilities; or in instances of revenue shortfalls or fiscal emergencies of an extraordinary nature. On June 30, 2025, the balance in the Rainy Day Fund—Part B was \$594 million, and it is reported in the General Fund as part of the unassigned fund balance.

The Income Tax Refund Reserve Fund was established to pay personal income tax refunds, interest, and penalties to taxpayers in a timely manner. It may also be used by the Legislature to make appropriations from the fund to address other items as the Legislature so desires. Personal income taxes received by the State can be added to this fund, if the state tax commissioner determines the balance in the fund is not sufficient to ensure the timely payment of income tax refunds. On June 30, 2025, the balance in the Income Tax Refund Reserve Fund was \$594 million, and it is reported in the General Fund as part of the unassigned fund balance.

Assets and Liabilities

Cash and Cash Equivalents – Cash equivalents are short-term investments with maturities, when purchased, of three months or less. The State Treasurer principally deposits the State’s cash in investment pools maintained by the BTI and IMB, and such deposits are generally available with overnight notice. Cash deposits in outside bank accounts are considered to be cash and cash equivalents.

Investments – Amounts reported as investments include certain deposits with the IMB, the BTI, and other investments maintained in outside accounts. The investments at IMB are maintained in investment pools having long-term investment securities designated as trading securities or established to acquire participant-directed securities. IMB’s investments in the Short-Term Fixed Income Pool are carried at amortized cost. Futures and option contracts are valued at the last settlement price established each day by the exchange on which they are traded. Investments in commingled investment pools are valued at the net asset value of the individual funds. The State also participates in three external investment pools managed by the BTI. Two are reported at amortized cost, which approximates fair value. The third is a longer-term investment pool that carries investments at fair value. The fair value of investments is derived from quoted prices for identical assets or liabilities in active markets that a government can access at the measurement date and by inputs that are observable for an asset or a liability, either directly or indirectly. Because fair value of the investments of the State Building Fund approximates amortized cost, no noncash change in fair value is reported.

Receivables – Amounts reported as receivables in the governmental funds consist primarily of Federal revenues, taxes, and interest on investments. Receivables in all other funds represent amounts that have arisen in the ordinary course of business and are shown net of allowances for uncollectible amounts. Further disaggregation of receivable balances is disclosed in Note 4.

Public-Private Partnership Receivables (PPP) - Amounts are measured at the present value of the amount expected to be received during the PPP term. The State may receive variable payments that are dependent on the operator's revenue. The variable payments are recorded as an inflow of resources in the period the payment is received.

Inventories – Consumable inventories, consisting of expendable materials and supplies held for consumption, are valued and reported for financial statement purposes. Materials and supplies inventories are physically counted and primarily valued at the first-in, first-out (FIFO) and average cost methods at year-end. Inventories of governmental funds are recorded using the consumption method. Nonspendable fund balance is recorded for the ending inventory amount, indicating that inventory does not constitute "expendable available financial resources." Proprietary fund and component units' inventories are valued at the lower of cost or market, cost being determined on FIFO, and are expensed when used.

Capital Assets – Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Capital assets are recorded at historical cost, or at estimated historical cost if actual historical cost is not available. Donated capital assets are recorded at acquisition value at the time of the donation. In accordance with the capitalization policy adopted by the State for financial reporting, equipment with a purchase price in excess of \$25,000 is capitalized. Certain small blended component units follow other capitalization policies which range from \$5,000 to \$25,000 for equipment. The Fund component unit uses \$1,000 and \$5,000 thresholds. Buildings and improvements which extend the useful lives and/or significantly increase values of capitalized buildings with a combined value in excess of \$100,000 are capitalized. All land, regardless of acquisition price, is capitalized. Intangibles include off-the-shelf computer software, patents, easements, and mineral rights over \$25,000 and internally generated software over \$1 million.

West Virginia is one of few states that owns all the paved roads in the State, except for municipal streets. Infrastructure was capitalized for the first time in fiscal year 2002. Transportation's infrastructure constructed from July 1, 1980 to July 1, 2001, has been recorded at estimated historical cost. The estimated historical cost for years 1980-2001 was based on capital outlay expenditures reported by Transportation in the annual reports for those years, less an amount estimated for the historical cost of the acquisition of land for right-of-way. Transportation has not capitalized any infrastructure expenditures for assets constructed prior to July 1, 1980. The costs of normal maintenance and repairs that do not add to the asset's value or materially extend an asset's useful life are not capitalized. No interest was capitalized during the fiscal year. Other agencies are capitalizing all infrastructure assets.

The capital assets are depreciated over their estimated useful lives using the straight-line depreciation method. Amortization of leased assets is included with depreciation expense. Equipment, depending on type, is depreciated over 3-20 years. Buildings are depreciated over various lives, ranging from 20-50 years. The infrastructure assets are depreciated over a period of 20-50 years. Improvements are capitalized and depreciated over the remaining useful lives of the related capital assets. Impaired assets and insurance recoveries are analyzed for significance and recorded accordingly.

The State possesses certain capital assets that have not been capitalized and depreciated, including works of art and historical treasures, such as monuments; historical documents; paintings; antiques; pioneer Native American, and Civil War artifacts, etc. Works of art and historical treasures that are held for public exhibition, education, or research in furtherance of public service, rather than financial gain; protected, kept unencumbered, cared for, and preserved; and subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections are not capitalized.

Leases – Lease contracts generally relate to land, buildings, and associated facilities such as parking, and various machinery and equipment. Short-term leases, those with a maximum possible lease term of 12 months or less, are recognized as revenue or expense based on the provisions of the lease agreement. For all other contracts where the State is the lessee, a lease liability and right-to-use asset is recognized based on the present value of future lease payments over the term of the lease. The right-to-use lease assets are amortized over the term of the lease or the life of the asset whichever is shorter. On a limited basis, the State serves as a lessor providing leases of state-owned buildings. The financial statements recognize a lease receivable and a deferred inflow of resources, based on the present value of the future lease payments expected to be received during the contract term, and deferred inflow of resources is amortized over the life of the lease.

The State uses its estimated incremental borrowing rate as the discount rate for leases unless the rate the lessor charges is known. The State's incremental borrowing rates range from 4.17%-4.5%. If amendment or other circumstances occur that are expected to significantly affect the amount of the lease, the present value is remeasured and adjustments are made.

The State's leases include buildings, land, equipment and software with a minimum leasing arrangement with a cost greater than \$25,000 annually. The Fund component units use \$1,000-\$5,000 thresholds. All other leases are considered immaterial to the financial statements.

Subscription Based Information Technology Arrangements (SBITA) - The State has entered into various contracts with external parties for the right-to-use information technology software on a subscription basis. Amortization on these contracts is computed using the straight-line method over the shorter of the subscription term or the estimated useful life of the asset. The State's incremental borrowing rate for subscription contracts range from 3% to 6.5%.

Insurance and Compensation Benefits – The Board of Risk and Insurance Management (BRIM), the Public Employees' Insurance Agency (PEIA), and the Workers' Compensation Fund (WCF) each represent and are accounted for as insurance enterprise funds of the State.

BRIM and PEIA are considered public entity risk pools (enterprise funds). Each organization has included the required supplementary information in its separately audited financial statements.

Advances – The amount of EDA loans held by the State’s General Fund at June 30, 2025, is approximately \$52.4 million and is recorded as Advances to/from Component Units. There is a revolving loan agreement with the BTI to borrow up to \$80 million to be reloaned for the purposes of expanding broadband services across the State. This revolving loan allows EDA to insure no more than \$20 million per entity in one calendar year. The loan has a variable rate equal to the 12 month average yield on the WV Money Market Pool. The rate resets quarterly and the maximum annual adjustment may not exceed 1.00%. The annualized rate for fiscal year 2025 was 3.28%. At June 30, 2025, the outstanding balance was \$52.4 million.

Long-Term Liabilities – In the government-wide financial statements and proprietary fund financial statements, long-term obligations (including claims and judgments, environmental obligations, net pension liability, net other post-employment benefits liability (OPEB), compensated absences, and arbitrage liabilities) are reported as liabilities. Bond premiums and discounts are amortized over the life of the bonds using the interest method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are charged to expenses as incurred.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources, while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

Pollution Remediation Obligations – In the government-wide statement of net position, pollution remediation obligations, including landfills, mine reclamation, oil and gas wells, and underground storage tanks, are reported in the Accrued and Other Liabilities line item at the current value of expected outlays to fund remediation costs using a technique substantially similar to the expected cash flow technique. The technique uses contracts issued, measuring averages and standard deviations, and variances to all the other sites without contracts. A range of possible estimated amounts is used, as well as all expectations about possible cash flows on a site-specific basis. Ranges are based on actual remediation cost experience, remediation cost estimates, and/or discrete cost remediation treatment possibilities. All reported obligation amounts are estimates and are subject to change resulting from price increases or reductions, technology, or changes in applicable laws or regulations. In cases when remediation costs are not reasonably estimable liabilities, a liability for such cases is not reported. For a more detailed explanation of the liability, see Note 16, Commitments and Contingencies.

Pensions – The State’s retirement pension plans cover all employees of the State and are funded according to matching portions of employee payroll prescribed by the Plans. The Plans’ fiduciary net position has been determined on the same basis used by the pension plan. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan. Investments are carried at fair value as determined by a third-party pricing service utilized by the respective investment management companies. Investment

transactions are accounted for on a trade-date basis. Unrealized gains and losses are included in investment income. Investment income is determined monthly and distributed to each of the defined benefit plans participating in the investment pools on the last day of the month in the form of reinvested shares.

Other Postemployment Benefits (OPEB) – The State OPEB plan covers all employees of the State as set forth in the West Virginia Code. Accordingly, the basic financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America for governmental entities as prescribed or permitted by the GASB. Revenues are derived mainly from contributions from plan members and employers. Members' contributions are recognized in the period in which the contributions are due. Employers' contributions to the RHBT are recognized pursuant to a legal requirement, when there is a reasonable expectation of collection. Benefits and refunds are recognized when due and payable. RHBT cash and cash equivalents principally consist of the deposits in the Board of Treasury Investments (BTI) pooled funds recorded at fair value, as more fully described in Note 3.

Compensated Absences – Employees accumulate annual leave (vacation) balances to maximum amounts ranging from 240 to 320 hours. Most employees receive a 100% termination payment upon separation based upon their final rate of pay. The liability for annual leave is valued at 100% of the balance plus the State's share of Social Security and retirement contributions. In lieu of a cash payment, at retirement, an employee can elect to use accumulated annual leave toward their postemployment health care insurance premium. State employees earn sick leave benefits, which accumulate but do not vest. When separated from employment with the State, an employee's sick leave earned but not paid out at termination can still require an accrual. The accrual equals the amount of unused leave and no reimbursement is provided. However, eligible employees may convert, at the time of retirement, any unused accumulated sick leave to pay a portion of the employee's postemployment health care insurance premium. See the Other Postemployment Benefits discussion in Note 14.

The GASB issued Statement No. 101, “Compensated Absences” to better meet the information needs of financial statement users by updating the recognition and measurement guidance for compensated absences. The requirements of this Statement are effective for fiscal years beginning after December 15, 2023. This Statement requires that liabilities for compensated absences be recognized for (1) leave that has not been used and (2) leave that has been used but not yet paid in cash or settled through noncash means. A liability should be recognized for leave that has not been used if (a) the leave is attributable to services already rendered, (b) the leave accumulates, and the leave is more likely than not to be used for time off or otherwise paid in cash or settled through noncash means.

Deferred Inflows/Outflows of Resources – In addition to assets, the statement of financial position includes a separate section for deferred outflows of resources. Deferred outflows of resources represent a consumption of net assets that applies to a future period(s) and will not be recognized as an outflow of resources (expense/expenditure) until then. The State has three items that qualify for reporting in this category. It is the deferred charge on refunding reported in the government-wide statement of net position, and deferred amounts related to pension and OPEB. The deferred charge on refunding resulted from the difference between

the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. The deferred amounts related to pension and OPEB relate differences between estimated and actual investment earnings, changes in actuarial assumptions, and other pension and OPEB related changes.

In addition to liabilities, the statement of financial position includes a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net assets that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The State has three items that qualify for reporting in this category. Unavailable revenue is reported only in the governmental funds balance sheet. The governmental funds report unavailable revenues from two sources: property taxes and special assessments. These amounts are deferred and recognized as an inflow of resources in the period that the amounts become available. In the government-wide financial statements the State reports deferred amounts related to leases and deferred amounts related to pension and OPEB.

Net Position/Fund Balance – The difference between assets plus deferred outflows of resources less liabilities plus deferred inflows or resources is “Net Position” on the government-wide, proprietary, and fiduciary fund statements, and “Fund Balance” on the governmental fund statements. Net Position is reported in three categories:

- Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowing used for the acquisition, construction, or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt also should be included in this component of net position.
- Restricted net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Net Position that is restricted due to legal restrictions from creditors, grantors, or laws and regulations of other governments, and, in some cases, by legally enforceable enabling legislation or constitution of the State is a restricted net position.
- Unrestricted net position consists of net position which does not meet the definition of the two preceding categories.

The fund balance category, general government operations, is based primarily on the extent to which the State is bound to honor constraints on the specific purposes for which the amounts in those funds can be spent. Fund balances are reported in the following categories:

- Nonspendable fund balances include amounts that cannot be spent because they are in a nonspendable form, such as inventory, or they are legally or contractually required to be maintained intact, such as the corpus of a permanent fund.
- Restricted fund balances are restricted due to legal restriction from creditors, grantors, or laws and regulations of other governments, or by legally enforceable enabling legislation or constitution of the State.

- Committed fund balances are amounts that can only be used for specific purposes pursuant to constraints imposed by appropriation legislation passed by the State Legislature, which is the highest level of decision-making authority for the State. Those committed amounts cannot be used for any other purpose unless the Legislature passes new legislation concerning those amounts. Committed fund balance also incorporates contractual obligations to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual requirements.
- Assigned fund balances are constrained by the government's intent to use such funds for specific purposes, but are neither restricted nor committed, except for major reserve/stabilization arrangements. The specific purpose for which the funds are intended is expressed within the appropriation requests of the agencies and approved by the State Budget Office, according to the West Virginia State Code. Assigned fund balances include all remaining amounts (except negative amounts) that are reported in the governmental funds, other than the general fund, that are not classified as nonspendable and are neither restricted nor committed. Amounts in the General Fund that are intended to be used for a specific purpose are also assigned. By reporting particular amounts that are not restricted or committed in a special revenue, capital projects, debt service, or permanent fund, the State has assigned those amounts to the purposes of the respective funds.
- Unassigned fund balance is the residual classification for the General Fund. This classification represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the General Fund. Any negative fund balances are unassigned. The General Fund is the only fund that reports a positive unassigned fund balance.

Agency level assigned and unassigned fund balance spending is at the discretion of the agency, with approval of the State Budget Office. It is the State's overall policy to use restricted balances first, then unrestricted balances in the following order: committed, assigned, and unassigned.

Revenues and Expenditures/Expenses

In the government-wide Statement of Activities, revenues and expenses are segregated by activity (governmental or business-type and discretely presented component units), then further by function (e.g., administration, education, transportation). Additionally, revenues are classified between program and general revenues. Program revenues include charges to customers or applicants for goods, services, or privileges provided; operating grants and contributions; and capital grants and contributions. Internally dedicated resources are reported as general revenues rather than as program revenue. General revenues include all taxes. Certain indirect costs are included in the program expenses reported for individual functions.

In the governmental fund financial statements, revenues are reported by source. For budgetary control purposes, revenues are further classified as either "general purpose" or "restricted." General purpose revenues are available to fund any activity accounted for in the fund. Restricted revenues are, either restricted by state law or by outside restriction (e.g.,

federal awards), available only for specified purposes. Unused restricted revenues at year-end are recorded as restricted fund balance.

In the governmental fund financial statements, expenditures are reported by character: “Current,” “Capital Outlay,” or “Debt Service.” Current expenditures are subclassified by function and are for items such as salaries, grants, supplies, and services. Capital outlay includes expenditures for real property or infrastructure. Debt service includes both interest and principal outlays related to bonds and payments on right-to-use leases.

Revenues and expenses of proprietary funds are classified as operating or nonoperating and are subclassified by object (e.g., sales, depreciation). Operating revenues and expenses generally result from providing services and producing and delivering goods. All other revenues and expenses are reported as nonoperating.

Retiree Drug Subsidies – The retiree drug subsidy (RDS) revenue from the federal government under the provisions of Medicare Part D has been recorded by the Retiree Health Benefit Trust Fund (RHBT). RHBT has accounted for the RDS revenue as voluntary nonexchange transactions. Accordingly, RDS estimated revenue is recognized as RHBT incurs Medicare-eligible retiree prescription drug expenditures.

Other Financing Sources – These additions to governmental fund balances in the fund financial statements include resources and financing provided by bond proceeds, other financing debt, right-to-use leases, subscription based information technology arrangements, and transfers from other funds.

Other Financing Uses – These reductions of governmental fund resources in the fund financial statements are uses of funds that could substantially distort a government’s regular operations. They include discounts on debt issued, refunding transactions, and transfers.

Interfund Services Provided and Used – When a sale or purchase of program-related goods and/or services between funds occurs, for a price approximating their external exchange value, the seller reports revenue and the purchaser reports an expenditure or expense, depending on the fund type. Transactions between the primary government and a discretely presented component unit are generally classified as revenues and expenses, unless they represent repayments of loans or similar activities.

Pronouncements Not Yet Adopted

The GASB issued Statement No. 103, “Financial Reporting Model Improvements” to improve key components of the financial reporting model to enhance its effectiveness in providing information that is essential for decision making and assessing a government’s accountability. This Statement specifically addresses changes to elements impacting Management’s Discussion and Analysis, Unusual or Infrequent Items, the presentation of the Proprietary Fund Statement of Revenues, Expenses, and Changes in Net Position, Major Component Unit Information, Budgetary Comparison Information, and certain application issues. The requirements of this Statement are effective for fiscal years beginning after June 15, 2025, and management has not determined the financial statement impact of the pronouncement.

The GASB issued Statement No. 104, “Disclosure of Certain Capital Assets” to provide users of government financial statements with essential information about certain types of capital assets. The Statement requires certain types of capital assets to be disclosed separately in the capital asset note. It also requires additional disclosures for capital assets held for sale. Governments should disclose (1) the ending balance of capital assets held for sale, with separate disclosure for historical costs and accumulated depreciation by major class of asset, and (2) the carrying amount of debt for which the capital assets held for sale are pledged as collateral for each major class of asset. The requirements of this Statement are effective for fiscal years beginning after June 15, 2025, management has not determined the financial statement impact of the pronouncement.

NOTE 2

RESTATEMENT AND RESTRICTED BALANCES

Restatement of Beginning Balances

“A Change in Accounting Policy” and “Correction of an Error”

For the fiscal year beginning after December 15, 2023, GASB 101 was implemented for the following entities. There was also an error correction affecting one component unit.

The effects of the adjustments and correction are as follows (expressed in thousands):

Entity /Reporting Unit	Fund Balances or Net Position				
	As Previously Reported	Adjustment	Correction	As Restated	
Governmental Activities					
General Fund - Government-wide	\$ 4,208,081	\$ (64,730)	\$ —	\$ 4,143,351	
State Building Fund	233,180	(435)	—	232,745	
Office of Technology	14,729	(1,740)	—	12,989	
Enterprise Readiness Planning Board	6,542	(99)	—	6,443	
Travel Management	76,278	(571)	—	75,707	
Total Governmental Activities	13,847,763	(67,575)	—	13,780,188	
Component Units					
Higher Education	3,226,825	(802)	—	3,226,023	
WV Multimodal Transportation Facilities	47,170	(398)	—	46,772	
Public Defender	15,892	(208)	139	15,823	
Total Component Units	5,870,202	(1,408)	139	\$ 5,868,933	
Fiduciary Funds:					
Municipal Policemen’s or Firefighter’s Pension Relief Fund	—	249,380	—	249,380	
Total Fiduciary Funds	28,135,404	249,380	—	28,384,784	
Government Wide:					
Governmental Activities	13,847,763	(67,575)	—	13,780,188	
Total Primary Government	16,568,399	(67,575)	—	16,500,824	
Total Component Units	5,870,202	(1,408)	139	5,868,933	

Restricted Net Position

The following table summarizes the restricted net position of funds included in “other” columns at June 30, 2025 (expressed in thousands):

Fund Type/Fund	Total Reporting Entity	Restricted for:							
		Capital Projects	Net Pension Asset	Net OPEB Asset	Lending Activities	Insurance Activities	General Government Operations	Non-Expendable	Specific Fund Purposes
Enterprise Funds:									
Drinking Water Treatment Revolving Fund	\$ 278,402	\$ —	\$ —	\$ 278,402	\$ —	\$ —	\$ —	\$ —	\$ —
Alcohol Beverage Control Administration	398	—	14	285	99	—	—	—	—
West Virginia College and Jumpstart Savings Program	5,450	—	50	—	—	—	5,400	—	—
State Entities Worker's Compensation	10,194	—	—	—	—	10,194	—	—	—
	<u>294,444</u>	<u>—</u>	<u>64</u>	<u>285</u>	<u>278,501</u>	<u>10,194</u>	<u>5,400</u>	<u>—</u>	<u>—</u>
Internal Service Funds:									
State Building Fund	14,671	14,119	513	39	—	—	—	—	—
Office of Technology	1,083	—	1,046	37	—	—	—	—	—
Travel Management	7,500	—	77	—	—	—	—	—	7,423
Enterprise Readiness Planning Board	206	—	204	2	—	—	—	—	—
	<u>23,460</u>	<u>14,119</u>	<u>1,840</u>	<u>78</u>	<u>—</u>	<u>—</u>	<u>—</u>	<u>—</u>	<u>7,423</u>
Discretely Presented Component Units:									
Educational Broadcasting Commission	679	—	251	40	—	—	—	388	—
WV Multimodal Transportation Facilities	5,200	—	100	3	—	—	—	—	5,097
Solid Waste Management Board	4,878	—	48	—	—	—	—	—	4,830
Racing Commission	—	—	—	—	—	—	—	—	—
Public Defender Corporation	1,393	—	1,325	68	—	—	—	—	—
Municipal Pensions Oversight Board	44,904	—	22	—	—	—	—	—	44,882
	<u>57,054</u>	<u>—</u>	<u>1,746</u>	<u>111</u>	<u>—</u>	<u>—</u>	<u>—</u>	<u>388</u>	<u>54,809</u>
Total	<u>\$ 374,958</u>	<u>\$ 14,119</u>	<u>\$ 3,650</u>	<u>\$ 474</u>	<u>\$ 278,501</u>	<u>\$ 10,194</u>	<u>\$ 5,400</u>	<u>\$ 388</u>	<u>\$ 62,232</u>

The government-wide statement of net position reports \$4.0 million of restricted net position for the primary government, of which \$1.8 million is restricted by enabling legislation.

Restricted Fund Balance

The following table summarizes, by fund, the restricted fund balance of each of the funds included in “other” columns at June 30, 2025 (expressed in thousands):

Fund Type/Fund	Total Reporting Entity	Capital Projects	Debt Service	Development, Tourism, and Recreation	Education	Public Protection
Governmental Funds:						
Special Revenue Funds:						
Environmental Protection	\$ 113,103	\$ —	\$ —	\$ —	\$ —	\$ 113,103
Public Service Commission	4,115	—	—	—	—	4,115
Wildlife Resources	79,254	—	—	79,254	—	—
	<u>196,472</u>	<u>—</u>	<u>—</u>	<u>79,254</u>	<u>—</u>	<u>117,218</u>
Capital Projects Funds:						
Education, Arts, Sciences, and Tourism Fund	812	812	—	—	—	—
Cacapon Project Fund	2,374	2,374	—	—	—	—
Lease Purchase Accounts	12,094	12,094	—	—	—	—
	<u>15,280</u>	<u>15,280</u>	<u>—</u>	<u>—</u>	<u>—</u>	<u>—</u>
Debt Service:						
Lease Purchase Accounts	5,733	—	5,733	—	—	—
West Virginia Infrastructure and Job Development Council	445	—	445	—	—	—
Education, Arts, Sciences, and Tourism Fund	1,011	—	1,011	—	—	—

NOTE 3

DEPOSITS AND INVESTMENTS

Deposits

The State's deposit policy is described in West Virginia's Code §12-2-2 and 3. All monies are to be maintained in the State's accounting system or in an outside bank account approved by the State Treasurer's Office.

Custodial credit risk is risk associated with the failure of a depository financial institution. In the event of a depository financial institution's failure, the State would not be able to recover its deposits or collateralized securities that are in possession of the outside parties. According to State Code §12-1-5, the amount of funds on deposit in any depository financial institution in excess of the amount insured by the FDIC shall be secured by a depository guaranty bond issued by a valid bankers' surety company or by other securities acceptable to the State Treasurer, pursuant to the dedicated method, in the amount of 102% of the value of collateral pledged by the depository institution. The State minimizes custodial credit risk by obtaining the required amount of collateral in the name of the State. The State Treasurer has statutory responsibility for the daily cash management of the State's agencies, departments, boards, and commissions.

Primary Government

At June 30, 2025, the reported amount of the primary government's deposits was (\$287,409,000) and the bank balance was \$179,156,000. Of that bank balance, \$3,824,000 was uninsured and uncollateralized.

Component Units

At June 30, 2025, the reported amount of the component units' deposits was \$667,722,000 and the bank balance was \$361,941,000. Of that bank balance, \$28,715,000 was uninsured and collateralized with securities held by the pledging financial institution but not in the name of the State, and \$10,566,000 was uninsured and collateralized with securities held by the pledging financial institution's trust department or agent but not in the name of the State.

Investments

The Board of Treasury Investments (BTI) manages the individual investment pools and accounts of the Consolidated Fund under authority of West Virginia Code, §12-6C, West Virginia Treasury Investments Act. The Consolidated Fund provides for the investment of monies not currently needed to fund state governmental operations, as well as provides the opportunity for local governments to participate in large investment pools, and for those funds statutorily required to be invested in the Consolidated Fund.

The BTI is authorized by West Virginia Code, §12-6C-9, to invest in United States government and agency obligations, commercial paper, corporate bonds, repurchase agreements, asset-backed securities, and investments in accordance with the Linked Deposit Program, which is a program using financial institutions in the State to reduce loan costs to

small businesses by offsetting interest reductions on the loans with certificates of deposit, loans approved by the Legislature, and any other programs authorized by the Legislature. In addition to the restrictions in investment types, at no time shall more than 75% of the Consolidated Fund be invested in any bond, note, debenture, commercial paper, or other evidence of indebtedness of any private corporation or association, and at no time shall more than 5% be invested in securities issued by a single private corporation or association.

The West Virginia Investment Management Board (WVIMB) focuses on the State's long-term trust investments. The WVIMB provides prudent fiscal administration and investment management services to designated state pension funds, the State's Workers' Compensation and Coal Workers' Pneumoconiosis funds, and certain other state government funds. The State Treasurer's Office determines which funds to transfer to the WVIMB and BTI for investment in accordance with West Virginia Code, policies set by the WVIMB and BTI, and by provisions of bond indentures and trust agreements, when applicable.

Investment Valuation

Fair value of an investment is the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e., the exit price).

A hierarchy prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical financial instruments (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are:

Level 1: Unadjusted quoted prices in active markets for identical assets or liabilities at the reporting date.

Level 2: Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not considered active; observable inputs other than observable quoted prices for the asset or liability; or inputs derived principally from or corroborated by observable market data.

Level 3: Unobservable pricing inputs for assets and liabilities.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Generally, the fair value of WVIMB's fund portfolio securities are determined as outlined in the hierarchy levels above and more specifically as follows and applicable:

- Equity securities and money market mutual funds are valued at the last sale price or official closing price reported in the market in which they are primarily traded.
- Equity securities that trade in non-U.S. markets are valued in U.S. dollars using period-end spot market exchange rates as supplied by the pool's custodian.

- Fixed income securities are valued according to prices furnished by independent pricing services to the pool's custodian. These services determine the security prices by a number of methods, including, but not limited to, dealer quotes, live market trading levels when available, live feeds of trade execution data, spreads over U.S. Treasury securities, and other models and formulae appropriate to the specific security type.
- Open-end regulated investment companies (RIC) or other commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator.
- Futures and option contracts are valued at the last settlement price established each day by the exchange on which they are traded or at the fair value determined by valuation models employed by the counterparty. The fair value of futures contracts is reflected as their unrealized gain or loss.
- Commingled investment funds are valued on the last business day of each month at the net asset value of the fund as reported by the fund's administrator. Investments for which the fair value cannot be determined are valued at fair value in accordance with the WVIMB's established procedures.
- Credit default, interest rate, and total return swaps are valued at the last settlement price established each day by the exchange on which they are traded, are based on market values received from third parties, or are determined by valuation models.
- Foreign currency forward contracts are valued using the appropriate market exchange rates and interpolated for maturity dates falling between the reported forward dates on a linear basis at month end. The fair value of foreign currency forward contracts is reflected as their unrealized gain or loss.
- Investments in private credit & income funds, private equity partnerships, real estate limited partnerships and funds, and other private funds are securities for which market quotations are not readily available. The WVIMB has concluded that the net asset value reported by the general partners or fund administrators approximates the fair value of these investments, and, consequently, these investments are carried at net asset value as a practical expedient for fair value. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds, and, consequently, the fair value of the WVIMB's interest in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the WVIMB were to sell these investments in the secondary market, a buyer may require a discount to the reported net asset value, and the discount could be significant. The WVIMB believes that the net asset value of such investments is a reasonable estimate of fair value at June 30, 2025.
- Investments in alternative risk premia (ARP) funds are generally securities for which market quotations are not readily available. The WVIMB has concluded that the net asset value reported by the underlying funds approximates the fair value of these investments, and, consequently, these investments are carried at net asset value as a practical expedient for fair value. These investments are

redeemable with the fund at net asset value under the original terms of the agreements and operations of the underlying fund. However, it is possible that these redemption rights may be restricted or eliminated by the funds in the future in accordance with the underlying fund agreements. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds, and, consequently, the fair value of the WVIMB's interests in the funds. The WVIMB believes that the net asset value of such investments is a reasonable estimate of fair value at June 30, 2025.

- Investments in hedge funds are securities for which market quotations are not readily available. The WVIMB has concluded that the net asset value reported by the underlying funds approximates the fair value of these investments, and, consequently, these investments are carried at net asset value as a practical expedient for fair value. These investments are redeemable with the fund at net asset value under the original terms of the agreement and operations of the underlying fund. However, it is possible that these redemption rights may be restricted or eliminated by the funds in the future in accordance with the underlying fund agreements. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds, and, consequently, the fair value of the WVIMB's interests in the funds. Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the WVIMB were to sell these investments in the secondary market, a buyer may require a discount to the reported net asset value, and the discount could be significant. The WVIMB believes that the net asset value of such investments is a reasonable estimate of fair value at June 30, 2025.

Investments not generally described above are described in detail in the individual pool disclosures in the pages that follow.

The BTI is an investment vehicle of the State and its component units, all of which are government entities. The investments of the WV Money Market, WV Government Money Market, WV Term Deposit Account, and Loan pools and accounts are carried at amortized cost. The pools transact with their participants at a stable net asset value per share and meet the requirements for portfolio maturity, portfolio quality, portfolio diversification, portfolio liquidity, and shadow pricing. The BTI does not place any limitations or restrictions on participant withdrawals from the WV Money Market and WV Government Money Market pools, such as redemption notice periods, maximum transaction amounts, and any authority to impose liquidity fees or redemption gates. The specific exceptions to fair value reporting for the other pools as defined in professional standards are as follows:

Pool	Exception
WV Term Deposit Account	Nonnegotiable certificates of deposit which are nonparticipating interest-earning investment contracts
Loan	Loans receivable arising from lending activities of economic development authorities

West Virginia

The investments of the remaining pools and participant accounts are reported at fair value, which is determined by a third-party pricing service based on asset portfolio pricing models and other sources. The BTI measures fair value at the end of each month. Investments in commingled investment pools are valued at the reported unit values of the individual funds. Commissions on the purchases of securities by the BTI are a component of the security price quoted by the seller and are included in the investment cost.

A more detailed discussion of the WVIMB's and BTI's investment pools can be found in the WVIMB's and BTI's annual reports. A copy of the WVIMB's annual report can be obtained from the following address: 500 Virginia Street East, Suite 200, Charleston, WV 25301 or <http://www.wvimb.org>. A copy of the BTI's annual report can be obtained from the following address: West Virginia Board of Treasury Investments, 315 70th Street SE, Charleston, WV 25304 or <http://www.wvbtি.org>.

Except as specifically disclosed in this note, the State currently does not have specific overall policies addressing limitations on specific risk types, such as credit risk, custodial credit risk, concentration of credit risk, interest rate risk, or foreign currency risk.

In addition to amounts invested with the WVIMB and BTI, certain governmental funds and discretely presented component units are permitted to invest bond proceeds with third-party trustees named in bond indentures. Governmental funds, including the State Building Fund; Travel Management; Education, Arts, Sciences, and Tourism Fund; West Virginia Infrastructure and Jobs Development Council; Tobacco Settlement Finance Authority; the Department of Health, Health Facilities, and Human Services; and the Department of Administration have investments with bond trustees. The West Virginia Infrastructure and Jobs Development Council enterprise fund also has investments with bond trustees. The following discretely presented component units have reported investments held with third-party trustees: Economic Development Authority (EDA); Educational Broadcasting Commission; Housing Development Fund; Parkways Authority; Water Development Authority; School Building Authority; and Higher Education Fund. WVIMB has operating funds in an institutional Treasury Money Market Fund. The Teachers' Defined Contribution Retirement System of the Consolidated Public Retirement Board and the SMART 529 College Savings Plan have their assets held by outside third parties.

Permissible investments for all agencies include those guaranteed by the United States of America, its agencies and instrumentalities (U.S. Government obligations); equities; corporate debt obligations, including commercial paper, which meet certain ratings; certain money market mutual funds; investment agreements with certain financial institutions; repurchase agreements; state and local government series (SLGS) securities; and other investments. Other investments consist primarily of single-family mortgage loans and collateralized mortgage obligations. SLGS are direct obligations of the U.S. Government, issued to state and local government entities to provide those governments with required cash flows at yields which do not exceed IRS arbitrage limits.

Repurchase Agreements

In connection with repurchase agreement transactions, it is the WVIMB's policy that its designated custodian or mutual third party take possession of the underlying collateral securities, the fair value of which exceeds the principal amount of a repurchase transaction at

all times. If a seller defaults and the fair value of the collateral declines, realization of the collateral by the WVIMB may be delayed or limited.

The BTI uses only tri-party repurchase agreements. Under the terms of a tri-party repurchase agreement, the seller transfers collateral securities to an account of the BTI's manager/agent at the seller's custodian bank. This arrangement perfects the BTI's lien on the collateral and effectively protects the BTI from a default by the seller. The BTI requires sellers in repurchase transactions to pledge collateral of at least 102% of the cash borrowed from the BTI. If a seller defaults and the fair value of the collateral declines, realization of the collateral by the BTI may be delayed or limited.

Derivatives

The State's investment strategy includes the use of derivatives as a tool in managing market risk and providing an opportunity for enhanced return. The WVIMB invests in derivative financial investments as authorized by its Board of Trustees. As of June 30, 2025, the WVIMB held derivative financial investments that included Foreign Currency Forward Contracts, Futures Contracts, Options, Credit Default Swaps, Interest Rate Swaps, and Total Return Swaps. The WVIMB is indirectly exposed to derivative risk through participation in institutional commingled funds. Credit risk and interest rate risk pertaining to derivatives are disclosed in each participating pool's section in this note. The change in fair value of derivatives is included in the Unrestricted Investment Earnings on the Government-wide Statement of Activities; Interest and Other Investment Income on the Statement of Revenues, Expenses, and Changes in Fund Net Position, Proprietary Funds; and Net Appreciation in Fair Value of Investments on the Statement of Changes in Fiduciary Net Position, Fiduciary Funds. The fair value of derivatives is included in the Investments and Cash Equivalents on the Government-wide Statement of Net Position; Investments on the Statement of Net Position, Proprietary Funds; and Investments on the Statement of Fiduciary Net Position, Fiduciary Funds. More details of the changes in fair value may be obtained from the financial statements of the WVIMB.

Foreign Currency

Amounts denominated in or expected to settle in foreign currencies are translated into United States dollars at exchange rates reported by the pool's custodian, Northern Trust, on the following basis:

- Market value of investment securities, other assets, and liabilities - at the closing rate of exchange at the valuation date.
- Purchases and sales of investment securities, income, and expenses - at the rate of exchange prevailing on the respective dates of such transactions.

Futures Contracts

A futures contract is an agreement between a buyer or a seller and the clearinghouse of a futures exchange in which the parties agree to buy or sell a commodity, financial instrument or index at a specified future date and price. Upon entering into a financial futures contract, the WVIMB is required to pledge collateral to the broker an amount of cash, U.S. government securities, or other assets, equal to a certain percentage of the contract amount (initial

margin deposit). Cash (variation margin) is received from or paid to the broker on a daily basis for the fluctuations of the underlying securities or index.

Interest rate futures may be used to enhance portfolio yields, manage portfolio duration, or as an alternative investment of cash.

The market risk associated with holding equity index futures results from changes in the market value of the contractual positions due to changes in the value of the underlying instruments or indices. Investment risk associated with these futures contracts arises because of the value of the futures contracts may not correlate perfectly with changes in the values of the underlying instruments or indices due to market distortions.

Other risks associated with futures contracts are liquidity risk and credit risk. Liquidity risk arises when there is insufficient trading in a particular futures contract. Credit risk arises from the potential inability of counterparties to meet the terms of the contracts. The WVIMB's managers generally only utilize futures contracts that are traded on major exchanges or are executed with major dealers. The major exchanges assume the risk of a counterparty default and generally require an initial margin deposit of cash or securities.

Asset-Backed Securities

The WVIMB invests in various collateralized mortgage obligations (CMO), including interest-only (IO) and/or principal-only (PO) tranches, asset-backed securities, mortgage-backed securities (MBS), forward-settling MBS that are commonly known as to-be-announced securities (TBAs), and structured corporate debt. The BTI has certain pools that invest in various asset-backed securities and structured corporate debt. The securities are reported at fair value. The WVIMB and BTI invest in these securities to enhance yields on investments. Changes in market interest rates affect the cash flows of these securities and may result in changes in fair value. The overall return or yield on these securities depends on the changes in the interest and principal payment patterns and market value of the underlying assets.

Securities Lending

The WVIMB is authorized by statute and policy to participate in a securities lending program. The WVIMB, through its lending agent, Northern Trust (NT), loans securities of the Pool to various brokers on a temporary basis. Each transaction for international and domestic securities is secured by collateral based on the market value of the securities loaned. The required collateral percentage varies based on the type of collateral received and the type of security loaned. For U.S. securities, the required percentage of cash collateral and non-cash collateral consisting of debt obligations and securities issued by the United States Government or its agencies or instrumentalities is at least 102 percent of the market value of the securities loaned plus accrued income. For international securities, the required collateral is at least 105 percent of the market value of the securities on loan unless the foreign securities loaned are denominated and payable in U.S. dollars, then the collateral shall be at least 102 percent of the market value of the securities loaned. Cash collateral received is invested in the West Virginia Custom Account (Cash Collateral Account). The Cash Collateral Account's investment objective is to maximize current income to the extent capital is preserved and liquidity is maintained. The Cash Collateral Account seeks to maintain a constant net asset value of \$1.00 per share by following strict credit quality,

maturity, liquidity, and diversification requirements. Except for underlying repurchase agreement transactions, the Pool is liable for investment losses in the Cash Collateral Account. The lending agent contractually indemnifies the WVIMB for any repurchase agreement investment losses. Investments made with cash are reported at fair value on the Statement of Net Position. Securities loaned remain on the Statement of Net Position. The WVIMB has the right under the lending agreement to recover the securities from the borrower on demand. The WVIMB receives compensation in the form of loan premium fees and income from the investment of the cash collateral. Expenses related to the lending of securities are rebates paid by the lending agent to brokers and the lending agent's fees for its services. Securities lending income and expenses are recorded in the Statement of Changes in Net Position. The WVIMB also continues to receive interest or dividends on the securities loaned. Gains or losses in the fair value of the securities loaned that may occur during the term of the loans are reflected in the Statement of Changes in Net Position as a net increase (decrease) in fair value of investments.

At June 30, 2025, the fair value of securities on loan and collateral held by the pools of the WVIMB are as follows (expressed in thousands). Of the collateral held, \$304.6 million was received as cash. The collateral received as cash is invested in the West Virginia Custom Account.

	Fair Value of Securities on Loan	Collateral Held
Non-Large Cap Domestic Equity Pool	\$ 268,659	\$ 275,603
International Equity Pool	123,572	130,435
Total Return Fixed Income Pool	134,237	137,718
Core Fixed Income Pool	309,758	316,277
TIPS	66,374	67,822
Private Markets Pool	33,517	34,446
Total	\$ 936,117	\$ 962,301

Foreign Currency Spot Contracts

A foreign currency contract is an agreement between two parties to exchange different currencies at a specified exchange rate at an agreed upon future date. The WVIMB enters into foreign currency spot contracts that correspond to investment transactions trading in foreign currencies and to repatriate income. Risks associated with such contracts include movement in the value of the foreign currency relative to the U.S. dollar and the ability of the counterparty to perform. These contracts have relatively short durations that mirror foreign market settlement cycles and are valued at the prevailing market exchange rates at month end.

Option Contracts

The WVIMB may purchase or write bond, currency, or index option contracts that have recognized liquidity and are actively traded on major exchanges or are executed with major dealers. These option contracts give the purchaser (seller) of the contract the right to buy (call) or sell (put) the security, or settle cash for an index option, underlying the contract at an agreed upon price (strike price) during, or at the conclusion of, a specified period of time. Written option contracts are used to enhance investment returns and reduce portfolio

convexity when implied volatility is high. Purchased option contracts are used to increase portfolio convexity when implied volatility is low, to implement certain yield curve strategies, or to hedge sector exposure. When writing put options, there is risk that a loss may be incurred if the market price of the underlying instrument decreases and the option is exercised. This loss is determined by market conditions and cannot be specifically limited. The risk associated with writing call options is the loss of potential profit if the market price of the security increases and the option is exercised. Purchased put or call options bear the risk of loss of the premium paid if market conditions are not favorable to exercise the option. There may also be risk that the value of the option contract does not correlate perfectly with movements of the underlying instrument due to certain market distortions. The WVIMB limits its exposure to credit risk by only buying or selling options traded on major exchanges or executed with major dealers. There is a risk of the inability to enter into a closing transaction if a liquid secondary market does not exist. The WVIMB maintains sufficient levels of cash or cash equivalents to meet cash flow obligations.

Credit Default Swaps

Credit default swaps are agreements between counterparties to transfer the credit risk of referenced debt securities. The buyer of the credit default swap gains protection against a negative credit event such as a default or credit rating downgrade and the seller assumes the credit risk and is obligated to pay upon the occurrence of such an event. Credit default swap agreements are marked-to-market daily. Upfront payments received or made by the Pool on credit default swap agreements are capitalized. Periodic payments received or paid are recorded as interest income. Payments received or made as a result of a credit event or termination of the contract are recognized, net of a proportional amount of the upfront payment, in net increase (decrease) in fair value of investments. Credit default swaps are instruments which allow for the full or partial transfer of third-party credit risk, with respect to a particular entity or entities, from one counterparty to the other. A seller of credit default swaps is selling credit protection or assuming credit risk with respect to the underlying entity or entities. If a credit event occurs, as defined under the terms of the swap agreement, the seller of protection will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index. The Notional Principal reflects the maximum potential amount the seller of protection could be required to pay if a credit event occurs. The seller of protection receives periodic premium payments from the counterparty and may also receive or pay an upfront premium adjustment to the stated periodic premium.

Interest Rate Swaps

Interest rate swaps are agreements between counterparties to exchange cash flows based on the difference between a fixed and floating interest rate, applied to a notional principal amount for a specified period. Upfront payments received or made by the Pool on interest rate swap agreements are capitalized. Interest is paid or received periodically.

Total Return Swaps

Total return swaps are agreements in which one party makes payments based on a fixed or variable rate, while the other party makes payments based on the total return of an underlying referenced instrument, applied to a notional principal amount for a specified period. The underlying referenced instrument can be either a security or market index. A total return swap allows the party receiving the total return to obtain exposure to the underlying referenced instrument without actually owning the underlying position.

Investment Pools

Schedule of Participation

The following schedule details the participation in the various WVIMB pools exclusive of those pools comprising the Consolidated Fund or Participant Directed Accounts as of June 30, 2025 (expressed in thousands):

	Portable Alpha Pool	Large Cap Domestic Equity	Non-Large Cap Domestic Equity	International		
				Qualified	Nonqualified	Equity
Primary Government:						
Revenue Shortfall Reserve Fund	\$ —	\$ 40,693	\$ 6,265	\$ —	\$ 7,919	\$ 17,591

Investment Pool Descriptions

Portable Alpha Pool

The pool's objective is to exceed, net of external investment management fees, the S&P 500 Index over three-year to five-year periods.

Credit Risk and Interest Rate Risk

The pool is exposed to credit risk by requiring securities purchased to have a minimum long-term rating of BBB (investment grade) and/or a short-term rating of A-2 (Tier-II). The money market mutual fund has the highest credit rating. The pool is exposed to interest rate risk from its fixed income investments and money market mutual fund investment. As of June 30, 2025, the money market mutual fund has a weighted-average maturity (WAM) of 45 days.

The following table provides credit ratings for the pool's fixed income investments as of June 30, 2025 (expressed in thousands):

Rating	Fair Value
<i>Long-Term</i>	
AAA	\$ 43,380
AA	573,251
A	19,729
BBB	—
<i>Short-Term</i>	
A-1	133,256
A-2	1,996
Total Rated	<u>771,612</u>
Not Rated	<u>12,126</u>
Total Investments	<u><u>\$ 783,738</u></u>

The Portable Alpha Pool invests in asset-backed securities. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on the estimated prepayment assumptions that consider historical experience, market conditions, and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2025, Portable Alpha Pool held \$43,380,000 of these securities. This represents approximately 6% of the value of the pool's fixed-income securities and less than 1% of the value of the pool's total investments.

The following table provides the weighted average modified for the various asset types in the pool as of June 30, 2025:

Investment Type	Fair Value (in thousands)	Effective Duration (years)
Certificates of Deposit	\$ 8,765	0.2
Commercial Paper	135,252	0.1
Corporate ABS	43,380	0.6
Foreign Corporate Bonds	9,605	0.6
U.S. Corporate Bonds	15,889	0.4
U.S. Government Agency Bonds	36,237	0.5
U.S. Treasury Issues	534,610	5.5
Total	\$ 783,738	

Fair Value Measurements

U.S. GAAP does not require the pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. All of the pool's investments in alternative risk premia funds were valued using the net asset value per share; as such, they have not been categorized in the fair value hierarchy. The fair value measurement valuation techniques for the other Portable Alpha Pool's asset categories can be found on pages 82-84.

The table below summarizes the valuation of investment securities in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Assets	Level 1	Level 2	Level 3	Total
ARP Fund (RIC)	\$ 118,006	\$ —	\$ —	\$ 118,006
Certificate of Deposit	—	8,765	—	8,765
Commercial Paper	—	135,252	—	135,252
Commingled Equity Fund	3,202,356	—	—	3,202,356
Corporate ABS	—	43,380	—	43,380
Foreign Corporate Bonds	—	9,605	—	9,605
Futures Contracts	106,471	—	—	106,471
Money Market Mutual Fund	801,820	—	—	801,820
U.S. Corporate Bonds	—	15,889	—	15,889
U.S. Government Agency Bond	—	36,237	—	36,237
U.S. Treasury Issues	—	534,610	—	534,610
Total	\$ 4,228,653	\$ 783,738	\$ —	5,012,391
ARP Funds				2,018,408
Total				\$ 7,030,799

The following table presents information on investments measured at the NAV as of June 30, 2025 (expressed in thousands):

ARP Fund Strategies	Fair Value	Redemption Frequency	Redemption Notice Period
Directional (a)	\$ 522,143	Daily, Monthly	2 to 30 days
Multi-Premia (b)	1,073,884	Weekly, Biweekly, Monthly	3 to 30 days
Relative-Value (c)	422,381	Biweekly, Monthly	6 to 60 days
Total Investment Measured at NAV	<u>\$ 2,018,408</u>		

- (a) Directional funds employ various techniques to forecast the direction of segments of the market and then invest in either short or long positions. The segments may be geographic economies, industry sectors, currency, or asset class. The investments may be in physical securities or derivatives. The strategies may be trend-following or mean-reverting and may be specific to that segment or universally applied across them.
- (b) Multi-premia funds combine several strategies within the same fund in order to provide diversification benefits to reduce return volatility and decrease asset-class and single-strategy risks. These funds typically add incremental returns through allocation adjustments based on market opportunities. Risk is managed through a variety of quantitative constraints, including, but not limited to, active risk, liquidity risk, currency risk, manager risk, derivatives risk, and leverage risk.
- (c) Relative-value funds maintain positions in which the investment thesis is predicated on the realization of a valuation discrepancy in the relationship between multiple securities. Managers employ a variety of fundamental and quantitative techniques to establish investment insights, and security types range broadly across equity, fixed income, derivative or other security types. Fixed income strategies are typically quantitatively driven to measure the existing relationship between instruments and, in some cases, identify attractive positions in which the risk-adjusted spread between these instruments represents an attractive opportunity. Investments representing approximately 21 percent of the fair value of the investments in this strategy are subject to maximum withdrawal restrictions.

Derivative Instruments

Derivative financial instruments held in the Pool are limited to equity index futures. These futures are not designated as hedging instruments; they are used to obtain S&P 500 market exposure.

The table below presents the fair value, the fiscal year to date net increase (decrease) in fair value, and the notional amount of derivative financial instruments outstanding as of and for the year ended June 30, 2025:

Derivative Type	Fair Value	Net Increase (Decrease) in Fair Value of Investments	Notional Value
Futures Contracts:			
Equity Index Futures Long	<u>\$ 106,471</u>	<u>\$ 330,785</u>	<u>\$ 3,610,603</u>

Large Cap Domestic Equity Pool

The pool's objective is to exceed, net of external management fees, the S&P 500 Index over three-year to five-year periods. Large Cap Domestic Equity Pool invests in the BlackRock Equity Index Fund B. BlackRock uses a replication indexing approach to achieve investment results that correspond generally to the price and yield performance, before fees and expenses, of the S&P 500 Stock Index.

Credit Risk and Interest Rate Risk

The pool invests in commingled equity fund that invests in equities included in the S&P 500 Stock Index. The value of this investment at June 30, 2025, was \$375,845,000. The pool is exposed to credit risk and interest rate risk from its money market mutual fund investment. As of June 30, 2025, the money market mutual fund has the highest credit rating and has a weighted average maturity of 45 days. The pool is not exposed to concentration of credit risk, custodial credit risk, or foreign currency risk.

Fair Value Measurements

The table below summarizes the valuation of the investment securities in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Assets	Level 1	Level 2	Level 3	Total
Commingled Equity Fund	\$ 375,845	\$ —	\$ —	\$ 375,845
Money Market Mutual Fund	16,950	—	—	16,950
Total	<u>\$ 392,795</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 392,795</u>

Commingled investment funds are valued at the net asset value of the fund as reported by the fund's administrator. Investments for which the fair value cannot be determined are valued at fair value as determined in accordance with the WVIMB's established procedures.

Non-Large Cap Domestic Equity Pool

The pool's objective is to exceed, net of external management fees, the Russell 2500 Index over three-year to five-year periods.

Credit Risk and Interest Rate Risk

The pool is exposed to credit risk from the money market mutual fund investment and investments made with cash collateral for securities loaned. The money market mutual fund has the highest credit rating. The pool is exposed to interest rate risk from its money market mutual fund investments and certain investments made with cash collateral for securities loaned. As of June 30, 2025, the money market mutual fund has a WAM of 45 days. Except for repurchase agreements that can have up to 95 days to maturity, investments in the cash collateral account are limited to overnight investments and as of June 30, 2025, the WAM for cash collateral was 1 day.

Fair Value Measurements

The table below summarizes the valuation of the investment securities in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Assets	Level 1	Level 2	Level 3	Total
Domestic Common Stock	\$ 1,025,654	\$ —	\$ —	\$ 1,025,654
Foreign Common Stock	121,733	—	—	121,733
Master Limited Partnership	3,487	—	—	3,487
Money Market Mutual Fund	32,805	—	—	32,805
Securities Lending Collateral	—	116,689	—	116,689
Total	<u>\$ 1,183,679</u>	<u>\$ 116,689</u>	<u>\$ —</u>	<u>\$ 1,300,368</u>

The fair value measurement valuation techniques used for the investments in the Non-Large Cap Domestic Equity Pool can be found on pages 82-84.

International Qualified

Funds of this pool are invested in Silchester International Investors International Value Equity Group Trust. This pool's objective is to produce investment returns that exceed the MSCI Europe Australasia Far East (MSCI EAFE) Index by 200 basis points over three-year to five-year periods, net of external investment management fees. Only "qualified

participants” (as defined by the Internal Revenue Code) may invest in this pool. Silchester invests in a diversified portfolio of equity securities of companies incorporated in any country other than the United States, with limited exposure to emerging markets and no unreasonable concentration exposure to any single issuer or country. Redemptions from Silchester can be made monthly with ten days advance written notice. Redemptions will generally be made within seven business days following month-end. The value of this investment at June 30, 2025, was \$1,266,329,000. This investment, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments.

Fair Value Measurements

U.S. GAAP does not require the pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The investment in Silchester is valued using the net asset value per share practical expedient. As Silchester is the only investment in the pool, a fair value hierarchy table is not presented.

International Nonqualified

Funds of this pool are invested in Silchester International Investors International Value Equity Group Trust. This pool’s objective is to produce investment returns that exceed the MSCI EAFE Index by 200 basis points over three- to five-year periods, net of external investment management fees. This pool exists for participants who are not “qualified.” Silchester invests in a diversified portfolio of equity securities of companies incorporated in any country other than the United States, with limited exposure to emerging markets and no unreasonable concentration exposure to any single issuer or country. Redemptions from Silchester can be made monthly with ten days advance written notice. Redemptions will generally be made within seven business days following month-end. The value of this investment at June 30, 2025, was \$204,179,000. This investment, although denominated in U.S. dollars, is exposed to foreign currency risk through the underlying investments.

Fair Value Measurements

U.S. GAAP does not require the pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The investment in Silchester is valued using the net asset value per share practical expedient. As Silchester is the only investment in the pool, a fair value hierarchy table is not presented.

International Equity

This pool invests in the equities of international companies. The objective of the International Equity Pool is to exceed, net of external investment management fees, MSCI All Country World Free Ex US Index over three-year to five-year periods.

Credit Risk and Interest Rate Risk

The pool is exposed to credit risk from the money market mutual fund investments and investments made with cash collateral for securities loaned. The money market mutual fund has the highest credit rating. The pool is exposed to interest rate risk from its money market mutual fund investments and certain investments made with cash collateral for securities loaned. As of June 30, 2025, the money market mutual fund has a weighted-average maturity

(WAM) of 45 days. Except for repurchase agreements that can have up to 95 days to maturity, investments in the cash collateral account are limited to overnight investments. As of June 30, 2025, the WAM for the cash collateral account was 1 day.

This pool has equity securities, cash, and foreign current spot contracts that are exposed to foreign currency risks. The amounts at fair value (in U.S. dollars) of investments and cash denominated in foreign currencies as of June 30, 2025, consisted of the following (expressed in thousands):

Currency	Equity Investments	Cash	Foreign Currency Spot Contracts	Total

The fair value measurement valuation techniques used for the investments in the International Equity Pool can be found on pages 82-84.

Short-Term Fixed Income

This pool is structured as a money market fund to maintain sufficient liquidity to meet the daily disbursements requested by participants and to invest any contributions until the time the money is transferred to other asset classes without sustaining capital losses while earning a small return above inflation. For purposes of evaluating investment returns, net of external investment management fees, this pool is expected to meet or exceed the FTSE 3 Month T-Bill index.

Credit Risk and Interest Rate Risk

The IMB limits the exposure to credit risk in the Short-Term Fixed Income Pool by requiring all corporate bonds to be rated AA or higher. Commercial paper must be rated A-1 by Standard & Poor's and P-1 by Moody's. Additionally, the pool must have at least 10% of its assets in United States Treasury issues. All the pool's investments had the highest credit rating as of June 30, 2025. The pool is exposed to interest rate risk from its fixed income investments. The WVIMB monitors interest rate risk of the pool by limiting the weighted average maturity (WAM) of the investments of the pool to 60 days. The maturity of floating rate notes is assumed to be the next interest rate reset date.

The following table provides the WAM for the different asset types in the pool as of June 30, 2025, of the Short-Term Fixed Income pool's investments (expressed in thousands):

Investment Type	Carrying Value	WAM Days
U.S. Government Agency Bonds	\$ 196,679	7
U.S. Treasury Issues*	24,960	15
Repurchase Agreements (Underlying Securities):		
U.S. Treasury Issues*	60,859	1
Total Investments	\$ 282,498	6

* U.S. Treasury issues are explicitly guaranteed by the U.S. Government and are not subject to credit risk.

Fair Value Measurements

The table below summarizes the valuation of the investment securities in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Assets	Level 1	Level 2	Level 3	Total
Repurchase Agreement*	\$ —	\$ 60,859	\$ —	\$ 60,859
U.S. Government Agency Bonds	—	196,679	—	196,679
U.S. Treasury Issues	—	24,960	—	24,960
Total	\$ —	\$ 282,498	\$ —	\$ 282,498

*Underlying Securities:
U.S. Treasury Issues \$60,859

All securities of the Short-Term Fixed Income Pool are valued at amortized cost provided such amount approximates fair value. The basic premise underlying the use of the amortized cost method of valuation is that high-quality, short-term debt securities held until maturity will eventually return to their amortized cost value, regardless of any current disparity between the amortized cost value and fair value, and would not ordinarily be expected to fluctuate significantly in value. The pool values its securities at amortized cost so long as the deviation between the amortized cost and current market value remains minimal and results in the computation of a share price that represents fairly the current net asset value per share of \$1.

Total Return Fixed Income

The main objective of the Total Return Fixed Income Pool is to generate investment income and provide stability and diversification, but not at the expense of total return. The pool's investment objective is to outperform the Bloomberg U.S. Universal Bond Index over three-year to five-year periods, net of investment management fees.

Credit Risk and Interest Rate Risk

The pool is exposed to credit risk from its fixed income investments, money market mutual fund investment, and cash collateral account investment. The WVIMB limits the exposure to credit risk in the pool by maintaining at least an average rating of BBB (investment grade) and/or a short-term rating of A-2 (Tier II) as defined by a nationally recognized statistical rating organization. The WVIMB reviews available ratings from Standard & Poor's, Moody's, and Fitch, and reports the rating indicative of the greatest degree of risk. The pool held some securities in which the aforementioned rating agencies withdrew their credit rating and other securities that did not receive a credit rating. These securities have been listed as withdrawn or not rated in the table below. The absence or lack of a rating does not necessarily indicate a greater degree of risk. The money market mutual fund has the highest credit rating. The cash collateral account is not rated.

West Virginia

The following table provides credit ratings for the pool's fixed income investments as of June 30, 2025 (expressed in thousands):

Rating	Fair Value
<i>Long-Term</i>	
AAA	\$ 105,314
AA	1,435,706
A	178,020
BBB	449,691
BB	277,841
B	121,504
CCC	38,987
CC	4,640
D	1,781
<i>Short-Term</i>	
A-1	121,105
Total Rated	<hr/> 2,734,589
Not Rated	93,534
Withdrawn	13,838
Total Fixed Income Investments	<hr/> \$ 2,841,961

The Total Return Fixed Income Pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions, and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2025, the Total Return Fixed Income Pool held \$1,260,588,000 of these securities. This represents approximately 44% of the value of the pool's securities.

The pool is exposed to interest rate risk from its fixed income investments, money market mutual fund investment, and cash collateral account investment. As of June 30, 2025, the money market mutual fund has a WAM of 45 days. Except for repurchase agreements that can have up to 95 days to maturity, investments in the cash collateral account are limited to overnight investments. As of June 30, 2025, the WAM for the cash collateral account was 1 day.

The following table provides the weighted average effective duration for the various asset types in the pool as of June 30, 2025 (expressed in thousands):

Investment Type	Fair Value	Effective Duration (years)

Foreign Currency Risk

The pool has foreign fixed income investment, foreign equity investments, foreign currency spot contracts, and cash that is denominated in foreign currencies and exposed to foreign currency risks. Additionally, the pool has indirect exposure to foreign currency risk through its ownership interests in certain of the commingled debt funds. Approximately \$42,379,000 or 24%, of the commingled debt funds hold substantially all of their investments in securities denominated in foreign currencies. This represents approximately 1% of the value of the pool's fixed income securities.

West Virginia

The amounts at fair value (in U.S. dollars) of investments and cash denominated in foreign currencies as of June 30, 2025, (expressed in thousands):

Currency	Foreign Fixed Income	Common Stock	Foreign Currency Spot Contracts	Cash	Cash Due To/From Broker	Total

Derivative Instruments

Derivative financial instruments held in the Pool include foreign currency forward contracts, futures, options, credit default swaps, interest rate swaps, and total return swaps. None of these derivative instruments are designated as hedging instruments; they are used to implement portfolio strategy, capture valuation opportunities, and to exploit market inefficiencies. The primary risks managed by using these derivative instruments include interest rate, foreign exchange rate, and market price risks.

The table below presents the fair value and the net increase (decrease) in fair value of derivative instruments as of and for the year ended June 30, 2025:

Derivative Type	Fair Value	Net Increase (Decrease) in Fair Value of Investments	Notional Value (in USD)
Forwards:			
Foreign Currency Forward Contract	\$ (4,016)	\$ (6,167)	\$ 228,132
Futures Contracts:			
Fixed Income Futures Long	6,003	(4,736)	775,520
Fixed Income Futures Short	(9,024)	13,997	(296,501)
Options contracts:

Total Derivatives	\$ 2,802	\$ 21,316	

Credit Risk

The Pool, through its investment managers, is a party to International Swap and Derivative Association, Inc. (ISDA) Master Agreements (MA) that may allow the netting of a counterparty's obligations against those of the Pool in the event of a default by the counterparty. The Pool is required to disclose the positions held at period end that were entered into pursuant to agreements that allow for such netting.

For financial reporting purposes, the Pool does not offset derivative assets and derivative liabilities that are subject to netting arrangements in the Statement of Net Position. The following table presents the Pool's derivative assets net of amounts available for offset under a netting provision and net of related collateral received by the Pool as of June 30, 2025:

Derivative Type	Derivative Assets Subject to a MA	Derivatives Available for Offset	Non-Cash Collateral Received	Cash Collateral Received	Net Exposure
Foreign Currency Forward Contracts	\$ 793	\$ (793)	\$ —	\$ —	\$ —
Swaps	13,660	(11,936)	(1,333)	—	391
Total	\$ 14,453	\$ (12,729)	\$ (1,333)	\$ —	\$ 391

West Virginia

Foreign currency forward contracts, certain swaps, and swaptions are exposed to counterparty credit risk. The WVIMB reviews available ratings from Standard & Poor's, Moody's, and Fitch and reports the rating indicative of the greatest degree of risk.

The following table provides the credit ratings for the Pool's derivative instruments that are subject to counterparty credit risk as of June 30, 2025:

Derivative Type	Counterparty Rating	Fair Value
Foreign currency forward contracts	A	\$ 564
Foreign currency forward contracts	BBB	793

Interest Rate Risk

The following table provides the time to maturity for derivative instruments that are subject to interest rate risk as of June 30, 2025:

Derivative Type	Fair Value	Investment	Maturities	(in	year)
		Under - 1	1 - 5	6 - 10	10+
Futures Contracts:					
Fixed Income Futures Long	\$ 6,003	\$ 5,527	\$ 476	\$ —	\$ —
Fixed Income Futures Short	(9,024)	(9,024)	—	—	—
Options Contracts:					
Fixed Income Options Purchased	2,022	2,022	—	—	—
Fixed Income Options Written	(2,720)	(1,813)	(907)	—	—
Interest Rate Swaps	5,559	—	1,779	4,654	(874)
	\$ 1,840	\$ (3,288)	\$ 1,348	\$ 4,654	\$ (874)

Interest rate swaps are highly sensitive to changes in interest rates. The following tables provide detailed information on derivative instruments that are highly sensitive to interest rate changes.

At June 30, 2025, the open positions in interest rate swaps denominated in U.S. dollars were as follows:

Maturity Date	Reference Rate	Notional	Fair Value
4/28/2028	Receive Fixed 3.30%, Pay Floating SOFR	\$ 195,319	\$ 512
2/24/2031	Receive Fixed 4.04%, Pay Floating SOFR	262,677	7,821
1/31/2032	Receive Floating SOFR, Pay Fixed 3.73%	248,774	(3,167)
11/15/2053	Receive Floating SOFR, Pay Fixed 3.77%	6,920	191
4/28/2036	Receive Floating SOFR, Pay Fixed 3.85%	45,421	(498)
2/24/2056	Receive Floating SOFR, Pay Fixed 3.99%	37,253	(567)
		\$ 796,364	\$ 4,292

At June 30, 2025, the open positions in interest rate swaps denominated in foreign currencies were as follows:

Maturity Date	Reference Rate	Notional	Fair Value
1/2/2030	Receive Fixed 14.76%, Pay Floating Brazil CDI	\$ 30,315	\$ 1,267

Reference Rate Index Definitions:
 SOFR: Secured Overnight Financing Rate
 Brazil CDI: Brazilian Interbank Deposit Rate

Foreign Currency Risk

The Pool has foreign currency forward contracts, futures contracts, and swap contracts that are denominated in foreign currencies and exposed to foreign currency risks. The amounts at fair value (in U.S. dollars) of derivative instruments in foreign currencies as of June 30, 2025, are as follows:

Currency	Foreign Currency Forward Contracts	Futures Contact	Swap Contracts	Total
Australian Dollar	\$ (159)	\$ 39	\$ —	\$ (120)
Brazilian Real	(2,334)	—	1,267	(1,067)

Total	\$ (4,016)	\$ (3,021)	\$ 10,537	\$ 3,500

Fair Value Measurements

U.S. GAAP does not require the pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. The table that follows sets forth information about the level within the fair value hierarchy at which the Pool's assets and liabilities are measured at June 30, 2025. The fair value measurement valuation techniques for the Total Return Fixed Income Pool's asset categories can be found on pages 82-84, except for the investments in other funds, which are measured using the net asset value per share practical expedient.

West Virginia

The table below summarizes the valuation of investment securities in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Assets	Level 1	Level 2	Level 3	Total
Bank Loans	\$ —	\$ —	\$ 3,636	\$ 3,636

Swaps	—	(23,405)	—	(23,405)
Total	<u>\$ (11,909)</u>	<u>\$ (28,778)</u>	<u>\$ —</u>	<u>\$ (40,687)</u>

The pool's investments in commingled debt funds were measured at the net asset value (NAV) as of June 30, 2025. These commingled debt funds invest in certain niche sectors, particularly ones that are not a significant percentage to the pool, to provide economies of scale and efficiencies in establishing and managing a diversified portfolio that would otherwise be difficult to achieve. The pool can redeem these investments daily.

Core Fixed Income Pool

The main objective of the Core Fixed Income Pool is to generate investment income and provide stability and enhance diversification, but not at the expense of total return. JP Morgan Investment Advisors manages this pool. This pool's investment objective is to outperform the Bloomberg U.S. Aggregate Bond Index over three-year to five-year periods, net of external management fees.

Credit Risk and Interest Rate Risk

The WVIMB limits the exposure to credit risk in the pool by maintaining at least an average rating of BBB (investment grade) as defined by a nationally recognized statistical rating organization. The WVIMB reviews available ratings from Standard & Poor's, Moody's, and Fitch, and reports the rating indicative of the greatest degree of risk. The money market mutual fund has the highest credit rating and the cash collateral account is not rated.

The following table provides the credit ratings in the Core Fixed Income Pool's fixed income investments as of June 30, 2025 (expressed in thousands):

Rating	Fair Value
AAA	\$ 80,792
AA	1,390,202
A	210,315
BBB	417,554
BB	9,905
B	203
CCC	106
Total Rated	<u>2,109,077</u>
Not Rated	121,334
Withdrawn	<u>16,076</u>
Total Investments	<u><u>\$ 2,246,487</u></u>

The pool is exposed to interest rate risk from its fixed income investments, money market mutual fund investment, and cash collateral account investment. As of June 30, 2025, the money market mutual fund has a WAM of 45 days. Except for repurchase agreements that can have up to 95 days to maturity, investments in the cash collateral account are limited to overnight investments. As of June 30, 2024, the WAM for the cash collateral account was 1 day.

The WVIMB monitors interest rate risk by evaluating the effective duration of the investments in the pool. Effective duration is a method of disclosing interest rate risk that measures the expected change in the price of a fixed income security for a 1% change in interest rates. The effective duration calculation makes assumptions regarding the most likely timing of variable cash flows, which is particularly useful for measuring interest rate risk of callable bonds, commercial and residential mortgage-backed securities, asset-backed securities, collateralized mortgage obligations, and variable-rate debt.

West Virginia

The following table provides the weighted average effective duration for the pool's fixed income investments as of June 30, 2025 (expressed in thousands):

Investment Type	Fair Value	Effective Duration (years)
Corporate ABS	\$ 227,337	2.0
Corporate CMO	102,426	2.2
Corporate CMO IO	90	0.6
Corporate CMO PO	1,512	0*
Foreign ABS	2,469	0*
Foreign Corporate Bonds	199,174	4.2

Municipal Bonds	8,429	8.1
U.S. Corporate Bonds	370,172	7.6
U.S. Government Agency CMO	111,974	5.0
U.S. Government Agency CMO IO	1,026	8.5
U.S. Government Agency CMO PO	1,520	5.0
U.S. Government Agency MBS	509,204	6.0
U.S. Treasury Issues	700,408	8.7
Total	<u>\$ 2,246,487</u>	

*Rounds to less than 0.05

The pool invests in commercial and residential mortgage-backed securities, asset-backed securities, and collateralized mortgage obligations. The cash flows from these securities are based on the payment of the underlying collateral. The effective duration and yield to maturity of these securities are dependent on estimated prepayment assumptions that consider historical experience, market conditions and other criteria. Actual prepayments may vary with changes in interest rates. Rising interest rates often result in a slower rate of prepayments while declining rates tend to lead to faster prepayments. As a result, the fair values of these securities are highly sensitive to interest rate changes. At June 30, 2025, the pool held \$957,559,000 of these securities. This represents approximately 43 percent of the value of the pool's fixed income securities.

Fair Value Measurements

The table below summarizes the valuation of the investment securities in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Assets	Level 1	Level 2	Level 3	Total
Corporate ABS	\$ —	\$ 221,937	\$ 5,400	\$ 227,337
Corporate CMO	—	102,426	—	102,426

U.S. Government Agency MBS	—	509,205	—	509,205
U.S. Treasury Issues	—	700,408	—	700,408
Total	\$ 19,939	\$ 2,309,025	\$ 5,400	\$ 2,334,364

The fair value measurement valuation techniques used for the Core Fixed Income Pool can be found on pages 82-84.

TIPS Pool

The pool was established to offer an additional level of diversification over and above nominal fixed income securities in an attempt to mitigate the risk of inflation. Northern Trust Investments manages this pool. The pool invests in Treasury Inflation-Protected Securities (TIPS) and its objective is to generate a return that exceeds the rate of inflation over a market cycle, to provide investment income and stability of principal, and to diversify interest rate exposure. The pool's performance is measured against the Bloomberg 1-10 Year Treasury Inflation Protected Securities (TIPS) Index on an annualized basis over rolling three-year to five-year periods, gross of fees.

Credit Risk and Interest Rate Risk

The WVIMB limits the exposure of credit risk in the Pool's fixed income investments by primarily investing in United States Treasury Inflation-Protected Securities (U.S. TIPS). The pool is exposed to credit risk from its money market mutual fund investment. The WVIMB reviews available rating from Standard & Poor's, Moody's, and Fitch, and reports the rating indicative of the greatest degree of risk. As of June 30, 2025, all of the pool's U.S. TIPS investments had a credit rating of AA. The money market fund has the highest credit rating. The pool is exposed to interest rate risk through its fixed income investments and money market mutual fund investment. The WVIMB monitors the interest rate risk of U.S. TIPS by evaluating the effective duration. Effective duration is a method of disclosing interest rate risk that measures the expected change in the price of a fixed income security for a 1% change in interest rates. As of June 30, 2025, the effective duration for the U.S. TIPS investments was 3.6 years. As of June 30, 2025, the money market mutual fund has a weighted average maturity of 45 days.

Fair Value Measurements

The table below summarizes the valuation of the investment securities in accordance with GASB 72 fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Assets	Level 1	Level 2	Level 3	Total
Money Market Mutual Fund	\$ 99	\$ —	\$ —	\$ 99
U.S. TIPS	—	537,350	—	537,350
Total	\$ 99	\$ 537,350	\$ —	\$ 537,449

Investments for which the fair value cannot be determined are valued at fair value as determined in accordance with the WVIMB's established procedures.

Private Markets Pool

The objective of the pool is to provide for long-term growth of participants' assets and risk-reduction through diversification. The pool primarily holds the WVIMB's investments in private credit & income funds, private equity funds, real estate investment trusts (REITs), and real estate limited partnerships and funds. Franklin Park, StepStone Group, and Verus have been retained by the WVIMB to provide consulting services related to the selection of limited partnerships and funds. Publicly traded assets are managed by CBRE Investment Management and Security Capital Research & Management.

Credit Risk and Interest Rate Risk

The pool is exposed to credit risk from its fixed income investments, money market fund investments, investments in unrated private credit and income funds, and the Cash Collateral Account investment. The WVIMB limits the exposure to credit risk in the pool by maintaining at least an average rating of BBB (investment grade) as defined by a nationally recognized statistical rating organization. The WVIMB reviews available ratings from Standard & Poor's and Moody's, and reports the rating indicative of the greatest degree of risk. The money market fund has the highest credit rating. The Cash Collateral Account is not rated. Credit risk associated with the unrated private credit and income funds is limited by requiring that underlying fund holdings are at least 90% collateralized by one or more assets of the issuer.

The following table provides the credit ratings in the Private Markets Pool's fixed income investments as of June 30, 2025 (expressed in thousands):

Rating	Fair Value
A	\$ 518
BBB	12,441
BB	1,204
CC	109
Total Investments	\$ 14,272

The pool is exposed to interest rate risk through its investments in U.S. corporate bonds, private credit and income funds, the money market mutual fund, and the Cash Collateral Account investment. The WVIMB monitors interest rate risk of U.S. corporate bonds by evaluating the effective duration. Effective duration is a method of disclosing interest rate risk that measures the expected change in the price of a fixed income security for a 1% change in interest rates. The effective duration calculation takes into account the most likely timing of variable cash flows, which is particularly useful for measuring interest rate risk of callable bonds and variable-rate debt. As of June 30, 2025, the effective duration for U.S. corporate bonds was 4.1 years. The WVIMB manages interest rate risk of the private credit and income funds by investing primarily in funds that originate or invest in loans that have a variable or floating interest rates, most of these investments have relatively short durations, and final maturities are within three-years to five-years. As of June 30, 2025, the money market mutual fund has a WAM of 45 days. Except for repurchase agreements that can have up to 95 days to maturity, investments in the Cash Collateral Account are limited to overnight investments. As of June 30, 2025, the WAM for securities lending collateral was 1 day.

Foreign Currency Risk

The pool holds foreign common stock, real estate limited partnerships and funds, and cash that is denominated in foreign currencies that are exposed to foreign currency risks. The investments in private equity partnerships and private credit and income funds might be indirectly exposed to foreign currency risk.

West Virginia

The amounts at fair value (U.S. dollars) if investments and cash denominated in foreign currencies as of June 30, 2025, (expressed in thousands):

Currency	Foreign Common Stock	Real Estate Limited Partnerships and Funds	Cash	Total

Total	\$ 6,034,683	\$ 2,046,236			

- (a) Investments without standard redemption frequencies cannot be redeemed until termination of the partnership.
- (b) Asset-backed credit funds typically invest in asset-backed loans collateralized by commercial or consumer receivables, assets, or loans, as well as other specialty types of commercial loans. This also includes real estate debt funds that invest in mezzanine or other subordinated real estate debt, and/or target higher risk properties than a typical core fund. Asset-backed credit investments are typically in the mid-range of the risk return spectrum of the private credit market.
- (c) Core private credit funds are primarily senior-secured commercial loans that are on the more conservative end of the spectrum of the private credit market. This may also include funds that invest in senior real estate mortgages and other debt that is structured such that it is considered to have a core risk/return profile. The returns on core private credit investments are expected to be derived from contractual income.
- (d) Specialty & opportunistic credit funds is a broad classification that includes different types of debt strategies that have the highest risk-return profile in the private credit market. This may include strategies that invest in distressed debt, complex capital solutions, special situation loans, or market dislocations. It also includes specialized financing to specific industries that are underserved by the general debt markets. The returns on these assets are generally derived from both contractual income and an equity component.
- (e) Corporate Finance – Buyout funds acquire controlling or influential interests in companies.
- (f) Corporate Finance – Distressed Debt funds acquire the debt of companies experiencing operational or financial distress, usually converting the debt to equity and exercising control of the business.
- (g) Corporate Finance – Growth Equity funds invest in companies to expand or restructure operations, enter new markets, or finance an acquisition.
- (h) Corporate Finance – Hard Assets funds acquire controlling or influential interests in companies operating in natural resources or infrastructure.
- (i) Corporate Finance – Mezzanine funds acquire or issue subordinated debentures frequently in businesses controlled by the General Partner, but in another fund.
- (j) Corporate Finance - Structured Capital funds combine common equity, preferred equity, fixed income, and/or customized debt instruments to offer capital appreciation with downside protection.
- (k) Corporate Finance – Turnaround funds acquire the debt and or equity of companies experiencing operational or financial distress in order to radically reorganize and improve the business.
- (l) Venture Capital funds make investments in early-stage through late-stage companies, frequently start-ups in technology or healthcare.
- (m) Core funds are more conservative real estate investments that use a very modest level of financing to acquire and hold high-quality, stable properties typically located in major markets. Assets within these strategies tend to have high occupancy rates, higher credit tenants, and staggered lease terms, with a number of long-term leases expiring in five to ten years.
- (n) Opportunistic funds have higher risk/return profiles and have broad strategies to achieve these types of returns. Common strategies are properties that need significant rehabilitation or a total redevelopment to transition to a different type of property (for example, converting an office building to condominiums). It may also include new development, distressed debt strategies, and more complex transactions, as well as a more traditional value-add strategy that is financed with a higher amount of leverage.
- (o) Value funds typically use more leverage than core funds and target higher return opportunities by acquiring properties that the manager believes they can add value through capital renovations to the physical facility or enhanced leasing and management activities. Most of these properties have in-place cash flow, which is expected to increase as the business plans are implemented. This could include making physical improvements to the asset that will allow it to command higher rents, increasing efforts to lease vacant space at the property to quality tenants, or improving the management of the property and thereby increasing customer satisfaction or lowering operating expenses where possible.

Hedge Fund

This pool was established to hold the WVIMB's investments in hedge funds. The objective of this pool is to reduce risk through diversification of participants' assets. The primary performance benchmark is the Hedge Funds Research, Inc. Fund of Fund Composite index plus 100 basis points. The secondary benchmark is the FTSE 3 Month US T-Bill Index plus

500 basis points. Albourne America has been retained by the WVIMB to provide consulting services for this investment strategy. The investments in hedge funds might be indirectly exposed to foreign currency risk, interest rate risk, and/or custodial credit risk. As of June 30, 2025, the pool was in compliance with this restriction and is not exposed to concentration of credit risk.

Fair Value Measurements

U.S. GAAP does not require the pool to categorize within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient.

All of the pool's investments in hedge funds were valued using the net asset value per share, and as such, they have not been categorized in the fair value hierarchy. The following table presents information on investments measured at the NAV as of June 30, 2025 (expressed in thousands):

Hedge Fund Strategies	Fair Value	Redemption Frequency	Redemption Notice Period
Directional (a)	\$ 515,109	Monthly, Quarterly	5 to 65 days
Equity Long/Short (b)	599,947	Quarterly	45 to 180 days
Event-Driven (c)	482,911	Quarterly, Annually	60 to 180 days
Long-Biased (d)	108,768	Monthly	90 days
Multi-Strategy (e)	318,279	Monthly, Quarterly	60 days
Relative-Value (f)	1,085,422	Weekly, Quarterly	5 to 90 days
	3,110,436		
In liquidation (g)	18,605		
Total Investment Measured at NAV	\$ 3,129,041		

- (a) Directional funds employ various techniques to forecast the direction of segments of the market and then invest in either short or long positions. The segments may be geographic economies, industry sectors, currency, or asset class. The investments may be in physical securities or derivatives. The strategies may be trend-following or mean-reverting and may be specific to that segment or universally applied across them. Investments representing approximately 27% of the fair value of the investments in this strategy are subject to maximum withdrawal restrictions.
- (b) Equity long/short funds involve taking long positions in stocks that are expected to increase in value and short positions in stocks that are expected to decrease in value. Investments representing approximately 76% of the fair value of the investments in this strategy are subject to maximum withdrawal restrictions.
- (c) Event-driven funds maintain positions in companies currently or prospectively involved in various corporate transactions, including, but not limited to, mergers, restructurings, financial distress, tender offers, shareholder buybacks, debt exchanges, security issuance, or other capital structure adjustments. Security types can range from most senior in the capital structure to most junior or subordinated, and frequently involve additional derivative securities. Event-driven exposure includes a combination of sensitivities to equity markets, credit markets and company-specific developments. All investments in this strategy are subject to maximum withdrawal restrictions.
- (d) Long-biased funds employ analytical techniques in which the investment thesis is predicated on assessment of the valuation characteristics on the underlying companies with the goal of identifying undervalued companies. Long-biased strategies may vary the investment level or the level of long exposure over market cycles, but the primary distinguishing characteristic is that the manager maintains consistent long exposure.
- (e) Multi-strategy funds combine several strategies within the same fund in order to provide diversification benefits to reduce return volatility and decrease asset-class and single-strategy risks. These funds typically add incremental returns through active allocation adjustments based on market opportunities. Risk is managed through a combination of quantitative and qualitative constraints, including, but not limited to, active risk, liquidity risk, currency risk, manager risk, derivatives risk, and leverage risk. All investments in this strategy are subject to maximum withdrawal restrictions.
- (f) Relative-value funds maintain positions in which the investment thesis is predicated on the realization of a valuation discrepancy in the relationship between multiple securities. Managers employ a variety of fundamental and quantitative techniques to establish investment insights, and security types range broadly across equity, fixed income, derivative, or other security types. Fixed income strategies are typically quantitatively driven to measure the existing relationship between investments and, in some cases, identify attractive positions in which the risk-adjusted spread between these instruments represents an attractive opportunity. Investments representing approximately 85% of the fair value of the investments in this strategy are subject to maximum withdrawal restrictions.
- (g) Funds currently in liquidation are no longer managed to a defined strategy. As the remaining underlying assets of these funds are monetized, their proceeds are distributed to shareholders. The timing of these future distributions is unknown.

Investments in hedge funds are securities for which market quotations are not readily available. The IMB has concluded that the net asset value reported by the underlying funds approximates the fair value of these investments and consequently these investments are carried at net asset value as a practical expedient for fair value. Due to the nature of the investments held by the funds, changes in market conditions and the economic environment may significantly impact the net asset value of the funds and, consequently, the fair value of the WVIMB's interest in the funds.

Although a secondary market exists for these investments, it is not active and individual transactions are typically not observable. When transactions do occur in this limited secondary market, they may occur at discounts to the reported net asset value. It is therefore reasonably possible that if the WVIMB were to sell these investments in the secondary market, a buyer may require a discount to the reported net asset value, and the discount could be significant. The WVIMB believes that the net asset value of such investments is a reasonable estimate of fair value at June 30, 2025.

Consolidated Fund

The Consolidated Fund is a statutory term for the collective investment of those monies not currently needed to fund state governmental operations or participation by local governments, or those monies that are required by other statutory provisions to be invested in the Consolidated Fund. The following six investment pools and participant-directed accounts comprise the Consolidated Fund and are managed by the BTI.

Board of Treasury Investments

WV Money Market

This pool consists of the operating funds of the State, funds held by state agencies, and funds from local governments that desire the opportunity to invest with the State. Its purpose is to provide for the investment of all surplus funds and to supply the daily cash needs of the State. The pool is co-managed by Federated Hermes and UBS Global Asset Management.

Credit Risk

The BTI limits the exposure to credit risk in the WV Money Market Pool by requiring all corporate debt to be rated A+ or higher by Standard & Poor's (or its equivalent) and short-term corporate debt be rated as A-1 or higher by Standard & Poor's (or its equivalent).

The following table provides information on the credit ratings as of June 30, 2025, of the WV Money Market Pool's investments (expressed in thousands):

Security Type	Rating	Carrying Value	Percent of Pool Assets
Corporate Bonds and Notes	A-1+	\$ 35,000	0.40%
Commercial Paper	A-1+	\$ 3,314,070	38.42%
	A-1	2,751,539	31.90%
Negotiable Certificates of Deposit	A-1+	841,000	9.75%
	A-1	696,010	8.07%
Money Market Funds	AAAm	3,691	0.04%
Repurchase Agreements (Underlying Securities):			
U.S. Treasury Bonds and Notes *	AA+	846,600	9.81%
U.S. Agency Bonds and Notes	AA+	138,500	1.61%
Total		<u>\$ 8,626,410</u>	<u>100%</u>

* U.S. Treasury issues are explicitly guaranteed by the U.S. Government and are not subject to credit risk.

Interest Rate Risk

The overall weighted average maturity of the investments of the WV Money Market Pool cannot exceed 60 days. Maximum maturity of individual securities cannot exceed 397 days from date of purchase, except for government floating rate notes, which can be up to 762 days.

The following table provides information on the WAM for the various asset types in the WV Money Market Pool as of June 30, 2025 (expressed in thousands):

Security Type	Total Carrying Value	Primary Government	Investment Trust Funds	Custodial Funds	Component Units	WAM (Days)
Corporate Bonds and Notes	\$ 35,000	\$ 21,895	\$ 3,112	\$ 392	\$ 9,601	1

Percentage of Ownership	100%	62.56%	8.89%	1.12%	27.43%	

WV Government Money Market

This pool consists of investors who wish to invest in a pool that restricts its investments to U.S. Government Obligations, U.S. Government Agency Obligations, or repurchase agreements. The pool is managed by UBS Global Asset Management.

Credit Risk

The BTI limits the exposure to credit risk in the WV Government Money Market Pool by limiting the pool to U.S. Treasury issues, U.S. Government Agency issues, money market funds investing in U.S. Treasury issues and U.S. Government Agency issues, and repurchase agreements collateralized by U.S. Treasury issues and U.S. Government Agency issues.

The following table provides information on the credit ratings of the WV Government Money Market Pool's investments as of June 30, 2025 (expressed in thousands):

Security Type	Rating	Carrying Value	Percent of Pool Assets
U.S. Treasury Notes*	AA+	\$ 99,916	17.45%
U.S. Treasury Bills*	A-1+	95,693	16.71%
U.S. Agency Bonds and Notes	AA+	101,440	17.72%
Money Market Funds	AAAm	108	0.02%
Repurchase Agreements (Underlying Securities):

WV Short-Term Bond

This pool consists of the operating funds of the State that are not immediately needed to fund the State's liquidity requirements. The pool is managed by Sterling Capital Management.

Credit Risk

The BTI limits the exposure to credit risk in the WV Short-Term Bond Pool by requiring all corporate debt be rated BBB- or higher by Standard & Poor's (or its equivalent) and all short-term corporate debt be rated A-1 or higher by Standard & Poor's (or its equivalent). Mortgage-backed and asset-backed securities must be rated AAA by Standard & Poor's (or its equivalent).

West Virginia

The following table provides information on the credit ratings of the WV Short-Term Bond Pool's investments as of June 30, 2025 (expressed in thousands):

Security Type	Rating	Carrying Value	Percent of Pool Assets
U.S. Treasury Notes*	AA+	\$ 133,819	18.60%

Fair Value Measurements

The table below summarizes the valuation for the WV Short-Term Bond Pool in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Investment Type	Level 1	Level 2	Level 3	Total
U.S. Treasury Notes	\$ 133,819	\$ —	\$ —	\$ 133,819
U.S. Agency Collateralized Mortgage Obligations	—	2,710	—	2,710
Corporate Fixed-Rate Bonds and Notes	—	372,078	—	372,078
Corporate Floating-Rate Bonds and Notes	—	3,510	—	3,510
Commercial Mortgage-Backed Obligations	—	6,929	—	6,929
Municipal Securities	—	20,556	—	20,556
Asset-Backed Securities	—	168,645	—	168,645
Money Market Funds	10,736	—	—	10,736
Total	\$ 144,555	\$ 574,428	\$ —	\$ 718,983

The valuation methodologies and inputs presented below are used in the fair value measurements for investments in securities in the WV Short Term Bond Pool classified as Level 2 in the preceding table.

Loan Pool

This pool is composed of loans made by the State. The \$1 unit price is utilized for accounting purposes only. There are two loan programs authorized by statute that are accounted for in the Loan Pool: the WVEDA Broadband Loan and the WVDOT Infrastructure Investment Revolving Loan. The State is the sole participant in this pool. This pool primarily holds intergovernmental loans and an investment in a government money market mutual fund in the amount of approximately \$213,000 using Level 1 inputs with a weighted-average maturity of one day which is rated AAA by Standard & Poor's. The loans are not rated by any nationally recognized statistical rating organization; however, as there is the potential for defaults, they are exposed to credit risk. For financial statement purposes, the

intergovernmental loans are reflected in the Advances to Component Units line on the Statement of Net Position. The BTI addresses the credit risk by evaluating the need for and establishing a reserve for uncollectible loans.

Participant-Directed Accounts

The BTI also maintains pools for individual state agencies with specific investment needs. These pools include the following: West Virginia Term Deposit Account and School Fund. Each agency is the sole owner of its account and is responsible for providing the BTI with investment guidelines that are consistent with the legal restrictions applicable to the assets in the account. The BTI manages these accounts in accordance with the accounts' investment guidelines and directions from the account owners.

WV Term Deposit Account

This account is composed of term deposit accounts in the state depositories totaling approximately \$40,268,000. The account also holds an interest in a government money market mutual fund valued at \$27,000 using Level 1 inputs with a weighted average maturity of 1 day. The mutual fund is rated AAAm by Standard & Poor's. The term deposit accounts are not rated. The BTI addresses credit risk, with respect to depository accounts, by requiring balances in excess of insurance coverage provided by an agency of the federal government be collateralized in accordance with West Virginia Code. The BTI does not have a policy specially addressing credit risk of other investments and does not specifically address maturity restrictions as a means of managing exposure to fair value losses in this account arising from increasing interest rates.

School Fund

The School Fund account holds an interest in a government money market mutual fund valued at \$1,030,000 using Level 1 inputs with a weighted-average maturity of one day. The mutual fund is rated AAAm by Standard & Poor's. The BTI's does not have a policy specifically addressing credit risk nor does it specifically address maturity restrictions as a means of managing exposure to fair value losses in this account arising from increasing interest rates.

This schedule reconciles disclosed investment values to net asset values of the pools as reflected in the accompanying financial statements, at IMB and BTI at June 30, 2025 (expressed in thousands):

IMB Pools	Disclosed Value	Pool Receivables/ (Payables)	Net Asset Values

West Virginia

Fair Value Measurements

U.S. GAAP does not require the categorization within the fair value hierarchy table investments for which fair value is measured using the net asset value per share practical expedient. All of the outside investments were valued using the net asset value per share practical expedient. These investments involve varying degrees of illiquidity and varying times of commitments to those investments.

The table below summarizes the valuation of the investment securities in accordance with the fair value hierarchy levels as of June 30, 2025 (expressed in thousands):

Security Type	Investment Amount	Level Amounts		
		1	2	3
Primary Government:

Leases Receivable

The Economic Development Authority (EDA) entered into long-term financing agreements with commercial entities for land, buildings, and equipment. A schedule of future lease amounts due is as follows:

Year Ending June 30	Future Lease Amount Due
2026	\$ 4,320
2027	4,656
2028	4,006
2029	3,437
2030	2,761
2031-2045	<u>7,729</u>
Total Minimum Amount Due	26,909
Less Amount Representing Interest	(2,293)
Present Value of Minimum Lease Amount Due	<u>\$ 24,616</u>

NOTE 5

PRIVATE PUBLIC PARTNERSHIPS

During the fiscal year ended June 30, 2023, the Parkways Authority (transferor) entered into a lease and operation agreement with Areas USA WVTP, LLC (operator). The agreement was determined to be a PPP and has four separate PPP components. The PPP arrangement began on February 1, 2023, and ends on December 31, 2037. The PPP arrangement provides for a guaranteed base rent which is increased over the term of the contract. Guaranteed monthly installment payments range from \$6,000 to \$120,000. Variable payments are based on the percentage of sales for food, beverages, and retail and are only received if the percentage-based rent exceeds the guaranteed-base rent. Since the variable payments are not fixed in substance, such payments are excluded as a component of the PPP receivable. The Parkways Authority has determined the net present value of PPP receipts based on an estimated interest rate of 6.50% based on market conditions at the commencement of the PPP arrangement.

Under the PPP arrangement, the operation has committed to invest in improvements to three of the PPP assets owned by the Parkways Authority. As of June 30, 2025 construction is currently in progress to improve two travel plazas. Construction is expected to commence on the third travel plaza in fiscal year 2025. At the end of the PPP arrangement, the Parkways Authority will retain ownership of all travel plazas and improvements.

At June 30, 2025, the Parkways Authority's total PPP receivable and deferred inflows of resources related to the PPP was \$17.8 million and \$15.3 million respectively. For the year ended June 30, 2025 the Parkways Authority recognized PPP revenue of \$1.23 million, which is included in other revenues on the statement of revenues, expenses, and changes in net position. Interest income related to the PPP totaled \$1.2 million for the year ended June 30, 2025. Variable payments not included as a component of the PPP receivable were \$29,000 for the year ended June 30, 2025.

West Virginia University has entered into various PPPs for the development and operation of residential, retail, and parking facilities. WVU has one contract for services, with ACC OP, that meets the four criteria of a service concession arrangement (SCA) per GASB Statement No. 94. This contract, for student housing (College Park, WV), resulted in the recording of capital asset and a deferred inflow. This deferred inflow, presented as a SCA, had a balance of \$30.1 million at June 30, 2025, and is amortized to auxiliary enterprise revenue over its 40-year term during the year ended June 30, 2025, WVU recognized \$1 million in inflows from this arrangement. Overall, WVU's accounts receivable from all PPPs totals approximately \$9.6 million at June 30, 2025.

The terms of the remaining PPPs generate distinct financial flows and commitments. The student housing and retail agreements (WVCH, UPE, and WVU Connector) generally provide for the external partners to retain facility revenues while remitting management fees and a portion of net receipts to the WVU. In contrast, the agreement for the parking facilities (DCPA) establishes a financial obligation, requiring WVU to remit all net parking revenues as lease payments and subsidize debt-service shortfalls as they arise. Additionally, WVU retains a limited obligation to cover debt-service shortfalls for the WVCH project, which as required through June 30, 2025.

NOTE 6

INTERFUND BALANCES AND DUE TO/DUE FROM COMPONENT UNITS

The following table details the interfund balances and due to/due from component units activity as of and for the year ended June 30, 2025 (expressed in thousands) for both reciprocal and nonreciprocal financial interactions between funds.

(a) The deferred charge of the amortization of the future tobacco settlement revenue of the Tobacco Settlement Finance Authority resulted in a transfer of \$16.2 million to the General Fund.

(b) The General Fund transferred \$22 million to the West Virginia Infrastructure and Jobs Development Council, a \$12 million offset in the Economic Development Project Fund for bond debt service, \$14.8 million to the Department of Corrections and Rehabilitation for bond debt service, \$6.4 million to the Division of Natural Resources for bond debt service.

(c) The Water Pollution Revolving Fund received \$49.8 million in grants from the West Virginia Department of Environmental Protection. All other transfers are made to finance various programs to the Legislation.

(d) Alcohol Beverage Control Administration transferred \$33 million that are statutory transfers based on operations and liquor license renewals.

(e) The West Virginia Drinking Water Treatment Revolving Fund received \$32.4 million of matching grant funds from the West Virginia Infrastructure and Jobs Development Council.

(f) The General Fund transferred \$46 million to the State Building Commission and \$1.5 million to the Aviation Division. The Office of Technology received \$7 million from the General Fund and \$9.5 million of transfers to consolidate accounts that were previously in the general fund.

NOTE 8

RESTRICTED ASSETS

Restricted assets are held by special revenue funds, enterprise funds, internal service funds, and discretely presented component units, primarily for the repayment of future long-term obligations and benefits payments. The restricted assets, composed of cash, investments, and other similar assets at June 30, 2025, are as follows (expressed in thousands):

	Cash	Investments	Other	Totals
Special Revenue:				
Environmental Programs	\$ 246	\$ —	\$ —	\$ 246

Total Restricted Assets	\$ 1,124,826	\$ 177,074	\$ 1,582,956	\$ 2,884,856

Special Revenue Funds

Environmental Protection has restricted cash held in trust “to protect human health and the environment, in accordance with the terms of the State and Federal Consent Decrees....” The Public Service Commission (PSC) has restricted cash held in trust in accordance with PSC General Order 250-T. The funds are for Telecommunications Relay Services under the Americans with Disabilities Act.

Enterprise Funds

The Public Employees' Insurance Agency's restricted assets are the premium stabilization fund consisting of accumulated dividends and interest on optional life insurance policies to defray future premium increases. The Board of Risk and Insurance Management's (BRIM) cash and investment assets include funds to provide mine subsidence coverage to the general public. BRIM's other restricted assets include advance deposits with insurance companies of \$294 million and \$1.2 million in receivables. The Infrastructure and Jobs Development Council's assets are restricted for bond indentures and enabling Legislation. The Alcohol Beverage Control Administration's assets are restricted through enabling legislation that consists of notes and interest receivable from the Retail Liquor License Board re-bid, which are required by state code to be distributed to the State of West Virginia.

Internal Service Funds

The State Building Fund's restricted assets are held in trust primarily for the costs of asbestos removal and other capital projects. Travel Management Fund's restricted assets are held in escrow for capital outlay.

Discretely Presented Component Units

The Economic Development Authority's assets are restricted to provide assurance that adequate amounts will be available to repay notes secured by the real estate being leased and to guarantee portions of certain loans made for economic development purposes. The Housing Development Fund's cash and cash equivalents assets are restricted on behalf of mortgagors and for payments collected on mortgages for which the fund acts as service only. The investments are primarily United States government and agency obligations, investment agreements, and certificates of deposit with maturities greater than 90 days to meet the requirements of bond resolutions. Other restricted assets for the Housing Development Fund of \$1.2 billion include certain foreclosed properties, properties developed for flood activities, other land for restricted housing purposes, and miscellaneous receivables. These assets are restricted subject to the provisions of bond resolutions, or state or federal regulations. The Parkways Authority's assets, restricted by the Tri-Party Agreement dated December 1988, can only be used for turnpike maintenance and operation, and debt service. These assets are restricted for Turnpike capital costs, renewal and replacement costs, operation and maintenance expenses, and debt service. The cash and investment assets of the Water Development Authority are restricted as part of applicable bond covenants and the other restricted assets are \$110 million restricted for revenue bonds receivable net of unamortized discount. The WV Division of Corrections and Rehabilitation's assets are restricted because of a safekeeping arrangement with inmates and for debt service and compliance with bond covenants. The Solid Waste Management Board's assets are restricted because their use is limited by applicable repayment agreements and certain assets are set aside to administer a revolving loan program in accordance with appropriations by the Legislature. The Educational Broadcasting Commission's (EBC) other restricted assets are in a charitable trust allowing the use of part of the interest to benefit the EBC. The West Virginia Racing Commission's cash is restricted for unclaimed winning tickets and other trust holdings which are mandated by West Virginia Code.

The assets of the general, special revenue, and internal service funds are used to liquidate the other financing debt obligations and accrued and other liabilities of their respective fund types. Compensated absences liabilities are liquidated by the applicable governmental and internal service funds that account for the salaries and wages of the related employees, with the majority of the funds coming from the General Fund. The net pension liabilities are liquidated by the State's governmental and internal service funds that contribute toward the pension funds based on plans established by the action of the State Legislature. The net pension liability and other postemployment benefits liability (OPEB) are adjusted each year based upon changes to participants, investment performance, contributions received and changes to actuarial assumptions. Please refer to Notes 12 and 13 for additional information related to the pension liability and OPEB. Internal service funds predominantly serve the governmental funds. Accordingly, long-term liabilities for them are included as part of the totals for governmental activities. At year-end, \$5 million of internal service funds' compensated absences are included in the governmental amounts.

Senate Bill No. 1002, enacted in January 2005, provides that on and after February 1, 2005, bonds may not be issued or refunded by the State or any of its agencies, boards, or commissions without the express written direction of the governor if (1) the ultimate user of the proceeds of the bonds is the State or any of its agencies, boards, commissions, or departments or (2) the issuance or refunding of the bonds implicates the State's credit rating.

Compliance – Various debt agreements governing the State's bonds contain a number of covenants, including continuing disclosure requirements, debt service coverage ratio, and maintaining debt service reserve and maintenance reserve funds. It is required that debt service reserve funds and maintenance reserve funds are to be held with a trustee. As of June 30, 2025, the debt service reserve funds approximated \$36.4 million, and the maintenance reserve funds approximated \$12 million.

General Obligation Bonds – The State has constitutionally limited its ability to incur debt. The State's general obligation debt must be authorized by constitutional amendment. A proposed amendment must be approved by two-thirds of both the Senate and the House of Delegates before it can be ratified or rejected by the voters. Once the amendment has voter

approval, the Legislature must pass specific legislation authorizing the issuance of general obligation debt, such as bonds for the facilitation of the construction of highways, secondary roads and bridges, as well as for utility upgrades for water and sewer systems. The general obligation bonds are secured by pledged receipts of annual tax revenue.

General obligation bonds outstanding (including premium or discount) at June 30, 2025, were as follows (expressed in thousands):

	Final Maturity Date	Interest Rate(s)%	Balance
Transportation Bonds:			
Payable from State Road Fund to build roads, issued under:

Revenue Bonds – Revenue bonds are issued by various state departments, agencies and authorities, and economic development projects. Revenue bonds are issued pursuant to specific statutory provisions enacted by the Legislature primarily for the purpose of financing capital construction. Principal and interest payments are made from specifically dedicated fees and other revenues. Revenue bonds do not constitute a general obligation of the State.

Revenue bonds outstanding (including premium or discount) at June 30, 2025, were as follows (expressed in thousands):

Certain revenue bonds have call provisions providing for redemption at the option of the State, beginning ten years following the date of issuance, in whole or in part, in inverse order of maturity, and pay a redemption price not exceeding 103% of par value.

The following describes the purpose and dedicated revenue source of revenue bonds outstanding at June 30, 2025:

Agency	Purpose	Revenue Source
Transportation	Highway, road, and bridge construction	Federal reimbursement allowed by Title 23, Section 122
Economic Development Project Fund	To provide grants for various economic development projects	Certain net profits of the West Virginia Lottery
Education, Arts, Sciences, and Tourism Fund	Capital projects which promote education, arts, sciences, and tourism	Certain net profits of the West Virginia Lottery
WV Infrastructure and Jobs Development Council	To fund water and sewer infrastructure projects	Certain repayments of defined loans

The Division of Highways

The Division of Highways has been authorized to issue revenue bonds in the amount of \$500 million by constitutional amendment. The Division has issued \$352 million, and paid off \$171 million, leaving \$319 million in bonds authorized but not issued. The revenue notes are secured by pledged receipts of eligible Federal Highway Administration (FHWA) funds received by the Division, representing reimbursement of the costs incurred in connection with the federal-aid projects financed by Surface Transportation Improvements Special Obligation Notes, GARVEE revenue notes.

Economic Development Project Fund

The Economic Development Project Fund bonds, issued by EDA in FY 2004 in the amount of \$249.9 million to provide financing for various economic development project grants, are payable through 2029. The State has committed to appropriate each year, from the West Virginia Lottery net profits, amounts sufficient to cover the principal and interest requirements on the EDA debt. EDA has pledged these revenues as the sole security for the bonds. This debt was fully paid off early during fiscal year 2025.

Economic Development DNR

In FY 2018, the EDA issued bonds in conjunction with the Division of Natural Resources. These bonds are primarily payable from money transferred from the State Excess Lottery Revenue fund. The funds will be used to acquire land and build and maintain the newly created Cacapon Resort State Park. The initial bond of \$22.9 million was issued at 3.23% interest, and the maintenance reserve bond of \$2 million was issued at 2.03% interest. Both bonds mature in June 2040.

In FY 2019, the EDA issued \$55.2 million in bonds in conjunction with the Division of Natural Resources for state park projects. The funds will be used for capital improvement projects at any state park. The bonds are payable solely from the special revenue fund named the "State Parks Lottery Revenue Debt Service Fund" within the State Treasury. The bonds bear interest at 3.125% to 5.00% and are payable through 2040.

EAST Fund

Education, Arts, Sciences, and Tourism Fund (EAST) bonds were issued by the EDA in FY 2018 in the amount of \$142.6 million to provide financing for capital projects which promote education and tourism, payable through 2040. The State has committed to appropriate each year, from the Lottery's net profits, amounts sufficient to cover the principal and interest requirements on the EDA debt. EDA has pledged these revenues as the sole security for the bonds. Total principal remaining on the debt is \$110.6 million. For the current year, principal and interest paid were \$9.9 million, and the net profits of the Lottery committed to the debt were \$10 million.

Direct Placements & Direct Borrowings

Revenue Bonds

The following describes the purpose and dedicated revenue source of direct placement revenue bonds outstanding at June 30, 2025:

Agency	Purpose	Revenue Source
Tobacco Settlement Finance Authority	To issue bonds to receive lump sum in lieu of future annual payments from MSA	100% of receipts from Tobacco MSA until bonds are paid

Tobacco Settlement Finance Authority (TSFA)

The Taxable Tobacco Settlement Asset-Backed Bonds, Series 2007 were issued by the TSFA created by Chapter 4, Article 11A of the West Virginia Code on June 26, 2007.

On October 28, 2020, the TSFA issued Taxable Tobacco Settlement Asset-Backed Refunding Bonds, Series 2020 Senior Bonds, consisting of \$528.3 million Series 2020A (Fixed Amortization Serial/Term Bonds) Class 1 Senior Current Interest Bonds as Class 1 Senior Bonds and \$165.2 million Series 2020B (Turbo Term Bonds) Class 2 Senior Current Bonds as Class 2 Senior Bonds. The TSFA used \$737.2 million of the proceeds of the Series 2020 Senior Bonds to fully refund \$612.3 million of the Taxable Tobacco Settlement Asset-Backed Bonds, Series 2007A through redemption and defeasance and partially refund \$73.9 million of the Series 2007B bonds through payment of the purchase price thereof and cancellation. The proceeds were also used to establish Maintenance Reserve Accounts to comply with the bond covenants and pay bond issuance costs. The 2020 refunding resulted in a difference between the reacquisition price and the net carrying amount of the refunded bond of \$51 million. The TSFA completed the refunding to reduce its total debt service payments by reducing the expected debt service payments by \$315.9 million.

Direct placement revenue bonds outstanding at June 30, 2025, were as follows (expressed in thousands):

	Issue Date	Maturity Date	Interest Rate(s)%	Balance

Notes Payable – Notes payable are a direct borrowing issued by Information Services and Communications and Travel Management internal service funds for financing various equipment and vehicles.

The outstanding notes from direct borrowings contain a provision that in an event of default, the note is terminated, and the owner may retake possession of the equipment and vehicles. The note is immediately declared due and payable and will proceed to court action to recover the value of the amount due.

Notes Payable – Direct Borrowings

Notes payable are issued for various reasons, including construction and the purchase of land, buildings, and vehicles. The Housing Development Fund (HDF) has a partnership with the DEP that allows HDF to borrow funds from the DEP that are then loaned to state residents to upgrade, replace, or repair inadequate septic systems. For detailed information on specific notes, see the separately issued financial statements of the discretely presented component units.

The following is a summary of notes payable at June 30, 2025 (expressed in thousands):

	Issue Date	Final Maturity Date	Interest Rate(s)%	Balance

Debt Contingencies and No-Commitment Debt

As a vehicle to assist the local and other nonstate governments in West Virginia, the State may appropriate sufficient amounts to meet any deficiencies that may arise because of failures by such entities to provide for debt service payments for obligations under the supervision and control of the Municipal Bond Commission. For the year ended June 30, 2025, no such amounts were transferred to the Municipal Bond Commission under this agreement.

The Hospital Finance Authority (HFA) and the Economic Development Authority (EDA) have issued special limited obligations on behalf of third parties that in no way obligate the State, HFA, or EDA for these debt issuances, unless these entities or the State serve in a third-party role. The obligations become an obligation of the third party when issued because all rights to payments and/or obligations have been irrevocably assigned to a trustee. Payments are made directly to the trustee from dedicated revenues of the third parties, in accordance with the related bond indentures. The amount of such no-commitment debt outstanding at June 30, 2025, is approximately \$3.5 billion and \$5.9 billion for HFA and EDA, respectively.

Prior Defeasances

In prior years, the State defeased certain revenue bonds by placing the proceeds of new bonds in irrevocable trusts to provide for all future debt service payment on the old bonds. Accordingly, the trust account assets and the liability for the defeased bonds are not included in these financial statements. At June 30, 2025, the following outstanding bonds are considered defeased (expressed in thousands):

Outstanding Amount	
Primary Government	\$ 681,760
Discretely Presented Component Units	58,705
Total	<u>\$ 740,465</u>

NOTE 11

RIGHT-TO-USE LEASES

Effective July 1, 2021, the State adopted GASB issued Statement No. 87 “Leases”. According to the standard, a contract that conveys control of the right-to-use another entity’s nonfinancial asset as specified in the contract for a period of time in an exchange or exchange-like transaction be considered a lease. All leases that meet the criteria under this standard entered into by the State prior to the date of implementation on July 1, 2021, are measured using the facts and circumstances that existed at the beginning of the period of implementation. The State is not required to estimate what the lease asset would have been if it initially had been recognized and amortized in prior periods as a lease under the provisions of Statement 87. The lease liability for leases previously entered into was measured using the remaining lease term and discount rate as of the beginning of the earliest period restated, July 1, 2021. The right-to-use asset was measured based on the lease liability at that date and no restatement of beginning net position is required because the lease asset and the liability would be the same.

The State leases various buildings, equipment, and land for various terms under long-term noncancelable lease agreements. The leases have various due dates ranging through fiscal year 2076 and interest rates ranging from 3.10% to 6.50%.

At the commencement of a new lease, the State initially measures the lease liability at the present value of payments expected to be made during the lease term. Subsequently, the lease liability is reduced by the principal portion of lease payments made. There are no variable payments, residual value guarantees, or termination penalties included within the lease liability of any State leases. The lease asset is initially measured as the initial amount of the lease liability, adjusted for lease payments made at or before the lease commencement date, plus certain initial direct costs. Subsequently, the lease asset is amortized on a straight-line basis over the term of the lease.

Key estimates and judgments related to leases include how the State determines (1) the discount rate it uses to discount the expected lease payments to present value, (2) lease term, and (3) lease payments.

- The State uses an estimated incremental borrowing rate as the discount rate for leases unless the interest rate charged by the lessor is provided. The discount rate is used to determine the present value of lease payments over the lease term. The incremental borrowing rate for all State leases ranged from 3.10% to 6.50%.
- The lease term is the noncancelable period of the lease. This includes periods in which there is an option to extend or terminate the lease if it is reasonably certain that the option will or will not be exercised.
- Lease payments included in the measurement of the lease liability are composed of fixed payments. There are no purchase options in the measurement of the lease liability for any State leases.

The State monitors changes in circumstances that would require a remeasurement of its lease and will remeasure the lease asset and liability if certain changes occur that are expected to significantly affect the amount of the lease liability. No such remeasurements occurred in the current year.

Lease assets are reported with other capital assets and lease liabilities are reported with long-term debt on the statement of net position. For all leases, the State recognizes a lease liability and an intangible right-to-use asset (lease asset) in the government-wide financial statements. Leasing arrangements with a cost greater than \$25,000 annually are recognized by the State as a right-to-use asset.

For leases in governmental funds, other financing sources equal to the present value of the expected payments over the lease term are recorded at lease inception. Lease payments are recorded as debt service expenditure when paid.

Several lease agreements entered into by component units of the State are sublease agreements for leased equipment and land with monthly installments ranging between \$250 and \$901 plus interest at 4.50% to 6.50% with due dates ranging from June 2028 to December 2042.

The following table is an analysis of the leases by major asset type at June 30, 2025, (expressed in thousands):

Asset Type	Right-to-Use Leased Asset	Accumulated Amortization	Net Right-to-Use Asset
Governmental Activities:			
Building	\$ 156,787	\$ (55,146)	\$ 101,641
Total Governmental Activities	156,787	(55,146)	101,641
Discretely Presented Component Units:			
Building	\$ 121,744	\$ (31,423)	\$ 90,321
Land	126	(39)	87
Equipment	5,937	(1,468)	4,469
Total Discretely Presented Component Units	127,807	(32,930)	94,877
Total	\$ 284,594	\$ (88,076)	\$ 196,518

West Virginia

Future principal and interest lease payments as of June 30, 2025, were as follows (expressed in thousands):

Year Ending June 30	Governmental Activities		Discretely Presented Component Units		Total
	Principal	Interest	Principal	Interest	
2026	\$ 18,015	\$ 3,957	\$ 10,063	\$ 3,941	\$ 35,976
2027	14,784	3,305	8,821	3,497	30,407
2028	13,792	2,731	7,578	3,169	27,270
2029	12,510	2,196	6,718	2,870	24,294
2030	9,825	1,738	5,915	2,624	20,102
2031-2035	25,814	4,570	16,536	10,328	57,248
2036-2040	7,885	1,620	6,138	8,252	23,895
2041-2045	3,370	498	6,054	7,332	17,254
2045-2050	414	227	6,663	6,438	13,742
2051-2055	505	136	6,152	5,506	12,299

2071-2075	—	—	10,205	923	11,128
2076-2076	—	—	919	7	926
Total Minimum Lease Payments	\$ 107,324	\$ 21,008	\$ 114,707	\$ 65,324	\$ 308,363

Under GASB Statement No. 87, a lessor is required to recognize a lease receivable and a deferred inflow of resources for each lease. There are no variable payments in any of the lessor agreements noted below.

During the fiscal year June 30 2025, the Educational Broadcasting Commission (EBC), a component unit of the State, a lessor, leased land, equipment, and buildings under various noncancelable lease agreements. Several of these agreements are sublease arrangements. The lease agreements contain lease terms with planned end dates ranging from August 2026 to May 2047. Lease payment rates, terms, cancellation clauses, and other provisions very based on the lease agreement. Certain leases provided for increases in future minimum annual rental payments. WVEBA has determined the net present value of lease receipts based on an estimated interest rate of 4.50%. Lease related income under these leases for the year ended June 30, 2025, was \$118 and \$54 for lease income and interest income, respectively.

The West Virginia Economic Development Authority, a component unit of the State, lease certain property to commercial entities under direct financing leases with planned end dates ranging from 2028 to 2036. Lease payment rates, terms, cancellation clauses, and other provisions very based on the lease agreement. Under the terms of the leases, either the lessor or lessee may elect to adjust the basic rent as of each successive fifth anniversary date following the lease commencement date by an amount necessary to fully amortize the initial purchase price based on the prevailing interest rate on such anniversary date. Lease-related income including interest under these lease for the year ended June 30, 2025, was \$885.

The West Virginia Higher Education Fund (Fund), a component unit of the State, leases facilities and land under various lease agreements. The lease agreements contain lease terms with planned end dates ranging from 2025 to 2056. Lease payment rates, terms, cancellation clauses and other provisions very based on the lease agreement. Certain real estate leases provided for increases in future minimum monthly and annual rental payments. Lease-related income including interest under these leases for the year ended June 30, 2025, was \$1,449.

NOTE 12

SUBSCRIPTION BASED INFORMATION TECHNOLOGY ARRANGEMENTS

Effective July 1, 2022, the State adopted GASB issued Statement No. 96, “Subscription-Based Information Technology Arrangements.” According to the standard, a contract that conveys control of the right-to-use another party’s (a SBITA vendor’s) information technology (IT) software, alone or in combination with tangible capital assets (the underlying IT assets), as specified in the contract for a period of time in an exchange or exchange-like transaction be considered a SBITA. All contracts that meet the criteria under this standard entered into by the State prior to the date of implementation on July 1, 2022, are measured using the facts and circumstances that existed at the beginning of the period of implementation. The State is not required to estimate what the asset would have been if it initially had been recognized and amortized in prior periods under the provisions of Statement 96. The subscription liability for subscriptions previously entered into was measured using the remaining subscription term and discount rate as of the beginning of the earliest period restated, July 1, 2022. The right-to-use subscription asset was measured based on the subscription liability at that date and no restatement of beginning net position is required because the subscription asset and the liability would be the same.

The State has SBITAs for risk, ransomware monitoring, multi-biometric identification, electronic filing, property tracking, laboratory information management and healthcare for various terms under long-term, noncancelable agreements. The agreements have various due dates ranging through fiscal year 2029 and interest rates ranging from 3% to 9.15%.

At the commencement of a new SBITA, the State initially measures the subscription liability at the present value of payments expected to be made during the subscription term. Subsequently, the subscription liability is reduced by the principal portion of subscription payments made. The State had no variable payments (fixed in substance or based on an index or rate), residual value guarantees, or termination penalties included within the subscription liability of any State SBITAs. Variable payments based on future performance of a government, usage of the underlying IT assets, or number of user seats, are not included in the measurement of the subscription liability and instead recognized as outflows of resources in the period in which the obligation for those payments is incurred. The subscription asset is initially measured as the initial amount of the subscription liability, adjusted for subscription payments made at or before the subscription commencement date, plus capitalizable initial implementation costs. In the transition year of GASB 96, governments are permitted, but not required, to include in the measurement of the subscription asset capitalizable outlays associated with the initial implementation stage and the operation and additional implementation stage incurred prior to the implementation of this Statement. The State has elected to exclude any initial capitalizable outlays incurred prior to July 1, 2022, in the measurement of the subscription assets at July 1, 2022. There are no subscription payments made at or before the SBITA commencement or initial implementation costs included in the initial subscription asset measured for any State SBITAs. Subsequently, the subscription asset is amortized on a straight-line basis over the term of the SBITA.

Variable payments based on future performance of a government, usage of the underlying IT assets, or number of user seats are recognized as outflows of resources in the period in which the obligation for those payments is incurred. The State had outflows of resources resulting

in approximately \$11,404 of subscription cost for the year ended June 30, 2025. The majority of the cost is attributed to Google and Microsoft license contracts that are variable payments based on number of licenses.

Key estimates and judgments related to SBITAs include how the State determines (1) the discount rate it uses to discount the expected subscription payments to present value, (2) subscription term, and (3) subscription payments.

- a. The State uses an estimated incremental borrowing rate as the discount rate for SBITAs unless the interest rate charged by the lessor is provided. The discount rate is used to determine the present value of subscription payments over the subscription term. The incremental borrowing rate for all State SBITAs ranged from 3% to 9.15%.
- b. The subscription term is the noncancellable period of the SBITA. This includes periods in which there is an option to extend or terminate the subscription if it is reasonably certain that the option will or will not be exercised.
- c. Subscription payments included in the measurement of the subscription liability are composed of fixed payments. There are no purchase options included in the measurement of the subscription liability for any State SBITAs.

The State monitors changes in circumstances that would require a remeasurement of its SBITAs and will remeasure the subscription asset and liability if certain changes occur that are expected to significantly affect the amount of the subscription liability. No such remeasurements occurred in the current year.

Subscription assets are reported with other capital assets and subscription liabilities are reported with long-term debt on the statement of net position. For all SBITAs, the State recognizes a subscription liability and an intangible right-to-use subscription asset in the government-wide financial statements. SBITAs with a cost greater than \$25,000 (in dollars) annually are recognized by the State as a right-to-use subscription asset.

For SBITAs in governmental funds, other financing sources equal to the present value of the expected payments over the subscription term are recorded at SBITA inception. Subscription payments are recorded as debt service expenditure when paid.

The following table is an analysis of the SBITAs by major asset class at June 30, 2025 (expressed in thousands):

Asset Class	Subscription Asset	Accumulated Amortization	Net Subscription Asset
<i>Governmental Activities:</i>			
Subscription	\$ 34,363	\$ (17,943)	\$ 16,420
Total	<u>34,363</u>	<u>(17,943)</u>	<u>16,420</u>
<i>Discretely Presented Component Units:</i>

2029	350	4	1,555	59	1,968	
Totals	\$ 15,682	\$ 743	\$ 34,390	\$ 2,571	\$ 53,386	

NOTE 13

RETIREMENT SYSTEMS

Plan Description

The West Virginia State Legislature has established nine defined benefit plans (the Plans) and a defined contribution plan to provide retirement benefits for eligible employees. The Plans are a group of defined benefit public employee retirement systems. The Consolidated Public Retirement Board (CPRB) administers the Plans under the direction of its Board of Trustees. The Governmental Employees Deferred Compensation Plan is administered by a third-party administrator and has been excluded from these financial statements in accordance with Governmental Accounting Standards Board (GASB) Statement No. 97.

CPRB prepares separately issued financial statements covering the retirement systems, which can be obtained from the Consolidated Public Retirement Board, 601 57th Street, SE, Suite 5, Charleston, WV 25304 or <http://www.wvretirement.com>. The Plans' financial statements are prepared using fund accounting principles and the accrual basis of accounting, under which expenses are recorded when liabilities are incurred and revenues are recorded in the accounting period in which they are earned and become measurable. The Plans' fiduciary net position has been determined on the same basis used by the pension plan. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan. Investments are carried at fair value as determined by a third-party pricing service utilized by the respective investment management companies. Investment transactions are accounted for on a trade-date basis. Unrealized gains and losses are included in investment income. Investment income is determined monthly and distributed to each of the defined benefit plans participating in the investment pools on the last day of the month in the form of reinvested shares.

The Plans are comprised of the following groups of defined benefit plans which provide substantially all employees of the State, its public education system, and other political subdivisions of the State with retirement and death and disability benefits:

- The Public Employees Retirement System (PERS) is a multiple-employer, cost-sharing, public employee retirement system. The number of local government employers participating in PERS at June 30, 2025, was 705, including 133 West Virginia state agencies, 159 cities and towns, 358 special districts, and 55 counties.

Benefits Provided

For PERS, a member is eligible for normal retirement at age 60 with five or more years of service, or at least age 55 with age and service equal to 80 or greater. A member may retire with the pension reduced actuarially if the member is at least age 55 and has at least ten years of contributory service or at any age with 30 years of contributory service. A member hired after July 1, 2015, may retire with the pension reduced actuarially if the member has attained age 60 and completed ten years of contributory service, has attained age 57 and completed twenty years of contributory service, or has attained age 55 and completed thirty years of contributory service. The straight-life annuity retirement benefit is equivalent to 2% of average salary multiplied by years of service. Final average salary is the average annual

salary from the highest 36 consecutive months within the last 15 years of employment. For all employees hired after July 1, 2015, final average salary is the average annual salary of the highest 60 consecutive months within the last 15 years of employment. Terminated members with at least five years of contributory service who do not withdraw their accumulated contributions may elect to receive their retirement annuity beginning at age 62. For all employees hired after July 1, 2015, this age increases to 64 with at least ten years of contributory service, or age 63 with at least 20 years of contributory service.

- The Deputy Sheriffs' Retirement System (DSRS) is a multiple-employer, cost-sharing, public employee retirement system which was established for all deputy sheriffs hired on or after July 1, 1998. Current employees were eligible to transfer from PERS. There were 55 employers participating in DSRS as of June 30, 2025. The State makes no employer contributions to DSRS.
- The Emergency Medical Services Retirement System (EMSRS) is a multiple-employer, cost-sharing public employee retirement system which was established for eligible emergency medical service officers. Participation is voluntary. There were 47 employers participating in EMSRS as of June 30, 2025. The State makes no employer contributions to EMSRS.
- The Municipal Police Officers and Firefighters Retirement System (MPFRS) is a multiple-employer, cost-sharing public employee retirement system which was established for any municipality or municipal subdivision employing municipal police officers or firefighters. Participation is voluntary. There were 38 employers participating in MPFRS as of June 30, 2025. The State makes no employer contributions to MPFRS.
- The Municipal Policemen's or Firefighter's Pension and Relief Funds is a relief fund that provides education and training to trustees, allocates funds from premiums on fire and casualty insurance policies, and offers disability examinations for officers and firefighters. This plan is administered by the Municipal Pensions Oversight Board (MPOB) to the 31 police pension plans and the 22 fire pension plans of the State.
- The Natural Resources Police Officers Retirement System (NRPORS) is a single-employer defined benefit public employee retirement system which was established for all natural resources police officers hired by the West Virginia Division of Natural Resources (DNR) on or after January 2, 2021. This plan was also made available to any natural resources police officers employed in covered employment participating in PERS on the effective date. Approximately 115 natural resources police officers elected to participate and were transferred from the PERS plan.
- The Teachers' Retirement System (TRS) is a multiple-employer, cost-sharing, public employee retirement system. Fifty-five county public school systems, certain personnel of the thirteen State-supported institutions of higher education, West Virginia Department of Education, and boards of higher education participate in the TRS plan. There were 79 employers and two non-employer contributing entities (the State) participating in the plan as of June 30, 2025.

For TRS, all employees hired before July 1, 2015, are eligible for normal retirement at age 60 with 5 years of service, age 55 with 30 years of service, or any age with 35 years of service, or with reduced benefits before age 55 with at least 30 but less than 35 years of service. For all employees hired after July 1, 2015, qualification for normal retirement is age 62 with 10 years of service. All members hired after July 1, 2015, may retire with reduced benefits at age 62 with 10 or more years of service, age 57 with 20 or more years of service or age 55 with at least 30 years of service. Terminated members, who were hired before July 1, 2015, with at least five, but less than 20, years of credited service who do not withdraw their accumulated contributions are entitled to a deferred retirement commencing at age 62 or at age 60 with more than 20 years of service. For all employees hired after July 1, 2015, this requirement increases to age 64 with 10 years of service. Retirement benefits are equivalent to 2% of final average annual salary multiplied by years of service. Final average salary is the average of the five highest fiscal years of earnings during the last 15 fiscal years of contributing service.

- The State Police Death, Disability, and Retirement System (SPDDRS), the State Police Retirement System (SPRS), and the Judges' Retirement System (JRS) are single-employer, public employee retirement systems.

For SPDDRS, a member is eligible for normal retirement at age 50 after 20 years of contributory service, or at any age upon completion of 25 years of service. There is no vesting in the State's contributions prior to ten years of service. Benefits payable to members retiring prior to age 50 are deferred until the normal retirement date. The annual retirement benefit is 5.5% of the members' aggregate salary, but not less than \$6,000 per year. Total duty-related disability benefits are equal to 8.5% the member's annual salary, but not less than \$15,000 per year. Aggregate salary is the total salary paid to a member during his or her period of service, which may include up to five years of active military service credited at the average departmental salary. Aggregate salary for purposes of determining disability benefits may include salary that would have been earned had the participant served at least 25 years notwithstanding the disability. An annual cost of living adjustment of 3.75% is granted to retirees and beneficiaries. For service-connected total disability retirees, the adjustment begins at age 65.

For SPRS, a member is eligible for normal retirement at age 50 with 25 years of service or age 52 with 20 years of credited service. A member retiring before age 52 with 20 years of credited service is eligible for a reduced benefit. The annual regular retirement benefit is equal to 3.00% of the final average salary multiplied by the years of service. Final average salary is the average of the five highest calendar years of earnings during the last ten years of earnings. Annual retirement annuity adjustments are 1% for regular retirement and are payable on July 1 of each year after the member reaches 63 years of age.

For JRS, members who were elected or appointed to the bench prior to July 2, 2005, are eligible for normal retirement after reaching 24 years of service, of which at least 12 years were as a sitting judge or justice, 16 years of service at age 65, of which at least 12 years were as a sitting judge or justice, or 8 full years of service at age 65. A member who was appointed or elected to the bench on or after July 2, 2005, is eligible for normal retirement upon the attainment of 24 years of service, of which at least 14 years were as a sitting judge or justice, or 16 years of service at age 65, of which 14 years were as a sitting judge or justice. A member on the bench prior to July 2, 2005, is eligible for a deferred benefit upon termination of

service prior to normal retirement, provided the member completes 16 years of service, of which 12 years of service were as a sitting judge or justice. A member of the bench on or after July 2, 2005, is eligible for a deferred benefit upon termination of service prior to normal retirement, provided the member completes 16 years of service, of which 14 years of service were as a sitting judge or justice.

Plan membership consisted of the following as of the plan valuation date, June 30, 2025:

	SPDDRS	SPRS	JRS
Retirees and beneficiaries currently receiving benefits	721	192	61
Terminated members entitled to benefits but not yet receiving them	2	30	2
Terminated nonvested members	1	163	—
Active members	—	557	123
Total	724	942	186

Basis of Accounting

The CPRB is included in the fiduciary funds financial statements. Accordingly, the pension fund financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. Member contributions are recognized in the period when contributions are due. Employer contributions are recognized when due and the employer has made a formal commitment to provide contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of each system. The internal service fund financial statements have also been prepared using the economic resources measurement focus and the accrual basis of accounting. Operating revenues and expenses generally result from fees charged in connection with the operation of the plans. The Board's assets are held primarily in accounts maintained by the State Treasurer, the West Virginia Investment Management Board, and the third-party administrator of its defined contribution system.

Funding Policy

Funding policies for all the Plans have been established and changed from time to time by action of the State Legislature. Actuarial valuations are performed to assist the Legislature in determining appropriate contribution rates. As a condition of participation in the Plans, employers and/or employees are required to contribute certain percentages of salaries and wages as authorized by statute and specified by CPRB. The following schedule summarizes each defined benefit plan's required contribution rates at June 30, 2025:

Statutory Contribution Rates as a Percent of Covered Payroll

System	Member	Employer
PERS	4.5% - 6.0%	9.0%
TRS	6.0%	15.0% State
SPDDRS	9.0%	15.0% Counties
		15.0%
SPRS	13.0%	34.0%
JRS	7.0%	Appropriated by the Legislature

The State's required and actual contributions for the year ended June 30, 2025, were (expressed in thousands):

System	Actual Contribution
PERS	\$ 123,128
TRS	413,025
SPDDRS	8,633
SPRS	13,720
JRS	1,220

Special Funding Situation

The State is a non-employer contributing entity that provides funding through the School Aid Formula (SAF) to subsidize employer contributions of county boards of education and to fund the unfunded liability of TRS for all participating employers. These amounts qualify as a special funding situation in accordance with GASB 68. The State assumes a share of the net pension liability on behalf of the various county boards of education for contributions related to the SAF. The State also assumes a share of the net pension liability on behalf of all participating employers for contributions related to funding of the non-employer contributing entity unfunded liability. The State reports a liability, deferred outflow of resources and deferred inflow of resources, and expense as a result of its requirement to contribute to the TRS plan.

The State Supreme Court has required the State to fund the TRS in an actuarially sound manner to eliminate the unfunded liability over a 40-year period beginning on July 1, 1994, and to meet the cash flow requirements of the TRS in fulfilling its future anticipated obligations to its members. The State Supreme Court has further ordered the State, through the Governor, to require the appropriate funding should the State Legislature fail to do so. Since this ruling, the Legislature has supplemented the funding of the TRS to meet this special funding situation requirement in the amount of \$278,333,000 for FY 2024, which is exclusive of the SAF appropriation.

Pension Assets, Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

The State's net pension asset (liability), deferred outflows of resources, deferred inflows of resources and pension expense relating to the governmental, business-type, fiduciary, and component units' activities for the PERS plan, governmental and component units' activities for the TRS plan, and governmental activities for the single employer plans are as follows for June 30, 2025 (expressed in thousands):

Description	Governmental Activities	Business-type Activities	Fiduciary	Discretely Presented Component Units	Total
Net Pension Asset	\$ 273,480	\$ 806	\$ 15	\$ 20,212	\$ 294,513
Net Pension Liability	(1,758,458)	—	—	(3,301)	(1,761,759)
Deferred Outflows of Resources	983,075	1,960	211	52,798	1,038,044
Deferred Inflows of Resources	(454,624)	(1,021)	(118)	(28,389)	(484,152)
Pension Expense	221,826	443	8	9,568	231,845

Refer to pages 172-173 for amounts reported for the PERS cost-sharing plan as it relates to governmental activities, business-type activities, fiduciary funds, and component units. Refer to page 175 for amounts reported for the TRS cost-sharing plan as it relates to governmental activities and component units. Refer to page 177 for amounts reported for the single-employer plans as they relate to governmental activities.

At June 30, 2025, the State reported a net pension liability of \$1,761,759,000 and a net pension asset of \$294,513,000 for its proportionate share of the multiple-employer, cost-sharing plans, and single employer plans, which were measured as of June 30, 2024. The total pension asset/liability used to calculate the net pension asset/liability was determined by an actuarial valuation as of June 30, 2023, rolled forward to the measurement date of June 30, 2024. The pension asset, liability, deferred outflows of resources and deferred inflows of resources related to pension, and pension expense are allocated to the internal service funds of the State. The State's proportionate share of the net pension asset/liability for the PERS and TRS was based on the State's share of contributions to the pension plan relative to the contributions of all employers participating in PERS and TRS for the year ended June 30, 2024.

The State's share of the net pension asset/liability for the PERS and TRS plans determined by the actuarial valuation as of June 30, 2023 is as follows (in thousands):

	2025	% of share	2024	% of share	Change \$	Change %
PERS	\$ 111,165	67.53	\$ 3,037	67.76	\$ 108,128	(0.23)%
TRS	\$(1,721,551)	91.23	\$(2,121,847)	92.68	\$ 400,296	(1.45)%

West Virginia

The State's amounts for net pension asset, liability, deferred outflows of resources, deferred inflows of resources, and pension expense were allocated to the governmental, business-type, fiduciary, and component units' activities based on each reporting unit's share of the State's employer contributions to the PERS and TRS plans. The pension-related amounts for primary government, fiduciary, and component units are as follows:

PERS (expressed in thousands):

	Governmental Activities	Water Pollution	Infrastructure
Proportionate share of statewide amount	81.08 %	0.10 %	0.04 %

Contributions made subsequent to the measurement date	413,025	—
Total	\$ 707,821	\$ (295,266)

Deferred outflows of resources of \$413,025,000 related to pensions are the result of contributions made subsequent to the measurement date of June 30, 2024, and will be recognized as a reduction of the net pension liability in the subsequent fiscal year ending June 30, 2026. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows (expressed in thousands):

Year Ending June 30,	Amount
2026	\$ (94,730)
2027	195,277
2028	(57,876)
2029	(38,653)
2030	(4,488)

As of June 30, 2025, the State reported a net pension asset and a net pension liability of \$183,348,000 and \$40,208,000, respectively, for the single employer plans which were measured as of June 30, 2024. The total pension liability used to calculate the net pension asset/liability was determined by an actuarial valuation as of June 30, 2023, rolled forward to the measurement date of June 30, 2024. The amounts for net pension asset, net pension liability, deferred outflows of resources, deferred inflows of resources, and pension expense were allocated to reporting units related to governmental activities based on each reporting unit's employer contributions to the SPDDRS, SPRS, and JRS plans.

Single Employer Plans (expressed in thousands):

	SPRS	SPDDRS	JRS	Total
Net pension asset/(liability)	\$ (40,208)	\$ 6,349	\$ 176,999	\$ 143,140

Change in benefit terms. The July 1, 2023 actuarial valuation for the JRS Plan recognized a change in benefit terms to allow a transfer from PERS to JRS for Family Court Judges effective July 24, 2022. As of July 1, 2023 there are 46 Family Court Judges who are allowed to transfer from PERS to JRS.

Long-Term Expected Rates of Return

The long-term geometric rates of return on pension plan investments were determined using the building-block method in which estimates of expected real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentages and by adding expected inflation. Rates summarized in the following table include the inflation component and were used for all defined benefit plans as of June 30, 2025:

Asset Class	Long-Term Expected Rate of Return	Target Allocation
Domestic Equity	5.3%	22.5%
International Equity	6.7%	22.5%
Fixed Income	4.3%	15.0%
Real Estate	7.2%	12.0%
Private Equity	8%	12.0%
Private Credit	8.2%	6.0%
Hedge Funds	5.0%	10.0%
Total		<u>100%</u>

Discount Rate

The discount rate used to measure the total pension liability (asset) was 7.25% for all defined benefit plans. The projections of cash flows used to determine the discount rates assumed that employer contributions will continue to follow the current funding policies. Based on those assumptions, the fiduciary net position of each defined benefit pension plan was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rates of return on pension plan investments were applied to all periods of projected benefit payments to determine the total pension liabilities (assets) of each plan. The discount rate used to measure the total pension liability did not change for the June 30, 2023 valuation.

Detailed pension plan fiduciary net position for all pension plans are available in a separately issued Consolidated Public Retirement Board annual financial report, and each plan has its own Audited Schedules of Employer Allocations and Pension Amounts by Employer report.

Defined Contribution Plans

The Teachers' Defined Contribution Retirement System (TDCRS)

TDCRS, administered by the Consolidated Public Retirement Board, is a multiple-employer defined contribution retirement system primarily covering the full-time employees of the State's 55-county public school systems, the State Department of Education, the School for the Deaf and the Blind, and the Marshall University Research Corporation who were hired between July 1, 1991 and June 30, 2005. TDCRS members also include former TRS plan members, including higher education employees, who have elected to participate in the TDCRS plan. There are approximately 3,378 and 3,512 members in the TDCRS plan at June 30, 2025 and 2024, respectively. TDCRS retirement benefits depend solely on amounts contributed to the plan plus investment earnings. TDCRS closed participation to new members effective June 30, 2005.

State legislation requires enrolled employees to contribute 4.5% of their gross compensation, and the employers contribute 7.5% of covered members' gross compensation from amounts allocated to the employers through the State School Aid Formula. Employer contributions for each employee (and interest allocated to the employee's account) become partially vested after 6 years and fully vested after 12 years of completed service. Employer contributions and earnings thereon forfeited by employees who leave employment prior to becoming vested are

available, in the event the employee does not return to active participant status within five years, to reduce the employer's current-period contribution requirement. Any such forfeitures arising from contributions, plus earnings thereon, will be used to reduce future employer contributions.

The TDCRS investments are held and managed by an investment company as the third-party administrator for the plan. As prescribed by West Virginia Code, the TDCRS investments are placed in participant accounts and the participants direct the investment of their account by selecting from a list of plan mutual funds or a long-term fixed investment option. The TDCRS provides members with a choice of 20 separate investment options made up of fixed income, balanced, large cap, mid cap, small cap, and international mutual funds, a money market fund, and a fixed annuity. The State currently does not have specific overall policies addressing limitations on specific risk types, such as credit risk, custodial credit risk, concentration of credit risk, interest rate risk, or foreign currency risk.

The TDCRS investments are carried at fair value (except for fully benefit-responsive investment contracts, which are reported at contract value) as determined by a third-party pricing service utilized by an investment management company. For fully benefit-responsive investment contracts, contract value is the relevant measure for the portion of investments attributable to fully benefit-responsive investment contracts because contract value is the amount participants normally would receive if they were to initiate permitted transactions under the terms of the plan. Investment income for the TDCRS is determined monthly and distributed to the individual participant accounts.

Custodial Credit Risk – Cash Deposits

The TDCRS' cash deposits with financial institutions were approximately \$152 thousand at June 30, 2025. These deposits, which had a bank balance of approximately \$152 thousand, are either insured by the Federal Deposit Insurance Corporation or collateralized with securities held in TDCRS' name by its agents.

Interest Rate Risk

As of June 30, 2025, the TDCRS had the following investments and maturities (expressed in thousands):

Investment Type	Fair Value	Investment Maturities (in Years)		
		Less than 1	1-5	6-10
Mutual Funds	\$779,089	\$779,089	\$—	\$—

For the year ended June 30, 2025, the approximate payroll of state employees covered by TDCRS was \$121 million, and total covered payroll for both the TDCRS and TRS was approximately \$1.97 billion. Both the employees and employers made the required contributions amounting to \$5.4 million and \$9.0 million, or approximately 4.5% and 7.5% of covered payroll, respectively.

Teachers Insurance and Annuity Association

The Teachers Insurance and Annuity Association and/or College Retirement Equities Fund (TIAA-CREF), a privately administered multiple-employer defined contribution retirement plan, provides individual retirement fund contracts for each eligible participating employee. Eligible employees consist mainly of state college/university faculty and staff. For the year ended June 30, 2025, contributions were approximately \$57 million from the covered employees and approximately \$56.7 million from the 13 participating institutions from the State of West Virginia.

Benefits to retired employees are generally based on the value of the individual contracts and the estimated life expectancy of the employee at retirement and are fully vested from the date of employment. The total annual required contribution and the amount paid is 3% or 6% of the employee's annual salary and is established by the Board of Trustees of the University System of West Virginia and the Board of Directors of the State College System. The State has no further liability once annual contributions are made.

Empower Retirement

Higher education employees enrolled in the basic 401(a) retirement plan with TIAA-CREF have a one-time option to switch to the New Educators Money 401(a) basic retirement plan, administered by Empower Retirement. New hires have the choice of either plan. For the year ended June 30, 2025, contributions were approximately \$16 thousand from the covered employees and \$16 thousand from the 13 participating institutions from the State of West Virginia.

NOTE 14

OTHER POSTEMPLOYMENT BENEFITS

General

In addition to the pension benefits described in Note 13, the State provides certain health care and other insurance benefits, in accordance with state statutes, for retired employees. Substantially all employees hired prior to July 1, 2001, may become eligible for these benefits if they reach normal retirement age while working for the State. State employees earn sick-leave benefits, which accumulate but do not vest. Eligible employees may convert, at the time of retirement, any unused accumulated sick leave to pay a portion of the employee's postemployment health care insurance premium. If this option is not selected, the leave amount may be applied toward an increase in the employee's retirement benefits, with such sick leave constituting additional credited service in the computation of such benefits. The unused portion of sick leave that is expected to be converted to additional credited service for retirement benefits is considered in the actuarial valuation used to calculate the total pension liability.

The State provides health care credits against monthly health insurance premiums of certain retirees based on various factors, including unused sick leave at the time of retirement. According to West Virginia State Code, employees hired prior to June 30, 1988, can receive health care credit against 100% of their health care coverage. Employees hired between June 30, 1988 and July 1, 2001, can receive health care credits against 50% of their health care cost. Employees hired July 1, 2001, or later, may not convert sick leave into a health care benefit.

In addition to the pension benefits allowing certain retirees to convert sick leave to health care premiums, state statutes provide that employees who retire may continue participation in the State's health insurance plan subject to certain length of service and participation requirements. Such employees are eligible to participate in the public employees' insurance program by making the premium contribution specified by the Public Employees Insurance Agency (PEIA) Finance Board. Approximately 42,264 retirees, 12,304 inactive plan members, and 24,417 active plan members met those eligibility requirements at June 30, 2025.

The State is a non-employer contributing entity that provides funding through Senate Bill No. 469, which was passed February 10, 2012, granting Other Postemployment Benefits Liability relief to the State's 55 county boards of education effective July 1, 2012. The Public School Support Plan is a basic foundation allowance program that provides funding to the local school boards for "any amount of the employer's annual required contribution allocated and billed to the county boards of education for employees who are employed as professional employees, as service personnel, or as professional student support personnel," within the limits authorized by this law. The special funding under the school aid formula subsidizes employer contributions of the county boards of education and contributes to the overall unfunded OPEB liability. RHBT prepares separately issued financial statements covering the other post employment benefits, which can be obtained from the Retiree Health Benefit Trust, 601 57th Street, SE, Suite 2, Charleston, WV 25304 or <http://www.peia.wv.gov>.

Plan Description

The State established the RHBT under West Virginia Code §5-16D-2, an irrevocable trust, to account and report for the other postemployment benefits (OPEB) provided under the multi-employer cost-sharing plan. While PEIA administers the plan, legislation requires the RHBT to determine, through an actuarial study, the contractually required contribution (CRC) which shall be sufficient to maintain the RHBT in an actuarially sound manner. The CRC, which is reviewed and approved by the PEIA Finance Board, shall be allocated to the 731 respective employers who are required by law to remit at least the minimum annual premium component of the CRC.

The RHBT provides the following basic retiree benefit coverage to all participants: hospital, surgical, group major medical, basic group life, and prescription drug coverage for retired employees of the State and various nonstate governmental agencies and their dependents. Plan benefits are established and revised by PEIA and RHBT management with the approval of their Finance Board.

Basis of Accounting

The RHBT is included in the fiduciary funds financial statements. Accordingly, the basic financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting in conformity with accounting principles generally accepted in the United States of America for governmental entities as prescribed or permitted by the GASB. Revenues are derived mainly from contributions from plan members and employers. Members' contributions are recognized in the period in which the contributions are due. Employers' contributions to the RHBT are recognized pursuant to a legal requirement, when there is a reasonable expectation of collection. Benefits and refunds are recognized when due and payable. RHBT cash and cash equivalents principally consists of deposits in the Board of Treasury Investments (BTI) pooled funds recorded at fair value, as more fully described in Note 3.

Funding Policy

West Virginia Code §5-16D-6 also assigns to the PEIA Finance Board the authority to establish and amend contribution requirements of the plan members and the participating employers. Participating employers are required by statute to contribute at a rate assessed each year by the RHBT. The annual contractually required rate is the same for all participating employers.

West Virginia Code §5-16-25 requires the Finance Board of PEIA to maintain a reserve of 10% of projected PEIA plan costs for general operation purposes and to provide future plan stability.

The following schedule summarizes the plan's required contribution rates at June 30, 2025:

Statutory Contribution Rates as a Percent of Covered-Employee Payroll

System	Member	Employer
PERS	4.5% - 6.0%	9.0%
TRS	6.0%	7.5% - 15.0%

The State's required and actual contributions for the year ended June 30, 2025, were as follows (expressed in thousands):

System	Actual Contribution
OPEB	\$48,134

Special Funding

Senate Bill No. 419, effective July 1, 2012, amended West Virginia Code §11-21-96 by dedicating \$30 million to be transferred annually from personal income tax previously collected for payment of the unfunded liability of the Workers' Compensation Fund (WCF) to the RHBT. Transfers will be made until the RHBT unfunded liability has been provided for in its entirety or July 1, 2037, whichever date is later. The aforementioned \$30 million transfers commenced in 2017.

In December 2011, the PEIA Finance Board passed a finance plan that placed a 3% cap on the amount participating employers will now pay in retiree premium subsidy annual increases. By this action, the employer is no longer exposed to ever-increasing trends in health care costs, significantly reducing future retiree premium subsidy costs.

OPEB Assets, OPEB Liability, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

The State reported a net OPEB asset, including the county school boards, at June 30, 2025, of \$37,519,000, including a special funding situation of the net OPEB asset (90.11%) for its share, which was measured as of June 30, 2024. The total OPEB asset used to calculate the net OPEB asset was determined using updated procedures applied to the actuarial valuation as of June 30, 2023, and measured as of June 30, 2024. The OPEB asset, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense are allocated to governmental activities, including blended component units and internal service funds, business-type, and component units' activities of the State. The State's proportionate share of the net OPEB asset was based on the State's share of contributions to the OPEB plan relative to the contributions of all employers participating for the year ended June 30, 2024.

The State's proportionate share of the net OPEB asset at June 30, 2025, determined by the actuarial valuation measured as of June 30, 2023, was \$37,519,000, including a special funding situation (90.11%). The State's proportionate share for FY 2025 has increased by 9.82%. There was also a change in actuarial assumptions that resulted in the decrease of the total OPEB asset of \$89,546.

West Virginia

The State's amounts for net OPEB asset, (liability), deferred outflows of resources (DO), deferred inflows of resources (DI), and OPEB expense were allocated to the governmental, business-type, fiduciary, and component units' activities based on each reporting unit's share of the State's employer contributions to the OPEB plan. The OPEB-related amounts for primary government, fiduciary funds, and component units are as follows (expressed in thousands):

	Business-type		
	Governmental Activities	Water Pollution	Infrastructure
Proportionate share of statewide amount	90.29 %	0.01 %	— %
Net OPEB asset	\$ 33,877	\$ 5	\$ —
OPEB expense	16,666	(2)	—
DO related to contributions subsequent to the measurement date	39,190	13	2
DO related to changes in employer proportion	30,825	2	—
DO related to difference between expected/actual investment earnings	—	—	—
DO related to difference between expected/actual experience	118,005	12	—
DO related to changes in assumptions	12,933	2	—
DI related to difference between expected/actual investment earnings	(38,612)	—	—
DI related to changes in employer proportion	(25,158)	(8)	(1)
DI related to changes in assumptions	(40,058)	(6)	—
DI related to difference between expected/actual experience	(34,067)	(5)	—
Total subject to amortization	<u>23,868</u>	<u>(3)</u>	<u>(1)</u>
Amortization of applicable deferred amounts in future periods:			
2026	(22,933)	3	1
2027	55,321	(7)	(2)
2028	6,590	(1)	—
2029	(15,110)	2	—
Sensitivity Analysis:			
Net OPEB asset at 6.40% discount rate	(148,111)	(22)	—
Net OPEB asset at 7.40% discount rate	33,877	5	—
Net OPEB asset at 8.40% discount rate	185,440	27	—
Net OPEB asset at 1% decrease of healthcare cost trend rate	266,357	39	—
Net OPEB asset at healthcare cost trend rate	33,877	5	—
Net OPEB asset at 1% increase of healthcare cost trend rate	(248,437)	(37)	—

Business-type

1	—	14	33,897	—	3,622	37,519				
(7)	—	(103)	(248,584)	—	(26,562)	(275,146)				

Deferred outflows of resources and deferred inflows of resources related to the OPEB as of June 30, 2025, were from the following sources (expressed in thousands):

	Deferred Outflows of Resources	Deferred Inflows of Resources
Net difference between expected and actual earnings on OPEB plan investments	\$ —	\$ (41,923)
Changes in proportion and differences between employer contributions and proportionate share of contributions	34,395	(32,717)
Difference between expected and actual experience	127,564	(37,111)
Changes in assumptions	14,368	(43,301)
Contributions made subsequent to the measurement date	48,134	—
Total deferred outflows/inflows to be amortized	<u>\$ 224,461</u>	<u>\$ (155,052)</u>

Deferred outflows of resources of \$48,134,000 related to OPEB are the result of contributions made subsequent to the measurement date of June 30, 2024, and will be recognized as a reduction of the net OPEB liability in the subsequent fiscal year ending June 30, 2026. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows (expressed in thousands):

Year Ending June 30:	Amount
2026	\$ (20,442)
2027	49,311
2028	5,874
2029	(13,468)

Actuarial Methods and Assumptions

The total OPEB liability for financial reporting purposes was determined by an actuarial valuation as of June 30, 2023 and measured as of June 30, 2024, using update procedures applied to the actuarial assumptions and methods. The projections of the net OPEB liability are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. Consideration is to be given to the written plan document as well as other communications between the employer and plan members and an established pattern of practice for cost sharing.

Significant assumptions used in the actuarial valuations are as follows:

Actuarial cost method	Entry age normal
Amortization method	Level percentage of payroll, closed
Amortization period	20-year closed period as of June 30, 2017
Asset valuation method	Market value
Actuarial assumptions:	
Investment rate of return	7.40%, net of OPEB plan investment expense, including inflation
Inflation rate	2.50%
Salary increases	Rates based on 2015-2020 OPEB Experience Study and depend on pension plan participation and attained age, and range from 2.75% to 5.18%, including inflation. Rates were first applied to the 2020 valuation.
Retirement age	Rates based on 2015-2020 OPEB Experience Study and vary by pension plan participation and age/service at retirement. Rates were first applied to the 2020 valuation.
Mortality rates	Post-Retirement: Pub-2010 General Healthy Retiree Mortality Tables projected with Scale MP-2021 for TRS. Pub-2010 General Below Median Healthy Retiree Mortality Tables projected with Scale MP-2021 for PERS. Pub-2010 Public Safety Healthy Retiree Mortality Tables projected with Scale MP-2021 for Troopers A and B. Pre-Retirement: Pub-2010 General Employee Mortality Tables projected with Scale MP-2021 for TRS. Pub-2010 Below-Median Income General Employee Mortality Tables projected with Scale MP-2021 for PERS. Pub-2010 Public Safety Employee Mortality Tables projected with Scale MP-2021 for Troopers A and B.
Healthcare cost trend rates	Trend rates for pre-Medicare and Medicare per capita costs start at 5.0% medical and 8.0% drug. The trends increase over four years to 7.0% and 9.5%, respectively. The trends then decrease linearly for 5 years until the ultimate trend rate of 4.5% is reached in plan year 2033.
Aging factors	Based on the 2013 SOA Study "Health Care Costs - From Birth to Death"
Expenses	Health administrative expenses are included in the development of the per capita claims costs. Operating expenses are included as a component of the annual expense.
Date range in most recent experience study	Actuarial assumptions used in the June 30, 2023, valuation were based on the results of an actuarial experience study for the period July 1, 2015 – June 30, 2020.

Long-Term Expected Rates of Return

The long-term rates of return on OPEB plan investments were determined using the building-block method in which estimates of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) were developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentages and by adding expected inflation. Best estimates of long-term geometric rates are summarized in the following tables and include the inflation component as of June 30, 2025:

Asset Class	Long-Term Expected Rate of Return
Equity	7.4%
Private Credit and Income	7.4%
Fixed Income	3.9%
Real Estate	7.7%
Private Equity	10.0%
Hedge Funds	4.5%

Asset Class	Target Allocation
Equity	45.0%
Private Credit and Income	6.0%
Fixed Income	15.0%
Real Estate	12.0%
Private Equity	12.0%
Hedge Funds	10.0%

Discount Rate

The single discount rate used to measure the total OPEB liability was 7.40%. The projections of cash flows used to determine the discount rates assumed that the RHBT contributions would be made at rates equal to the actuarially determined contribution rates, in accordance with pre-funding and investment policies. Future pre-funding assumptions include a \$30 million annual contribution from the State through 2037. Based on those assumptions, and that the Plan is expected to be fully funded by fiscal year ended June 30, 2037, the OPEB plan's fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability. Discount rates are subject to change between measurement dates.

NOTE 15

RISK MANAGEMENT

The State is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; employee health and life coverage; and natural disasters. The State of West Virginia operates three significant insurance enterprise funds: Board of Risk and Insurance Management (BRIM), Public Employees Insurance Agency (PEIA), and Workers' Compensation Fund (WCF).

On March 12, 2011, the West Virginia Legislature created the State Entities Workers' Compensation Program Fund (SEWC) to provide a means of managing workers' compensation coverage for persons directly employed by the State of West Virginia. The SEWC functions as an insurance-purchasing risk pool and is administered by the Office of the Insurance Commissioner (OIC). On October 1, 2011, the OIC entered into a high-deductible insurance coverage policy with Zurich. Pursuant to the policy provisions, the SEWC retains the loss exposure up to \$250,000 per occurrence. The SEWC has provided for these losses by establishing a Loss Reserve Fund with Zurich. Zurich will provide claims management services for claims incurred prior to June 30, 2017 and forward. The final true up for Zurich was in fiscal year 2021. The transfer of risk to Encova is complete. Encova Insurance administers claims with a date of injury of January 1, 2017 and forward. The SEWC had a total of \$9.6 million in unpaid claims and claim adjustment expenses at June 30, 2025.

Based on the composition and characteristics of these funds, the SEWC and AccessWV claim liabilities are not discounted.

In March 2004, the West Virginia Legislature passed House Bill 4740, creating a Patient Injury Compensation Fund. The purpose of this fund is to provide fair and reasonable compensation to claimants in medical malpractice actions for any portion of economic damages awarded that is uncollectible as a result of previously enacted tort reforms. This fund provides relief to claimants whose damages were limited because of caps for trauma care or as a result of joint and several liabilities. The capitalization of the fund comes from the State's tobacco settlement fund. The activity for this fund is not reflected in BRIM's financial statements. BRIM serves as third-party administrator for this fund and, accordingly, the activity for this fund is reflected in the State's financial statements. Senate Bill 602 passed in March 2016 and closed the Medical Liability Fund. All remaining funds were transferred to the Patient Injury Compensation Fund in July 2016. Therefore, there is no continuation of services previously provided by the Medical Liability Fund. This legislation also closed compensation to any claimants who filed with the Patient Injury Fund on or after July 1, 2016. Additional funding to pay any compensate claims filed as of June 30, 2016 was established by creation of assessments imposed on medical liability claims awards and settlements and fees charged to licensed physicians and hospitals. Senate Bill 576 passed in March of 2018 mandated that any funds remaining in the Patient Injury Compensation Fund as of June 30, 2025, that will not be used for claims payments or administrative costs, be transferred to the General Reserve Fund. Although BRIM administers the Patient Injury Compensation Fund, it is a fiduciary fund of the State of West Virginia and is excluded from the government wide financial statements.

Description of the Funds

Board of Risk and Insurance Management

BRIM provides a property and liability self-insurance program for its member agencies. BRIM has general supervision and control over the insurance of all state property, including that of the institutions of higher education and the discretely presented component units. In addition, the political subdivisions in the State and certain other charitable and public service organizations may request coverage by BRIM. Types of coverage provided by BRIM have been expanded over time to include medical malpractice, automobile liability, and coal mine subsidence reinsurance. At the end of the fiscal year, approximately 1,185 organizations participated in the BRIM risk pool.

Underwriting and rate-setting policies are established by BRIM. The cost of all coverage as determined by BRIM shall be paid by the participants. The BRIM risk pool retains a \$1 million per occurrence coverage maximum on all third-party liability claims. In the normal course of business, BRIM seeks to reduce the loss that may arise from catastrophes or other events that cause unfavorable operating results by reinsuring levels of risk in various areas of exposure with other insurance enterprises or reinsurers. Excess coverage under this program is limited to \$400 million per event, subject to limits on certain property. Reinsurance permits recovery of a portion of losses from reinsurers; however, it does not discharge the primary liability of BRIM as direct insurer of the risks insured. BRIM does not report reinsured risks as liabilities unless it is probable that those risks will not be covered by reinsurers. There have been no significant reductions in insurance coverage from the prior year.

Public Employees Insurance Agency

PEIA provides a program of health, life, and prescription insurance for its member agencies. PEIA provides coverage for all participating state employees, including those of the institutions of higher education and the discretely presented component units. In addition, the political subdivisions in the State and certain other charitable and public service organizations may request coverage by PEIA. PEIA's general objectives are to provide a basic employee benefit insurance program, which includes hospital, surgical, major medical, prescription drug, basic life, and accidental death for all participating employers and employees. Underwriting and rate-setting policies are established by PEIA. The cost of all coverage, as determined by PEIA, shall be paid by the participants. Life insurance coverage is limited to \$500,000. Premiums are established by PEIA at varying rates dependent upon, among other things, coverage required, number of dependents, state vs. nonstate employees, and active employee vs. retired employee. PEIA retains all risks for the health and prescription features of its indemnity plan. PEIA has transferred the risks for health and prescription coverage for those individuals covered by the Managed Care Organization (MCO) Plan to the plan providers. PEIA has reinsured 100% of the basic life benefits; however, PEIA remains contingently liable in the event the insurer does not honor its obligation. PEIA presently charges equivalent premiums for participants in either the indemnity plan or the MCO Plan. Altogether, PEIA insures approximately 158,000 individuals, including participants and dependents.

Workers' Compensation Fund

The Workers' Compensation Commission (WCC) was an agency of the State of West Virginia from 1913 until 2005, which provided for the payment of benefits to all employees sustaining personal injuries in the course of, and as a result of, their covered employment. On December 31, 2005, the West Virginia WCC ceased to exist as a separate state entity and all regulatory duties for workers' compensation insurance transitioned to the Office of the West Virginia Insurance Commissioner (the Insurance Commissioner), as did the administrative oversight of certain assets and liabilities of the former WCC. On January 1, 2006, the former WCC became a private sector insurance company.

The "workers' compensation old fund" (Old Fund) was created for those funds transferred to the offices of the Insurance Commissioner and those funds due and owing the workers' compensation fund as of June 30, 2005. The Old Fund assets and liabilities are the responsibility of the State and did not novate or otherwise transfer to the private sector insurance company. Disbursements from the Old Fund are related to the liabilities and appropriate administrative expenses necessary for the administration of all claims, actual and incurred but not reported, with a date of injury on or before June 30, 2005.

Senate Bill 1004 also created the "workers' compensation uninsured employers' fund," "self-insured guaranty risk pool," "self-insured security risk pool," "private carrier guaranty fund," and an "assigned risk fund" in the State's treasury. An employer who has been granted self-insured status for workers' compensation insurance coverage must post security with the Insurance Commissioner for an actuarially determined amount. Payments for injuries of defaulted self-insured employers incurred after July 1, 2004, will be made from the Self-Insured Guaranty Pool. Any self-insured employer who fails the analytical financial review will also be required to post security to the Guaranty Pool on any workers' compensation liabilities incurred after July 1, 2004. The Self-Insured Guaranty Pool is funded through quarterly assessments to self-insured employers and the proceeds received from the security held. To the extent a self-insured employer cannot meet its obligations, the self-insured pools remain contingently liable for all policy benefits. The amount has not been included in the estimated liabilities for unpaid claims and claim adjustment expenses because the likelihood of future self-insured defaults cannot be estimated. For financial statement presentation purposes, these funds, as well as the "Old Fund," are included as the Workers' Compensation Fund (WCF) in the Proprietary Funds' financial statements of the State.

Unpaid Claims Liabilities

The three major insurance funds establish claims liabilities based on estimates of the ultimate cost of claims (including future claims adjustment expenses) that have been reported but not settled, and of claims that have been incurred but not reported. The estimates of the claims liabilities include amounts for non-incremental claims adjustment expense. The length of time for which such costs must be estimated varies depending on the coverage involved. Estimated amounts of salvage and subrogation and reinsurance recoverable on unpaid claims are deducted from the liability for unpaid claims. Because actual claims costs depend on such complex factors as inflation, changes in doctrines of legal liability, and damage awards, the process used in computing claims liabilities does not result in an exact amount. As a result, there is at least a reasonable possibility that recorded estimates will change by material amounts in the near term. Accordingly, the actual incurred losses and loss adjustment expenses may vary significantly from the estimated amount included in the financial statements. Claims liabilities are recomputed periodically using a variety of actuarial and statistical techniques to produce current estimates that reflect recent settlements, claims frequency, and other economic and social factors. Adjustments to claims liabilities are charged or credited to expense in the periods in which they are made.

Information concerning the changes in those aggregate liabilities for the past two fiscal years is shown in the following table (expressed in thousands):

	BRIM		PEIA		WCF	
	2025	2024	2025	2024	2025	2024
Unpaid claims and claims adjustment expense liability at beginning of year	\$ 292,066	\$ 366,680	\$ 136,116	\$ 101,279	\$ 1,003,600	\$ 1,042,200
Incurred claims and claims adjustments expense:						
Provision for insured events of the current fiscal year	103,735	92,025	874,505	889,794	231	276
Increase (decrease) in provision for insured events of prior fiscal years	(459)	11,247	(11,900)	(3,480)	6,892	38,048
Amortization of discount	—	—	—	—	28,642	29,678
Total incurred claims and claims adjustment expense	103,276	103,272	862,605	886,314	35,765	68,002
Payments:						
Claims and claims adjustment expense attributable to insured events of the current fiscal year	16,295	14,156	822,839	771,576	1	106,602
Claims and claims adjustment expense attributable to insured events of the prior fiscal years	91,015	163,730	76,592	79,901	(98,466)	—
Total payments	107,310	177,886	899,431	851,477	(98,465)	106,602
Total unpaid claims and claims adjustment expense liability, end of year	\$ 288,032	\$ 292,066	\$ 99,290	\$ 136,116	\$ 940,900	\$ 1,003,600

The above PEIA payments are net of pharmacy rebates of \$129,331 and \$121,754 for the years ended June 30, 2025 and June 30, 2024, respectively.

Neither BRIM nor PEIA discount their estimated claims liability. If BRIM's unpaid claims and claims adjustment expense liability were discounted using a 4% discount factor for 2024 to take into consideration the time value of money, the result would be a decrease in the liability and an increase in net position of approximately \$25.5 million as of June 30, 2025. The overall unpaid claim liability number includes a provision for allocated and unallocated claims adjustment expense. At June 30, 2025, the total undiscounted claims liability for WCF approximated \$1.154 billion. GASB standards provide that, if discounting is used, the pool should use a rate that is determined by giving consideration to such factors as the pool's expected settlement rate for those liabilities and its expected investment yield rate. Based on the expected investment yields on WCF's investment portfolio, the estimated liability for unpaid claims and claim adjustment expenses (claims liability) has been discounted using a rate of 3%. If discounting of the WCF claims liability was limited to anticipated investment income, the claims liability would have decreased by approximately \$213 million to record approximately \$941 million at June 30, 2025.

West Virginia

The OIC management believes the discounted liability for unpaid claims and claims adjustment expenses is adequate. However, due to the inherent variability of the assumptions used to estimate this liability, actual incurred losses and loss adjustment expenses may vary significantly from the estimated amount included in the WCF's financial statements.

Each of the three risk pools has issued separate, audited financial reports on its operations. Those reports include the required supplementary information concerning the reconciliation of claims liabilities by type of contract, if applicable, and ten-year claim development information.

Complete financial statements of the individual insurance enterprise funds, including additional detailed disclosures, can be obtained directly from their respective administrative offices:

NOTE 16

COMMITMENTS AND CONTINGENCIES

Environmental Protection Claims

The State, through the Department of Environmental Protection (DEP), maintains several environmental protection programs, including a bonding program for coal operators for mine reclamation; an abandoned oil and gas well bonding program; a Landfill Closure Assistance Program (LCAP); and an underground storage tank program. Under such programs, the State charges various fees, premiums, and other assessments, and sets bonding amounts that operators are required to maintain to ensure that funds are available in the event that the operator is unable to fulfill its environmental protection responsibilities. Based upon the State's estimate of the liability for incurred losses under the programs, the bonding amounts and funding structures established by the State have proven inadequate to fund the actual costs of environmental protection that the State has incurred in acceptance of the related insurance risk. As a result, the State has been required at various times to increase fees and bonding rates. Administrative changes in permitting regulations governing the industries and businesses benefiting from the State's maintenance of such environmental protection programs are constantly under review.

Management has estimated the total cost at current dollars of remediation efforts to approximate \$365 million at June 30, 2025. The estimated remediation costs are not expected to be liquidated by expendable available financial resources, so the obligation is reported as a liability in the governmental activities on the statement of net position. As such, the State has recorded in governmental activities the following liabilities related to the above programs at June 30, 2025 (expressed in thousands):

	Balance June 30, 2024	Additions	Reductions	Balance June 30, 2025	Amount Due Within One Year
Mine Reclamation Program	\$ 198,201	\$ 47,791	\$ —	\$ 245,992	\$ 26,077
Oil and Gas Well Program	9,989	5,964	—	\$ 15,953	15,953
Landfill Closure Assistance Program	118,069	—	15,503	\$ 102,566	3,412
Underground Storage Tanks	998	—	378	\$ 620	—
Total Environmental Liability	\$ 327,257	\$ 53,755	\$ 15,881	\$ 365,131	\$ 45,442

The nature of the environmental liabilities requires the use of estimates and assumptions by management. Accordingly, it is at least reasonably possible that a significant change in the estimate will occur in the near term, resulting from various factors, including inflation, deflation, technology, assumption changes, or change in applicable laws or regulations.

Mine Reclamation Program

The Special Reclamation Program was created to enable compliance with a federal mandate that allows the State to operate an alternative bonding program to ensure that mining sites are reclaimed in accordance with federal and state regulations. This program created funds for reclamation costs if the operator does not perform the reclamation and the respective bond is forfeited by the operator. In addition, the State also accrues for active water

treatment sites under this program. The State's estimated liability for these water treatment sites assumes a 20-year treatment period until the sites are properly reclaimed since the treatment costs beyond a 20-year period cannot be reasonably estimated. The actual length of water treatment and the actual ultimate liability could differ significantly from this estimate.

Forfeited operator bonds, civil penalties, investment earnings as well as a tax imposed on clean mined coal, currently 27.9 cents per ton, are set aside to fund this program. The Special Reclamation Fund plans to make expenditures for reclamation and water treatment systems as more funding becomes available. The Legislature further established a Special Reclamation Fund Advisory Council (the Council). The Council's role is to develop a financial plan that ensures long-term stability of the special reclamation program. The Legislature further requires actuarial studies of the fund's fiscal soundness every two years.

Landfill Closure Assistance Program (LCAP)

The LCAP was established to provide landfill closure assistance to owners/permittees or landfills that were required to cease operations pursuant to certain statutory closure deadlines for non-composite-lined facilities. The program designs and constructs all closure-related activities necessary to provide sufficient leachate management, sediment and erosion control, gas management, groundwater monitoring, and final cover cap on non-composite lined landfills, as funds are available. The LCAP began with 28 landfills. Four landfills have been added to the original inventory by the legislative process, two of which were added in 2015. There is one landfill left to be closed. As of June 30, 2025, the liability is estimated at \$103 million and is projected to be paid through fiscal year 2057.

Other Contingencies

In addition to environmental protection claims, the State has recorded an obligation in the amount of \$140 million, of which \$29 million is the current obligation for the payment of claims and judgments. These obligations are for the Division of Highways and Court of Claims. The other obligations line item in the financials include unclaimed property claims which total \$123 million, \$23 million of which is a current obligation. These claims are based on management's evaluation of the nature of such claims and consideration of historical loss experience for the respective types of action. Certain other claims may be covered by the state's insurance carrier under its general liability or medical malpractice coverage.

An employer who has been granted self-insured status for workers' compensation insurance coverage must post security with the WCF for an actuarially determined amount of its liabilities incurred with dates of injury prior to July 1, 2004. Payments made for claims of employees of defaulted self-insured employers for injuries prior to July 1, 2004, will be made from the Self-insured Security Pool established by Senate Bill 1004. The assets of the Security Pool consist of the proceeds received from the security held by the WCF and any necessary assessments made to active self-insured employers for the default of a self-insured employer.

Payments for the injuries of defaulted self-insured employers incurred after July 1, 2004, will be made by the Self-insured Guaranty Pool; however, any self-insured employer who fails the analytical financial review will also be required to post security to the Guaranty Pool on any workers' compensation liabilities incurred after July 1, 2004. The Self-insured Guaranty Pool is funded through quarterly assessments to self-insured employers and the proceeds received

from the security held. To the extent a self-insured employer cannot meet its obligations under the Law, the two self-insured pools previously discussed remain contingently liable for all policy benefits. The only sources of revenue permitted under the Law to fund the Security Pool and the Guaranty Pool must be obtained from self-insured employers. Self-insured employers are considered joint and severally liable for the obligations of a defaulted self-insured employer. The amount has not been included in the estimated liabilities for unpaid claims and claim adjustment expense because the likelihood of future self-insurer defaults has not been estimated.

It is not possible to predict with certainty the ultimate outcome of all lawsuits or claims pending or threatened against the State, including those discussed above, some of which involve claims for significant amounts. Based on the current status of all legal proceedings for which accruals have not been made in the State's financial statements, it is the opinion of management and the Attorney General that the proceedings will not have a material adverse impact on the State's overall financial position. However, depending on the amount and timing of the resolution, some or all of these matters could materially affect the State's change in financial position or cash flows for a particular period.

Federal Grants

Payments received under the reimbursement arrangements with agencies of the federal government are subject to retroactive audit and adjustment. Management believes that adequate provisions have been made for reasonable adjustments that may result from regulatory reviews and disallowed costs. However, laws and regulations governing these programs are extremely complex and subject to different interpretation. As a result, there is at least a reasonable possibility that recorded estimates could change by a material amount. Management believes it is in compliance with all applicable laws and regulations. Compliance with such laws and regulations can be subject to future government review and interpretation as well as significant regulatory action, including fines, penalties, and exclusions.

The State, including its institutions of higher education, receives significant financial assistance from the U.S. Government in the form of grants and other federal awards. Entitlement to those resources is generally conditioned upon compliance with the terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of the resources for allowable purposes. The State provides for estimates of any material disallowance arising in connection with the operation of these federally funded programs as such amounts become reasonably estimable. Federal awards are subject to financial and compliance audits under either the federal Single Audit Act or by grantor agencies of the federal government or their designees. The ultimate obligations that may arise from cost disallowance or sanctions as a result of those audits and the related impact on the financial statements of the State or its component units are unknown. The ultimate resolution of the regulatory review process could materially impact the State's future change in financial position or cash flows in a particular period.

Construction and Other Commitments

(Expressed in Thousands)

	Amount Committed	
		Commitment
<hr/>		
Governmental Funds:		
Transportation	\$ 1,461	Construction
<hr/>		
Enterprise Funds:		
Drinking Water Treatment Revolving Fund	15,072	Committed for loans
Water Pollution Control Revolving Fund	110,685	Committed for loans
West Virginia Infrastructure and Jobs Development Council	46,135	Funding of water and economic development projects
<hr/>		
Discretely Presented Component Units:		
West Virginia Lottery	4,783	Capital assets and construction
Economic Development Authority	455,932	Committed for loans
Housing Development Fund	45,827	Committed for loans
Parkways Authority	86,607	Turnpike improvements
Higher Education	42,223	Construction
School Building Authority	52,100	Acquisition, construction and maintenance grants to county school boards
Municipal Pensions Oversight Board	1,313	Committed for Loans

The Department of Transportation's Inspection Program (DOT) has reviewed information on obsolete and deficient bridges. Transportation is concerned about safety and tries to prioritize bridges for repair and replacement based on engineering assessments. Transportation's long-range plans to address this issue will be impacted by actions that may be taken by both the federal and state government, including funding levels provided for this purpose, which cannot be estimated at this time.

West Virginia University (WVU) has signed an agreement providing for the purchase of steam for a remaining period of two years. Under the agreement, WVU has an annual minimum steam purchase requirement, purchased at an operating rate calculated in accordance with the agreement. Payments in future years will be dependent on actual operating costs and other cost indices in those years.

The West Virginia Providing Real Opportunities for Maximizing In-State Student Excellence (PROMISE) scholarship program provides scholarships to students within the West Virginia secondary education system who meet the scholarship requirements. The basic scholarship requirements include maintaining a 3.0 grade average, receiving an ACT composite score of 21 with a minimum sub-score of 19 in each of the four subject areas, and enrolling in a college or university in West Virginia. The program will pay for tuition and fees, and had 17.6 million at June 30, 2025, to fund the program obligations. Subsequent to year-end, the program received \$2.8 million from the Lottery and \$10.1 million in general revenue.

NOTE 17

SUBSEQUENT EVENTS

On October 31, 2025, the West Virginia Department of Health and Human Resources entered into a contract with Marx Development Group for \$60 million for the sale of Hopemont Hospital, Jackie Withrow Hospital, John Manchin Sr. Healthcare Center, and Lakin Hospital. This includes the sale of all assets and liabilities related to the respective facilities.

REQUIRED SUPPLEMENTARY INFORMATION

Notes to Required Supplementary Information

Budgetary Reporting

The State's annual budget is prepared on a cash basis, modified only at year-end to allow for a 31-day period for the payment of vendor invoices for goods and services previously encumbered. Appropriations expire or lapse at the end of this period.

Budgetary Process

Appropriation requests for the upcoming fiscal year are submitted to the State Budget Office (Budget) by September 1. Budget conducts budget hearings and reviews revenue estimates for recommendation and preparation of the proposed budget. The Governor presents the proposed budget to the State Legislature in January. Included in that budget proposal is the Governor's official revenue estimate for the upcoming fiscal year. To maintain a balanced budget, the Legislature can appropriate expenditures only to the level of the Governor's official revenue estimate and prior year fund balance.

The Legislature also holds budget hearings, considers the effect of other proposed legislation, and gathers other information during its 60-day session, which occurs January through March of each calendar year. During the last days of the legislative session, the Legislature passes the budget and the Governor approves, vetoes, or allows the budget to become law without signing.

In the event that there is a shortfall of General Revenue Fund collections during the year, the Governor may impose a spending reduction. In 1994, the Legislature created a Revenue Shortfall Reserve Fund (Rainy Day Fund) designed to prevent a spending reduction. By law, the first 50% of the General Revenue Fund surplus for a fiscal year is set aside in a reserve or Rainy Day Fund not to exceed 13% of the total appropriations from General Revenue for that year. This fund may be used to offset a shortfall of revenues which would otherwise require the Governor to impose expenditure reductions.

In the event of higher than estimated revenue collections throughout the year, supplemental appropriation requests may be made to the Legislature. In FY 2025, Appropriated Special Revenue and Federal Funds were increased by total supplemental appropriations of \$1.34 billion. During the budget process, the Legislature may also decide to reappropriate certain unexpended budgetary appropriations for expenditure in the next year. Accounts reappropriated generally relate to special activities or projects that may require several years to complete. Reappropriated prior year general revenue appropriations of \$1.56 billion are reported as "Expenditures From Prior Year Appropriations."

In addition to the above, in the event of a General Revenue budget surplus from the previous fiscal year, additional appropriation requests may be made to the Legislature. Appropriations from 2024 General Revenue were increased by approximately \$16.75 million for surplus appropriations. The \$16.75 million surplus appropriations are also reported as "Expenditures From Prior Year Appropriations".

After the budget is legally enacted, certain appropriations from General Revenue may be altered or transferred within each Cabinet Secretariat. The transfers may not exceed more

than 5% of the funds appropriated to any one agency or board, and are altered at the budgetary activity level. Other specific transfers are allowed in all the budgetary funds from the object classes of personal services and unclassified budget object classes to employee benefits or from personal services and employee benefits to other budget object classes, and are not limited to Secretariat authority.

The budget laws provide for the ability of the Governor to increase the appropriations of the budgetary Appropriated Special Revenue Funds and the Federal Funds when the Legislature is not in session. Detailed spending plans, identification of new revenue sources, and justifications are required for review and approval.

Budgetary Control

The State Legislature annually appropriates those general government activities determined to be important to controlling the financial operations of the State. The Legislature appropriates expenditures for those defined budgetary activities of personal services, current expenses, repairs, and other assets, often further defined by the object classes of personal services, employee benefits, equipment repairs and alterations, or unclassified.

The State's accounting system controls expenditures for appropriated accounts at the budgetary activity level on a predefined quarterly basis. The State Auditor exercises control over spending at the budgetary activity level on an annual appropriation basis.

Budget further monitors the rate and nature of spending for all budgetary accounts by requiring the organization responsible for the budgeted activities to submit annual spending plans reflecting further details on their expected quarterly spending patterns and the types of expenditures for the budgeted accounts. From these spending plans, Budget monitors and limits expenditures within predefined quarterly allotments. Expenditures during a quarter may not exceed the amount of the approved allotment, unless the Governor approves the expenditure of a larger amount. Any amounts remaining unexpended at the close of a quarter are available for reallocation and expenditure during any succeeding quarter of the same fiscal year.

Budget also utilizes encumbrance accounting to control purchase orders and other commitments. Under the budgetary process, unexpended appropriations and encumbrances expire at the end of the 31-day period following each fiscal year-end. All unpaid invoices and claims after that date must be submitted by the vendor to the State Court of Claims, unless the related activity has been reappropriated by the Legislature.

Budgetary Funds

The State uses four budgetary fund groups to summarize accounts or activities which have been legally appropriated. The budgetary fund groups are described as follows:

General Revenue Fund – consists primarily of the major tax revenues of the State, such as Consumer Sales Tax, Personal Income Tax, Business and Occupation Tax, Corporate Net Income Tax, and Severance Tax. The General Revenue Fund supports the operation of certain primary government activities and certain other agencies.

Federal Fund – consists of any financial awards made to any state agency by the U.S. Government, whether a loan, grant, subsidy, augmentation, reimbursement or any other form of such awards, including state funds used for federal matching purposes.

Road Fund – consists of revenues from gasoline and other motor fuel excise and license taxes, motor vehicle registration and license fees, and all other revenue derived from motor vehicles or motor fuel. The Road Fund is appropriated by the Legislature and used solely for construction, repair, and maintenance of public highways, and also for the payment of interest and principal on all road bonds.

Appropriated Special Revenue Fund – consists of individual accounts created for special purposes. These accounts generate revenue derived from established rates or fees. The spending within these accounts is limited to the amount collected or the amount appropriated by the Legislature, whichever is less.

The State has other special revenue accounts which are not appropriated. These accounts are special accounts which derive revenues from special fees or charges, or exist for internal agency purposes, such as payroll clearing accounts, cost allocations, etc., but are not subject to specific legislative appropriation. Accordingly, these accounts have not been reported in the State's budgetary comparison schedule.

2025 Budgetary Reporting

The State's budgetary General Revenue Fund balance at July 1, 2024, has been adjusted as follows (expressed in thousands):

General Revenue Fund:	
Beginning Fund Balance	\$ 2,197,509
Prior Year Refunds	621
Transfer from Expired Funds	43,693
Adjustment	3,634
Adjusted Beginning Fund Balance	<u>\$ 2,245,457</u>

Budgetary Reporting and GAAP

Because the budgetary basis differs from accounting principles generally accepted in the United States, budget and actual amounts in the accompanying Budgetary Comparison Schedule are presented on the budgetary basis. A more detailed budgetary basis report, Supplementary Information to the State of West Virginia Annual Comprehensive Financial Report, is produced for internal purposes to demonstrate budgetary compliance and is available at the Financial Accounting and Reporting Section for public inspection. A reconciliation that compares the excess of revenues over expenditures on a budgetary basis for the year ended June 30, 2025, to the excess of revenues and other financing sources over expenditures and other financing uses presented in conformity with accounting principles generally accepted in the United States is set forth in the following schedule.

Changes in Assumptions for OPEB

Significant assumptions used in the actuarial valuations are as follows:

Actuarial cost method	Entry age normal
Amortization method	Level percentage of payroll, closed
Amortization period	20-year closed period as of June 30, 2017
Asset valuation method	Market value
Actuarial assumptions:	
Investment rate of return	7.40%, net of OPEB plan investment expense, including inflation
Inflation rate	2.50%
Salary Increases	Rates based on 2015-2020 OPEB Experience Study and depend on pension plan participation and attained age, and range from 2.75% to 5.18% including inflation. Rates were first applied to the 2020 valuation.
Retirement Age	Rates based on 2015-2020 OPEB Experience Study and vary by pension plan participation and age/service at retirement. Rates were first applied to the 2020 valuation.
Mortality rates	Post-Retirement: Pub-2010 General Healthy Retiree Mortality Tables projected with Scale MP-2021 for TRS. Pub-2010 General Below Median Healthy Retiree Mortality Tables projected with Scale MP-2021 for PERS. Pub-2010 Public Safety Healthy Retiree Mortality Tables projected with Scale MP-2021 for Troopers A and B. Pre-Retirement: Pub-2010 General Employee Mortality Tables projected with Scale MP-2021 for TRS. Pub-2010 Below-Median Income General Employee Mortality Tables projected with Scale MP-2021 for PERS. Pub-2010 Public Safety Employee Mortality Tables projected with Scale MP-2021 for Troopers A and B.
Healthcare cost trend rates	Trend rates for pre-Medicare and Medicare per capita costs start at 5.0% medical and 8.0% drug. The trend increase over four years to 7.00% and 9.5%, respectively. The trends then decrease linearly for 5 years until the ultimate trend rate of 4.5% is reached in plan year-end 2033.
Aging Factors	Based on the 2013 SOA Study "Health Care Costs – From Birth to Death"
Expenses	Health administrative expenses are included in the development of the per capita claims costs. Operating expenses are included as a component of the annual expense.
Date range in most recent experience study	Actuarial assumptions used in the June 30, 2023, valuation were based on the results of an actuarial experience study for the period July 1, 2015 - June 30, 2020.

GOVERNMENTAL FUND TYPES – NONMAJOR

Special Revenue:

Special Revenue Funds are used to account for and report the proceeds of specific revenue sources that are restricted, committed, or assigned to expenditures for specified purposes.

Debt Service:

Debt Service Funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest.

Capital Projects:

Capital Projects Funds are used to account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. These funds consist of the following:

Education, Arts, Sciences, and Tourism Fund: This Fund is established to provide public financial support for constructing, equipping, improving, and maintaining capital improvement projects which promote education and tourism in the State.

Lease Purchase Account: This Account is established to ensure that revenues and expenditures for the acquisition of capital assets through lease-purchase agreements are properly recorded.

Cacapon Project Fund: This Fund is established to provide public financial support for constructing, equipping, improving, and maintaining capital improvement projects at Cacapon Resort State Park.

Permanent Funds:

Permanent Funds are used to account for and report resources that are restricted to the extent that only earnings, not principal, may be used for purposes that support the State's programs, for the benefit of the government or its citizenry.

The Irreducible School Fund: The Fund, which was constitutionally established, is required to maintain a minimum level of investments. All earnings from these investments are transferred to the General Fund for educational expenditures.

SPECIAL REVENUE FUNDS

Nonmajor Funds

Environmental Protection: The Fund consists of various programs intended to maintain and improve the environmental quality of the State and its natural resources. Included in this Fund are programs addressing the following: Underground Storage Tanks, Groundwater, Solid Waste Environmental Response and Enforcement, Special Reclamation, Mines and Minerals, Dam Safety, Hazardous Waste Emergency Response, Oil and Gas Reclamation, and Oil and Gas Operating Permit and Processing, as well as other miscellaneous programs.

Public Service Commission: The Commission is responsible for appraising and balancing the interests of current and future utility service customers, the State's economy, and the utilities subject to its jurisdiction. It is directed to identify, explore, and consider the potential benefits and risks associated with emerging and state-of-the-art concepts in utility management, rate design, and conservation.

Crime Victims' Compensation: The intent of the Fund is to provide partial relief to the innocent victims of crime, including claimant's attorneys and witnesses, for the failure of the State to fully provide for the safety of its citizens and the inviolability of their property. To fund this program, individuals convicted of any felony or misdemeanor, excluding nonmoving traffic violations, must pay an additional amount over and above ordinary court costs.

Insurance Commission: The Commission is responsible for promoting a competitive and solvent insurance market of domestic, foreign, and alien insurers. Additionally, the Fund is authorized to promulgate and adopt and enforce such rules and regulations relating to insurance as are deemed necessary to protect and safeguard the interests of policyholders and the public.

WORKFORCE West Virginia: The Bureau of Employment Programs doing business as WORKFORCE West Virginia includes the Employment Service Division (ES) and the administrative activities of the Unemployment Compensation Division (UC). Local offices are operated throughout the State to serve those seeking and providing employment.

Wildlife Resources Fund: The Fund is responsible for recognizing the inestimable importance of conserving the wildlife resources of West Virginia. In addition, the Fund provides the opportunity for citizens and residents of the State to invest in the future of its wildlife resources. The Fund is financed from the proceeds of the sale of lifetime hunting and fishing licenses, as well as proceeds from gifts, grants, and contributions. The interest on this Fund shall be used only for the purpose of supporting wildlife conservation programs of the State.

DEBT SERVICE FUNDS

Nonmajor Funds

Lease Purchase Account: This Account is established to ensure that revenues and expenditures for the debt service of the lease-purchase agreements are properly recorded.

West Virginia Infrastructure and Jobs Development Council: The Council coordinates the review and funding of water, wastewater, and economic development projects in the State. This Fund is used to account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest for the Council's general obligation debt.

Education, Arts, Sciences, and Tourism Fund: This Fund is used to account for and report the financial resources that are restricted, committed, or assigned to expenditure for principal and interest on the bonds issued to provide public financial support for constructing, equipping, improving, and maintaining capital improvement projects which promote education, arts, sciences, and tourism in the State.

Economic Development Project Fund: This Fund is used to account for and report the financial resources that are restricted, committed, or assigned to expenditure for principal and interest on the bonds issued to provide funds to finance a portion of the costs of construction, equipping, improving, or maintaining economic development projects, capital improvement projects, and infrastructure projects which promote economic development in the State.

Cacapon Project Fund: This Fund is used to account for and report the financial resources that are restricted, committed, or assigned to expenditure for principal and interest on the bonds issued to provide funds to finance a portion of the costs of constructing, equipping, improving or maintaining capital improvements projects at Cacapon Resort State Park.

State Parks Projects: This Fund is used to account for and report the financial resources that are restricted, committed, or assigned to expenditure for principal and interest on the bonds issued to provide funds for certain capital improvement and deferred maintenance projects throughout the State Parks System, including but not limited to, maintenance, repair, construction, upgrades, and improvements.

INTERNAL SERVICE FUNDS

Internal Service Funds account for the operations of those state agencies that provide goods and services to other state agencies and governmental units on a cost-reimbursement basis. The Internal Service Funds consist of the following:

State Building Fund: The Fund operates and maintains the primary state government office building complex and related facilities. These facilities are leased to the state agencies that occupy the facilities.

Office of Technology: The Fund is responsible for establishing, developing, and improving data-processing functions, for promulgating standards for the utilization of data-processing equipment; and for promoting the effective and efficient operation of the legislative, executive, and judicial branches of State Government. Costs are recovered through service charges to user agencies.

Travel Management: The Fund, a central motor pool responsible for the storage, maintenance, and repairs of state-owned vehicles and aircraft, is maintained by the Department of Administration. User agencies are billed for leasing such vehicles and for use of aircraft.

Enterprise Resource Planning Board: The Board is responsible for the oversight of how the State manages its financial, human resources, procurement, and other administrative business processes through its Enterprise Resource Planning (ERP) system. Costs are recovered through service charges to user agencies.

Investment Management Board: The Board serves as the Trustee to provide prudent fiscal administration, investment, and management of the State's pension funds, workers' compensation, pneumoconiosis, and other long-term funds.

Board of Treasury Investments: The BTI serves as the investment vehicle for the operating cash of state agencies and authorities, local governments, and other political subdivisions.

PROPRIETARY FUNDS – NONMAJOR

Drinking Water Treatment Revolving Fund: Low-interest loans are made to communities to assist in financing drinking water infrastructure projects, including, but not limited to, treatment, distribution, transmission, and storage. The Fund is to remain in perpetuity by recirculating the principal and interest earned from the loans.

Alcohol Beverage Control Administration: The Administration is responsible for the regulation and control of the manufacture, sale, distribution, transportation, storage, and consumption of alcoholic beverages. The Administration shall establish stores and agencies and shall fix uniform prices for the sale of alcoholic beverages.

West Virginia College and Jumpstart Savings Program: The College and Jumpstart Savings Administrative Account previously named the College Prepaid Tuition and Savings Program Administrative Account was continued by Senate Bill 8 to implement, operate, and maintain the College and Jumpstart Savings Programs. Sources of funds for the Administrative Account come from fees charged to participants in the College Savings Program and transfers from the West Virginia Savings and Investment Program Fulfillment Fund of the State to the Administrative Account to cover expenses related to the Jumpstart Savings Program. The Program began operations on July 1, 2022.

State Entities Workers' Compensation (SEWC): The Fund is responsible for providing a means of managing workers' compensation coverage for persons directly employed by the State of West Virginia. The West Virginia Offices of the Insurance Commissioner was given the responsibility of administering the SEWC. The SEWC is a public entity risk pool functioning as an insurance purchasing pool.

PENSION TRUST AND OTHER EMPLOYEE BENEFIT TRUST FUNDS

Pension Trust These Funds are accounted for in essentially the same manner as proprietary funds and are described below:

Consolidated Public Retirement Board The Consolidated Public Retirement Board consists of nine plans. There are nine defined benefit plans as follows: The Public Employees Retirement System (PERS) plan is a multiple-employer defined benefit, cost-sharing public employee retirement system. This plan covers substantially all employees of the State and its component units, as well as employees of participating nonstate governmental entities who are not participants of another State or municipal retirement system. The Deputy Sheriffs' Retirement System (DSRS) plan is a multiple-employer defined benefit, cost-sharing public employee retirement system. This plan covers all deputy sheriffs hired on or after July 1, 1998, as well as eligible transferees from PERS. The Emergency Medical Services Retirement System (EMSRS) is a multiple-employer, cost-sharing public employee retirement system, which was established for eligible emergency medical service officers. Participation is voluntary. The Teachers' Retirement System (TRS) plan is a multiple-employer defined benefit, cost-sharing public employee retirement system. This plan covers all full-time employees of the public school systems in the State, as well as certain personnel of the State-supported institutions of higher education, State Department of Education, and boards of higher education. The Public Safety Death, Disability and Retirement Fund (PSDDRF) plan is a single-employer defined benefit public employee retirement system. This plan covers all West Virginia State Police hired before July 1, 1994. The State Police Retirement System (SPRS) was implemented to cover all State Police employees hired on or after July 1, 1994. The Judges Retirement System (JRS) plan is a single-employer defined benefit public employee retirement system. This plan covers the State's judges who elect to participate. The Teachers' Defined Contribution Retirement System (TDCRS) plan is a multiple-employer defined contribution retirement system. This plan primarily covers full-time employees of the State's county public school systems. The Municipal Police Officers and Firefighters Retirement System (MPFRS) plan is a multiple- employer defined benefit retirement system. This plan provides for any municipality or municipal subdivision employing municipal police officers or firefighters. The Natural Resources Police Officers Retirement System (NRPORS) is a single-employer defined benefit public employee retirement system. This plan covers all natural resources police officers hired January 2, 2021, and any transferees from PERS.

Employee Benefit Trust Fund This fund is used to report a trust arrangement and is accounted for in essentially the same manner as proprietary funds.

The West Virginia Retiree Health Benefit Trust Fund The West Virginia Retiree Health Benefit Trust Fund (RHBT), an irrevocable trust, was established under West Virginia Code 5-16D and is administered by the West Virginia Public Employees Insurance Agency (PEIA) and the PEIA Finance Board. The RHBT is a cost-sharing, multiple-employer, defined benefit other postemployment benefit (OPEB) plan. It provides the following basic retiree benefit coverage to all participants: hospital, surgical, group major medical, basic group life, accidental death, dental, and prescription drug coverage for retired employees of the State of West Virginia and various nonstate agencies and their dependents. All premium rates for plan members and employers are established based upon actuarially determined projected coverage costs as reviewed and approved by the Finance Board of PEIA.

INVESTMENT TRUST FUNDS

Investment Trust Funds: The investment trust funds account for the external portion of the State's external investment pools. The State maintains two external investment pools, the West Virginia Money Market and West Virginia Government Money Market pools. The external portion belongs to local governments and municipalities. These Funds are accounted for in essentially the same manner as proprietary funds.

CUSTODIAL FUNDS

Custodial Funds: These funds are custodial in nature and report fiduciary activities that are not required to be reported in pension (and other employee benefit) trust funds, investment trust funds, or private-purpose trust funds. They include the following:

Local Government: This fund accounts for funds received by the State, from local governments to be invested with the West Virginia Board of Treasury Investments.

Municipal Bond Commission: This fund includes funds received by the State, who acts as an escrow agent for local governments and assures payments are made to bondholders.

Consolidated Investment Pool: This fund includes amounts collected on behalf of third parties, performance bonds required by the Department of Energy and Labor, the Department of Environmental Protection, and other restricted assets held by the Governor's Office of Community and Industrial Development.

West Virginia Prepaid Tuition Escrow: This fund was created for the purpose of satisfying any claims against the Prepaid Tuition Trust Plan arising after the plan's closure.

Patient Injury Compensation Fund: This fund was created for the purpose of providing fair and reasonable compensation in medical malpractice actions for any portion of economic damages awarded that is uncollectible as a result of limitations on economic damage awards for trauma care, or as a result of the operation of the joint and several liability principles and standards set forth in the West Virginia State Code.

Other Custodial Funds: These funds include the Coronavirus State Fiscal Recovery Pass Through Fund, American Rescue Plan Act, and other small custodial funds.

DISCRETELY PRESENTED COMPONENT UNITS

Nonmajor Component Units

Educational Broadcasting Commission: The Commission is responsible for extending educational, cultural, and informational experiences to all citizens of the State through the construction and operation of noncommercial, educational television and radio stations, and related facilities. Revenues for operations are derived primarily through private donations, with additional supplements from federal and state grants.

West Virginia Division of Multimodal Transportation Facilities: The Division is responsible for the administration of all federal and state programs related to public ports, railroads, airports, air navigational facilities and public transit providers. The Division is empowered to issue bonds for the rail system.

Solid Waste Management Board: The Board is responsible for the improved collection and disposal of solid wastes, and for encouraging recycling, reuse, or recovery of resources from wastes. The intent of the Board is to become a viable financing mechanism for solid waste projects in West Virginia, and it is empowered to issue bonds and set rate structures at its discretion.

Racing Commission: The Commission has full jurisdiction and supervision over all horse- and dog-race meetings, and all persons involved in the holding or conducting of horse- or dog-race meetings. It can fix the annual fee for permits and registrations. Other racing taxes and fees are set by West Virginia State Code, Chapter 19, Article 23.

Public Defender Corporation: The Corporation is responsible for fulfilling the State's obligation to provide legal representation to eligible clients. Funding of the individual public defender corporations is by appropriation determined by the executive director of the Public Defender Services.

Municipal Pensions Oversight Board: The Board's purpose is to monitor and improve the performance of municipal policemen's and firemen's pension and relief funds assuring prudent administration, investment, and management of the funds. The board also assists municipal boards of trustees in performing their duties related to pensions, ensures the funds' compliance with applicable laws, and distributes insurance premium tax revenues to the individual pension funds.

All General Obligation Bonds carry a pledge of the State to levy taxes if funds are insufficient to meet debt service.

Infrastructure bonds are paid from the dedication of the first \$24 million in severance tax collections.

Safe Roads bonds are paid from a debt service fund which is administered by the West Virginia State Treasurer's Office. The Division of Highways makes a monthly transfer to this fund from the Road Fund. The monthly transfer amount is equal to 10% of the annual debt service requirement on all Safe Roads Bonds.

*These ratios are calculated using the current fiscal year debt total divided by personal income and population for the prior calendar year. See Schedule 10 for personal income tax and population data.

Department of Transportation

West Virginia Code Chapter 17, Article 17A provides for the issuance of Surface Transportation Improvement Special Obligation Notes (GARVEE bonds) to facilitate the construction of highways, secondary roads, and bridges to be funded wholly or in part by federal dollars and in anticipation of reimbursement from such sources. Title 23, Section 122 federal legislation allows this reimbursement. There is Memorandum of Agreement between the Federal Highway Administration and the Division of Highways that documents the procedures for managing the stewardship and oversight of highway projects that are financed with the proceeds of these notes first issued in fiscal year 2007.

WV Infrastructure and Jobs Development Council

The primary source of repayment for the revenue and refunding bonds is the receipt of payments of principal and interest on a set of loans, known as defined loans, previously made to projects from revenue bond proceeds. New bonds were issued in 2018 to refund earlier bond issues.

Tobacco Settlement Finance Authority

Pursuant to the Code, and a Purchase and Sale Agreement, dated June 1, 2007, by and between the Authority and the State, the State sold to the Authority its right, title, and interest in and to all tobacco settlement revenue that is received by the State, under the terms of the Master Settlement Agreement entered into by participating tobacco product manufacturers, West Virginia, 45 other states, and six other U.S. jurisdictions in November 1998. In FY 21, refunding bonds Series 2020 were issued. The proceeds were used to refund a portion of the 200A bonds. The Series 2020 Bonds are secured by and are payable solely from the right, title, and interest of the Authority of 100% of the tobacco receipts, and investment earnings on the accounts with the trustee under the Indenture.

Economic Development Project Fund

West Virginia State Code Chapter 29, Article 22, Section 18a designates \$19 million annually from the "excess lottery revenue fund" to be paid into the Economic Development Project Fund created in subsection (d) for payment of revenue bonds issued pursuant to the same subsection. Interest on the account and any other amounts paid into the Economic Development Project Fund are also to be used for the repayment of the bonds, which were issued in 2004.

Economic Development Authority

The Economic Development Authority (EDA) has issued Revenue Bonds to provide financial assistance to State governmental entities for the acquisition and construction of facilities deemed to be in the public interest. The EDA has lease-purchase agreements with the State, and the State makes the payments to the trustee. Upon repayment of the bonds, ownership of the acquired facilities transfers to the governmental entity served by the bond issuance.

Housing Development Fund

Operating revenue includes revenues and principal loan repayments. Both are used for bond repayment. The Fund is authorized by West Virginia State Code to issue bonds and notes for its various programs in an aggregate principal amount not to exceed \$1.25 billion outstanding at any one time, exclusive of refunded obligations. Bonds and notes issued by the Fund are considered obligations of the Fund and are not deemed to constitute a debt or liability of the State. All bonds are secured by a pledge of all mortgage loan repayments, all proceeds of federal or private mortgage insurance, interest received on any monies or securities held pursuant to the resolution, and the rights and interest of the Fund in and to the mortgage loans.

Water Development Authority

The Authority maintains a variety of programs to provide long-term, short-term, and private-activity financing at favorable interest rates for design, construction, and/or acquisition of wastewater and/or water systems. Monies are loaned to municipalities, public service districts, and other political subdivisions through purchase of revenue bonds or notes issued by these local governmental agencies. The loans are repaid from the revenues of the systems or other permanent financing. The aggregate principal amount of bonds and/or notes issued by the Authority may not exceed \$500 million outstanding at any time; provided that before the Authority issues bonds or notes in excess of \$400 million, the Legislature must pass a resolution authorizing this action. An additional aggregate principal amount of \$192 million may be issued for the limited purpose of providing grants for capital improvements for designated projects in the Chesapeake Bay and Greenbrier Watershed areas. The Authority's long-term planning is accomplished within the confines of its authorized borrowing limit. Operating revenue includes revenues and principal loan repayments. Both are used for bond repayment.

Higher Education Fund

Various individual institutions, as well as the Fund, have issued bonds which are generally payable from tuition and registration fees. Several bond issues, including the 2009 Series A, 2010 Series A, B, and C, and a 2012 Series A and B are to be repaid using certain Lottery funds. Higher Education issued new taxable bonds in fiscal year 2023.

Schedule 15

Miscellaneous Statistics

June 30, 2025

Date of Statehood

June 20, 1863

West Virginia shares its history with Virginia from 1609 until Virginia seceded from the Union in 1861. The delegates of 40 western counties formed their own government, which was granted statehood in 1863. Declared a state by President Abraham Lincoln, West Virginia is the only state to be designated by Presidential Proclamation.

Form of Government	Constitutional Representative Government
Branches of Government	Legislative, Executive, Judicial
Area (Land and Water)	24,231.4 square miles (approximately)
Highest Elevation Point	Spruce Knob - 4,863 feet above sea level
Lowest Elevation Point	Harpers Ferry - 240 feet above sea level
Miles of Public Roads and Streets	38,844
Miles Maintained by the State	34,940
State Police Protection:	
Number of State Police Detachments	57
Number of State Police Troopers	557
Higher Education (State Supported):	
Number of Campuses	18
Number of Students	72,145
Recreation:	
Number of State Parks	36
Area of State Parks	77,690
Number of State Forests	8
Area of State Forests	72,683
Number of State owned and Operated Rail Trails	3
Distance of Rail Trails	231
Wildlife Fish and Game Management Areas	96
Acreage of Wildlife Management Areas (Owned and Leased)	511,783
